WHAT KILLS AMERICANS.

? 19 IBast Living-Reckless Eating-Hard Drinking-Poor Scorping Social Jealousy-Political Ambition-Violent Passions The Race for Money.

The alarming disease of this country is nervous del anty at 1 prostration. It goes und columny names but it is essentially the same complaint. Hospitals and private institutions for nervous patients are crowded. The average of in the United States is increasing avery year Sublett deaths from nervous coulapse among our business, professional and public men are frequent as scarcely to excite remark. The majority of such cides, committed without apparent reason, or under second of "depression of spirits," are really prompted by nervous prostration, which is a fruitful source of insanity and crime with all their grief and horror. These facts are startling. They threaten the very life of

the nation. They assail the springs of its power and prosperity. They wreck manhood strength and woman's usefulness and beauty Every one should know the

What are they ! The CBUSES, answer is easy and terribly plain: Our vicious personal habits: our cardies and lawless eating and drinking; the intense mental and physical strain arising from our mad race after money, position and influence; the fears and struggles of poverty: the use of narcotics and stimulants; our fashion of turning day into night and night into day; and, briefly, our desperate willingness to pay any price for an hour's asure or succesa. So we burn life's caadle at both ends and fill the lunatic asylums

and the graveyards. The disease from which we suffer and die is, in plain English, Nervous Dyspepsia, as it is seated in the Nerves and in the organs of Digestion, Assimilation and Nutrition. Healthy digestion being impeded or desation to tell the sad story.

> Nervous prostration sends out its warnings :- headache
