

PELLEGRA CHECKED. ATTRIBUTED TO USE OF NEW MEDICINE

HER OWN CONDITION ACTUALLY FIGHTENED HER.

Wants Every One to Know.

TANLAC IS REALLY A WONDERFUL MEDICINE

Mrs. Dougherty Tells How She Got Relief.

E. H. Drum,
Hart Drug Co.,
High Point, N. C.

Dear Sir:—
Please find enclosed one dollar for which you are to send me a bottle of Tanlac. This is the third bottle I have ordered by mail and want after two, making five bottles taken as a whole.

So am just taking the liberty to write you to tell you how your Tanlac has helped me. I was so nervous and run down that I could hardly sweep the floor without sitting down to rest. And I had such a burning in my throat that I could not eat anything without collecting gas on my stomach, was so nervous I could not rest day or night, and had the headache most of the time. But the most important part I am leaving to the last. I had a terrible breaking out on my arms and as I had never had any skin trouble or rash of any kind before, was advised to consult a doctor. After an examination my trouble was pronounced pellagra. I commenced taking medicine, but my condition did not seem to improve, so I just decided to try Tanlac and how glad I am that I did, for it has helped me wonderfully. I have taken the full treatment, at least have taken five bottles and expect to take the other one which is the treatment, and really don't believe that nothing else could have helped me like Tanlac, for if I had pellagra it is all peeling off and gradually going away. My tired feeling is gone and I feel so much better. I praise Tanlac to every one. I talk to and recommend it to anyone suffering as I suffered.

Yours very truly,

MRS. T. M. DOUGHERTY.

Belmont, N. C., Aug. 11, 1915.—Commenting on Mrs. Dougherty's trouble, Mr. Drum, distributor of Tanlac, said people who suffer from indigestion, as a general rule, suffer from biliousness and constipation.

The stomach, kidney, liver and bowels are the very important organs of the body. If you keep them in order you will probably remain well. When they get out of order you suffer from some form of sickness and the entire system fills up with poison. Tanlac being purely vegetable, acts in a safe and wholesome manner as a result of the natural medicine action of the herbs and roots of which it is composed. Tanlac is not a laxative or purgative like many other medicines, but a powerful reconstructive tonic which builds up the system and tones up the vital organs so as to enable them to perform their proper functions as nature intended. Tanlac is sold in High Point exclusively by the Hart Drug Co.

RETRENCHMENTS IN BASEBALL NOT YET

The Promise of Big Cut in Expenses Has Not Put in Its Appearance.

IT LOOKS OTHERWISE

In Fact, Big Sums Are Being Paid For Players and Managers For This Year.

New York, Feb. 4.—Following the peace agreement between the Federal league and organized baseball it was stated by the big league magnates that baseball salaries and expenses would be revised downward. Players' salaries were to be reduced and their contracts issued from year to year in place of the long term agreements in vogue during the conflict between organized and independent interests.

It was pointed out that the majority of the clubs could not meet expenses under the conditions existing and that it would be necessary to curtail salaries, expenses, training trips and in general to bring to bear a modern business efficiency system in order that professional baseball might be placed on a paying basis again. While it is possible that the magnates may be planning to inaugurate such a system there certainly is no sign of such a movement at the present time.

In the matter of preparing for the 1916 baseball season the magnates both old and new appear to have taken a leaf from the book of the promoters of the proposed Willard-Moran bout and entered the field of frenzied finance. In buying baseball club stock, securing Federal league stars and signing managers the sums spent surpass all previous records and it will require some very clever retrenchments in the months to come if the magnates expect to reach the financial plane outlined only a few months ago.

Five clubs in the National and American leagues alone, have paid more than \$120,000 for the privilege of assuming the top-heavy contracts of ten of the Federal League stars, if credence can be placed in the sale figures announced in the press. In addition to paying large sums for the acquirement of these players, the clubs are legally obligated to continue the salaries agreed on between the former Federal league magnates and their star players and these salaries are known to be extremely high.

The average purchase prices of these ten players is a trifle over \$12,000 and since it is certain that their average yearly salary is at least \$5,000 the initial year's outlay will be about \$175,000, as can be seen from the following list of players and their sale price.

B. Kauff, outfield, New York (National), \$35,000.
W. Bariden, catcher, New York (National), \$10,000.
F. Anderson, pitcher, New York (National), \$10,000.
Lee Magee, outfield, New York (American), \$25,000.
Nick Culllop, pitcher, New York (American), \$12,500.
Joe Gedeon, infield, New York (American), \$5,000.
Erickson, pitcher, Detroit (American), \$5,000.
Thos. Seaton, pitcher, Chicago (National), \$7,500.
Johnston, J., outfield Brooklyn (National), \$5,500.
E. Rousch, outfield, New York (National), \$6,500.

The big money has not been paid exclusively for Federal league stars for retiring baseball magnates have sold their club stock for many times what it cost them a few years ago. The sale of the Chicago Cubs, Boston Braves, St. Louis Browns and the New York Americans, brought close to \$2,000,000, which was more than double what the previous owners paid for these clubs. Now Manager George T. Stallings, of the Boston Nationals has just closed a five-year contract with that club at an annual salary reported to be \$20,000. Just where retrenchment and economy come in is not apparent unless the magnates plan to require the average big league player to pay for the privilege of playing on the team.

Ardent golf and tennis enthusiasts have started a controversy as to which of the two sports is the more beneficial from the standpoint of physical improvement and recreative pleasure. Several years of association with the followers of the court and course games leads to the belief that the controversy will be continued into the third and fourth generations.

