For five or six years the good people of Santa Rosa, Cal., have nad an unsolved social mystery to there a strange community of peo-Some said the community was communistic only in its commercial relation. One theory was that some of the men and women of the country were not participants in profits and privileges, but were only servants, subject, however, to strict social discipline. One Santa Rosasian seriously informed the reporter that the people of the com-munity lived in three houses; the men participants in one, the women in another and the servants in a third. But of the score of wild and absurd stories, the one most weird had a colony of women over the hills in a deep and secluded canyon who never saw a man. These fortunate_creatures, so the reporter's informant solemnly asserted, had only to express a wish for any of slip of paper the name of any articles they required and left the order on a log in a sequestered half dozen corset-steels, a glove-buttoner, assorted invisible nets, or a sack of patotes, the articles would be found at the identical upon whose operations the women depended was never supposed to remain at the nook long enough to maidens, though it must be confessed-added the informant-that the temptation to do so was very
