Rupture

E. J. MEINHARDI OF CHICAGO

Well known expert on the Meinhardt Rupture Shield, is coming here again. He will personally be at Washington Duke Hotel, Durham, N. Car., on Thursday, only, June 18th, from 10:00 a. m. to 5:00 p. m.

SPECIAL NOTICE—All men that he has fitted here during the last ten years are invited to call for inspection. All other are invited to call and investigate. There is no charge for demonstration. This visit is for men only.

CAUTION: Protect yourself against many fake methods for Rupture. Talk to the men in your community who have tried them before you invest. Also protect yourself against imitators of this notice—remember the name MEINHARDI.

The "Meinhardt Rupture Shield" has no understraps. It is perfectly sanitary, practically indestructible, and may be worn while bathing.

Rupture often causes Stomach Trouble, Backache, Constipation, Nervousness, and other ailments. Thousands of deaths from rupture can be avoided.

Please note the above dates and office hours carefully, as he will not visit any other city in this section at this time. (This visit is for white people only.)—E. J. Meinhardt Home Office—1551 N. Crawford Ave., Chicago.

Some Interesting Facts About North Carolina

North Carolina manufactures products in 68 of the 340 classifications into which the Bureau of the Census groups all manufactured products. Her raw materials, climate, labor, transportation and other facilities make it possible for her to manufacture goods in at least 144 of these classifications.

North Carolina leads all States in the Union in the number of cotton mills, the number of active spindles and in the consumption of raw cotton.

North Carolina manufactures more hosiery than any State in the Union—about 26 million dozen pairs annually.

More cotton goods are manufactured in North Carolina than in any other State.

North Carolina leads all States in the manufacture of denims, napped fabrics, cotton flannels, bed spreads, quilts, sheets, pillow cases, gingham, shirting and table damask.

During 1929 North Carolina factories gave employment to 308,068 wage earners and 16,507 officers and salaried employees. Only 12 States employed more people in their factories.

There are 3,792 plants in North Carolina which had an output amounting to \$5,000 or more each in the last census year.

North Carolina manufactures more wooden bedroom and dining room furniture than any other state in the Union.

Bedroom furniture valued at \$27,702,092 and dining room furniture valued at \$13,736,485 was manufactured in North Carolina in 1929. All wooden furniture manufactured in the State was valued at \$53,414,111.

Forty-seven cents out of every dollar worth of goods manufactured in North Carolina goes for raw materials, fuel and purchasing power; and fifteen cents for labor.

North Carolina leads all Southern states in the value added to raw materials by manufacturing. She ranks 13th among all the States in this respect.

Only six States made greater percentage gains in population during the decade from 1920-1930 than did North Carolina. The total increase in population during this period was 611,163. The total population now is 3,170,276.

The true value of all wealth in North Carolina is estimated at \$5,429,000,000 by the National Industrial Conference Board; the national wealth is \$361,800,000,000.

Forsyth County, with 297.8 people per square mile is the most densely populated county in the State. Tyrrell, with 12.2 people per square mile is the least densely populated.

ADVICE, SUGGESTIONS AND ESTIMATES FREE. Watkins & Bullock "Everything To Screen With" Roxboro North Carolina

approximately one thousandth part of the earth's surface. North Carolina has more inland water area than any State in the Union except Florida. North Carolina has on the average 65 people per square mile of land area. Factories and mills in North Carolina spent \$614,140,001 for raw materials, fuel and purchased electric energy during the year 1929. Exactly 36 per cent of the total population of North Carolina, or 1,141,129 people, who are ten years of age, or over, are gainfully employed. Agriculture in North Carolina gives employment to 499,923 people. Of these, 270,187 are owners and tenants; 227,541 are laborers. Of the laborers, 133,687 are family and household workers who receive no pay. The mining industry in North Carolina gives employment to 3,473 people. The postal service in North Carolina gives employment to 4,570 people. Postal receipts in 1929 amounted to \$6,504,000 in this State. Cotton mills in North Carolina employ 87,242 people; knitting mills 22,501; silk mills 3,986 and other textile industries 8,435. The garment trades are growing in North Carolina. More than four thousand people are now employed in these industries. Only 3 of one per cent of the people in North Carolina are foreign born. The State thus maintains her leadership in the proportion of her population of native birth. There are 19,860 more females than males in North Carolina. Forsyth, Durham and Rockingham lead in the order named in the value of manufactured products. One garment maker in North Carolina advertises that he uses cloth woven and finished in this State; that he sews up the garments with thread made in the State; that he labels his garments with labels woven in this State; and that he packs them in paper boxes made in this State—a truly North Carolina-made product. There are 284 native minerals found in North Carolina, a greater number than in any other State. In 1930 North Carolina ranked seventh in the farm value of the 22 principal crops and sixth in the farm value of the 75 principal crops. READ THE ADVERTISEMENTS.

"Say, Buddy," asked one, "got any scars on you?" "No," replied the other, "but I got some cigarettes."

The Family DOCTOR JOHN JOSEPH GAINES MD. MORE ABOUT "ROUGHAGE". I'm glad to see the movement of the pendulum start back the other way, in dietetic treatment of bowel disorders which cause constipation. I am glad to see the "roughage" hoax in process of being exposed to the public. At last, common sense is coming into its own, in the matter of stuffing a diseased bowel with almost wholly indigestible material called "roughage". I am fully aware of trumping on certain commercial toes in this letter; the promoters of the "bran health food idea" will probably jump all over me; let them jump. It takes more than jumping to convince me, in the face of experience. Let me quote a late observer—one who is an authority on this matter: "The enthusiast on bran forgets that he is prescribing the substance because it is one of the most indigestible to be found in nature; it was especially designed to carry seeds unchanged, through the digestive tracts of the herbivora. And yet, they call it health food!" A woman . . . who for ten years had kept her health in fair condition, only by sticking to a smooth diet . . . began taking bran on the advice of a physician . . . in a few weeks she had to be operated on, for the relief of intestinal obstruction . . . part of the intestine packed "with bran". Only yesterday I took a lady patient away from this fad, who had been kept on the bran diet for several years—growing worse every day. "Roughage" cannot be prescribed as a routine; when only digestible food is needed, why prescribe the most indigestible of substances? Dry, hard, indigestible things are heralded to the public as relief from constipation; why not go the limit, and give them sand and have it over? Routine has little rank in the intelligent treatment of weak, relaxed, atonic colons. I'll admit that the fee is easier gained, and often the patient's mind is satisfied that the doctor is very wise with this bran fad—but, somehow, the grouchy bowel goes on its indolent way unrejoiced.