Trainer Ernie Hjertberg, of the Swedish Olympic team, has promised the entry of two of his leading Swedish athletic stars for the University of Pennsylvania relay games to be held in Philadelphia, April 28 to 29.

Some "Pig."

E. T. Harmon states that he today killed a 12-month-old pig weighing 476 pounds.

UNIQUE SYSTEM OF CONTROLLING FOOD

A Little German City Completes a Comprehensive System For Handling Food Supplies.

MUNICIPALITY IS GROCER

Stores Are Opened and Goods Are Retail to Consumers At Low Prices.

(Correspondence of Associated Press.)

Berlin, Jan. 28.—The big suburban city of Lichtenberg, a few miles from Berlin, whose population is almost exclusively drawn from the working classes, has, during the past few months, been perfecting a system of municipal ownership of foodstuffs which is perhaps the most comprehensive in Germany.

It has not only taken charge of and control over certain kinds of foods, as other municipalities have done, but it has become salesman as well, has opened municipal stores and markets all over city, has done much to keep prices down within reach of its inhabitants and yet has made enough profit to enable it to keep its stocks replenished.

Where it has been found inadvisable for the city to sell the food itself, it has been distributed through merchants who have been permitted to charge only stipulated prices and to make a profit no larger than the city itself would make.

The city now maintains four stores for the sale of meat, sausage, fats and bacon, four egg stores, and two potato stores. Four more of the latter are to be added in a short time, as soon as the expected increased demand for potatoes comes.

The city has been able to make advantageous contracts with packers for both meat and fats, and of late is selling to about 20,000 families. Whenever a shortage has been felt, such as was the case with fat recently, Lichtenberg has procured substitutes of one kind or another.

It has in its storehouses now enough bacon to last into February, and by that time will have received the 6,000 hogs that have been apportioned to it by military authorities. A contract to slaughter them has already been awarded.

Of late the city has added to its stock by putting in rice, beans, peas and oat flakes by the hundredweight and is selling them at a small margin of profit at its meat stores. Until after Christmas the price of municipal eggs was four cents apiece—as compared with eight to nine cents in other parts of greater Berlin—but now it has advanced to four and a half cents.

The city has just purchased an enormous quantity of potatoes, half of which it has stored away, and the other half of which has been distributed among regular provision dealers to be sold at specified prices. The city has also sold huge amounts of fruit.

In addition to selling outright the things enumerated, Lichtenberg has supplied local merchants with great quantities of noodles, condensed milk, sardines, vegetables and macaroni which it, as a wholesale buyer, has been able to procure advantageously.

WHAT IS BABY WEEK.

Necessary Facts For Observing Baby Week Successfully Are Explained.

Just what "Baby Week" is supposed to be when it is observed from March 7 to 11 this spring is explained more or less fully in a bulletin recently issued by the state board of health. According to the bulletin, the purpose of baby week is primarily educational to give the parents an opportunity of learning the facts with regard to the care of their babies, and to bring home to every one in the community the importance of the babies and the permanent work needed for their welfare.

The bulletin calls attention to two principal points to be remembered in planning a baby week campaign. First, that it is a community campaign and must have the cooperation of all community interests and organizations, especially those interested in any phase of child welfare. Some woman's club is suggested as the proper organization to handle the movement. Second, that a baby week campaign should not be a temporary flurry or excitement, but, on the other hand, efforts for permanent good should be planned and follow up methods adopted wherever practicable.

The bulletin says that every town or community can, if it will, carry out some form of baby week campaign, and that the program adopted should be that best suited to local conditions.

The children's bureau at Washington, D. C., will gladly give suggestions for Baby Weeks of two different types, according to whether a small or large community is embraced.

STATE BANKS FOUND IN GOOD CONDITION BY THE COMMISSION

(By W. T. BOST.)

Raleigh, Feb. 4.—The state banks are found in excellent condition as reflected in the statement from the corporation commission and based upon the report of business done to December 31, 1915.

The banks are 420 in number with 22 branches. Quite a slight increase is noted in the loans and discounts for the year ended. Whereas the banks had out \$60,673,511.31 at the close of 1914, they had loaned \$64,722,050.83, an increase of \$4,048,539.52. The commission does not interpret its figures but they indicate that money is less shy and that the banks are not so skittish as they were in the early months of the war.

The vanishing overdraft reappeared in slightly aggravated form, the 1915 excess being \$14,454.43, over the year 1914. This again indicates the tameness of money. In surplus, undivided profits, unpaid dividends, increased capitalization, cash items, trust deposits, healthful manifestations, the banks are all right. All are gains.

The capital stock paid in at the close of 1914 was \$10,693,709.49. At the close of the 1915 business, the amount due from banks and bankers one month ago was \$13,174,991.84, but 13 months ago it was only \$8,686,440.78. This shows increased business.

\$675 Mogul 8-16 \$675
Kerosene-Burning Tractor

THE light tractor has come to stay. Mogul 8-16, which we think is the best of them all, has more than a year of splendid success behind it. Many thousands are now in everyday use.

On farms where there used to be six, eight, and ten horses, there are now from two to four, just enough to handle the cultivating and other light work. Mogul 8-16 is doing the work of the rest.

There are but two reasons for this. The Mogul is more dependable than horses for heavy farm work. Mogul 8-16 does the heavy work better and cheaper than horses.

Come in and see us, and we will show you why Mogul 8-16 does heavy farm work better and cheaper. We have a sample right here in the store, so that you can see the actual machine, not simply read about it. We are open every day, and it is no trouble, in fact, it is a pleasure, to show you this kerosene-burning Mogul 8-16 tractor that we can sell for \$675 F. O. B. Chicago.
