STORIES OF SUCCESS

CORNELIUS N. BLISS

Power is never very far from necessity. The vigor of the human mind quickly appears when there is no longer any place for doubt or hesitation. In after years, when the name of Cornelius N. Bliss was one to inspire respect from New Orleans to Boston, he acknowledged that the necessity to make not only his own success, but to provide for a large family of brothers and sisters, gave him the sense of thrift to which he attributed the realization of his dreams. When the opportunity was given him to make a small investment in his employer's business, this boy of eighteen was ready. Constant saving and careful financing developed the young clerk into the master merchant of his day. System in saving brings independence. Faith, pluck and perseverance are as strong as an army when backed by the battery of thrift, industry and economy. Start a savings account today, for it is what you save that counts. A dollar in the bank is worth two in the pocket, and the interest on it grows and grows. **WACHOVIA BANK & TRUST CO.**

GIVING HIM TAFFY.

may please him, but try serving him a dinner without ice and see how quickly his demeanor will change. It is annoying to the housewife to be without plenty of ice during the warm months. No iced deserts or toothsome ice cream, no crisp vegetables or tempting butter without good ice. Let us serve you—we do it at a fair price. The quality of our ice and system of delivery is the BEST. **HIGH POINT ICE & FUEL COMPANY.** Both Phones 109.

Vast Industries and Limited Railroad Facilities

For a Great Industrial School

The school census of High Point shows that 1700 of the 3100 children of school age are not in our public schools. Why are these boys and girls not in attendance? A large per cent of them are employed in the factories in our city. Are our schools supplying them with proper equipment for their duties at this time? The question asked today of those seeking employment is not "Why are you" but, "What can you do?" Are our schools teaching these boys and girls how to "do things?" It must be apparent to all business men that something is radically wrong in our educational system that training which will best fit for life's duties these boys and girls who are forced by circumstances to leave school before finishing the graded school, is lacking. Fully 90 per cent of our boys and girls never enter college and cannot avail themselves of its advantages. This is an age of progression and education must be progressive to fulfill its mission. If our curriculum and methods are practically the same as those of fifty years ago—have we progressed? If not then we should do so at once. There is but one way to do this—and that is to have our present curriculum supplemented by a daily course of industrial training for the boys, and of domestic science—cooking and serving—for the girls, and have these courses compulsory. When we do this, we shall be doing our full duty. All of our Northern cities are making wonderful progress in this direction and find the demand for such training, for young and old alike, so great that night classes are organized to accommodate those who are otherwise employed during the day. There are many instances of father and son pursuing the same courses in industrial training. A skilled mechanic is produced with far less expense than a fine Latin scholar, and is in greater demand. The same boy can become a skilled mechanic and demand \$2.00 a day, just as easily and in the same length of time as he can secure the little education he now gets and earns a \$1.00 a day—and more readily obtain work. It is due him and we ought to give it to him. The same girl that leaves school and shortly becomes the wife of the boy mentioned, should be fitted to do her part—and is she? What does she know of the duties of a wife—is she a good cook? Is she a good seamstress? Does she know anything of sanitation? Does she know how to judiciously expend the money earned by her husband? Has she received the education she needs to fit her for her duties? Not in any way. We do not hesitate to vote bonds for street improvement when they are needed, or for railroads. Why not vote \$50,000 worth of bonds and build a creditable building and equip it with the best modern appliances and the best instructors, and give the present School Board the necessary funds to carry out the above plan? No better School Board could be found than the present one, and if the people will arouse themselves to the necessity of such an industrial school, it can be carried out. The Legislature will grant permission, the Bonds can be voted and sold, and a building erected on the High School ground in the Spring. Shall we do it?
