1931 Summer School For E. C. T. C.

Contrary to its usual practice East Carolina Teachers Training College is planning to divide its summer quarter this year into two terms. The advance applications already indicate that there will be a full number enrolled, and it is expected that all departments of

the college will be in operation. The teaching force will consist of members of the regular faculty.

The first term of the summer school will open on Tuesday, June 9, and close on Wednesday, July 15; the second term will open on Thursday, July 16, and close on Friday, August 21. A student may enroll for the entire quarter or for either of the two terms as desired. All classes will meet six days per week in order to complete a three quarter hour course during each term. Students will be permitted to carry a maximum of three full subjects each term for a total of nine quarter hours per term.

Arrangements have been made to conduct the usual training school for practice teaching during the summer in each of the elementary grades.

This college has always maintained the same high standard of work in the summer school as during the other quarters of the school year, and many teachers who are already employed avail themselves during the summer of the opportunity to improve their skill in teaching, to raise the grade of their certificate, and to work toward graduation from a regular college course.

The Director of the summer school, Dr. Leon R. Meadows, says that in spite of the present economic condition and the somewhat unsettled condition of the educational machinery in the state he believes the summer school at East Carolina Teachers College this year will enroll a large number. Advance enrollments at the present date for the summer school are in excess of the number in hand at the corresponding date last year. He has been making very careful plans for the summer school, working out an attractive curriculum, and getting in touch with school officials and teachers in the Eastern portion of the State.

Lee County Farmer Owns His Own Plane

Sanford, May 16.—Lee county probably has the only farmer in the State who is "air minded." John Allen, who lives near White Hill, is the owner of an airplane and he frequently inspects his own and his neighbors' crops from his seat in the sky. His plane is housed in the same barn with his mules and horses. Specimens of the old and new methods of transportation are thus in close proximity.

Secretary of War and the Chief of Staff of the Army into conference and asking them to figure out ways whereby the cost of maintaining the military establishment of the United States can be reduced without impairing its efficiency. This is a move in a direction which most Americans will commend. There is no doubt in the world, in our own minds, that we are a peace-loving nation. The peoples and governments of other countries do not always believe us when we say that, but every American knows that it is true. Mr. Hoover, by reason of his Quaker birth and upbringing, is naturally opposed to war as the means of settling international disputes. And it is reported that he found the heads of the Army in accord with his desire for economy.

The money spent by the War Department in time of peace, is, of course, very largely for internal improvements. The development and dredging of harbors, the building of bridges, everything that has to do with keeping navigable rivers in their channels, and many other government engineering projects, are carried out by army engineers. There is no idea of cutting down on any of these activities, which are now providing employment for tens of thousands of men who would otherwise, perhaps, be out of jobs. Nor is it planned, according to the information from Washington, to reduce the army personnel. But there are expenditures in connection with the upkeep of the military establishment which, it is believed, can be reduced or suspended to result in a saving of between \$300,000,000 and \$400,000,000 a year.

Such a saving would go a long way toward making up the nation's billion-dollar deficit, and it would also be a gesture toward the rest of the world in the way of proof that we have no immediate warlike aims.
