REV. DR. TALMAGE

The Eminent Brooklyn Divine's Sun-

Subject "One Week's Work."

TEXT: (nd the revenue and the me From Monday morning to Saturday morning to week's work. If we have the gives us a week a wire week. Cosmogony geology astronomy or orthology, ichthyology, fellany, anatony are such wast subjects that no himan life is long enough to explore in imprehentany one of them. But I have thought I might in an unusual way tell you a little of what food did in one week. And whether you make it a weak of lays or a week of ages. I care not, for I shall reach the same practical result of reversive and worship.

The first M in lay misming furth swinging in space the pilet is a limiter of reached metal and soil and water from which the earth was to be builted that make up his mind to create a bullian family and they mind to create a brinan family and they must have a house to inviting his winner.

Not a roof, not a wall, not a design of a room was fit for this test in the weight of the structure of the weight of the extinct value in the series frappropriate for human residences we this globe at that early people. More weighted there was no hu man architect to draw a place

ing. But where are the can lies where are the candelabra, where is the chan isner? No rising sun will roll in the maching for il the sun is already created its light will not yet reach the earth in three days. Nor m nor stars can brighten this darkness. Th moon and stars are not born vet, or if for some time yet. But there is need of un-

mediate light. Where shall it come from The record makes me think that, stan ling over this earth that spring morning (i) looked upon the darkness that palled the heights of this world, and the chasms of and the awful reaches of it, and uttered, whether in the Helrew of earth or some language colestial I know not, that word which stands for the subtle, bright, glowing and all pervading fluid, that word which thritis and garlands and lifts every thing it touches, that word the full meaning of which all the chemists of the ages have bused ninesy thousand miles in a second, and by undulations seven hundred and twenty seven trillions in a second, that one word that bod

atters - Light'
And instantly the darkness began to sillinmer, and the thick folds of blackness to lift, and there were scintillations and coruscanorthward, southward, eastward, westward. and a radiance filled the atmosphere until it could hold no more of the brilliance. Light now to work by while supernatural intell the first day of the week Light, the toy of that ever touched the human eve. The robe of the Aimighty is woven out of it, for He covers Himself with light as with a gament. Ob, blessed light I am sog ad this

Now it is Tuesday morning. A delicate s witnesses. Two (hillian deserters were also and tremendous undertaking is set a part for this day. There was a great superabun-dance of water. God, by the wave of His hand, this morning gathers part of it in suspended reservoirs, and part of it He orders as you would lift a glass of water. There He been snowing in heaven. And the corrostratus clouds in long parallel lines, so straight you know an infinite geometer has drawn them. Clouds which are the armory from which thunder storms get their bayonels of fire. Clouds which are oceans on

the wing. No wonder, long after this first Tuesday of creation week, Ellihu confounded Job with the question, "Dost thou know the balancing of the clouds?" Half of this Tuesday work done, the other half is the work of compelling the waters to lie down in their destined places. So God picks up the solid ground and packs it up infive elevations, which are the continenta. With his finger he makes deep depressions in them, and these are the lakes, a Republican while at the piling up of the Alleghanies and Sierra Nevadas and Pyrenees and Alps and Himalayas the rest of the waters start by the law of gravitation to the lower places, and in their run down hill become the rivers, and then all around the earth these rivers come into convention and become

above. world's first week. Gardening and horticul-ture will be born to-day. How queer the hills look, and so unattractive they seem bardly worth having been made. But now all the surfaces are changing color. Someand goes higher up, higher and higher, and spreads out broad leaves. It is a paint tree, Yonder is another growth, and its leaves bang far down, and it is a willow tree. And roader is a growth with a mighty sweep of ranches. And here they come- the pear and the apple, and the peach, and the pomegranate, and groves, and orcharis, and forests, their shadows and the r fruit girding

first west. Nothing will be created to-day. The hours will be passed in scattering fogs and musts and wapper. The atmosphers must be swept clean. Other worlds are to heave in sight. This little ship of the earth has seemed to have all the ocean of immensity to itself. But mightier craft are to be bailed to-day on the high seas of space. First, the moon's white sail appears and doss vary well until the sun bursts upon the scene. The light that ou the previous three mornings was struck from an especial word mow gathers in the sun moon and sixra. One for the day, the other for the night. And the sun now appears, afterward to be found eight hundred and eighty-eight thou sand miles in diameter, and, put in astro-no-mical scales, to be found to weigh nearly four hundred thousand times heavier than our earth, a mighty furnace, its heat kept un by meteors ponning into it as fuel, a world evouring other worlds with its jame of flame. And the stars of month than the of american its will be erected to manufacture lamps of heaven, these keys of pairle unait the powder for the Construment. which God's fingers play the music of the

spheres. How bright they look in this or:ental evening' Constellations' Galaxies solar, lunar, stellar appearance? All this Thursday and the adjoining nights employed in pulling aside the curtain of va these fluebed or pale-faced worlds. Now it is Friday morning in the first was: of the woold's history. They had struck and are then broken up into fragments—the whispering gallery and there was

A lieip in Hearing.

I telephoned to a friend the other day od after he learned who wanted him he I wanted, and then me said. -Wed, go alway!

I said what I had to say, and then asked why he had told me to wait, and ne replied -"I wanted to put on my glasses." I hughed, and asked him what his glasses had to do with the telephone.

He said -My hearing is perfect, but my sight or. You know I always wear glasses when reading or writing New I find that I can hear better over the wire if I have my glasses on. It may seem strange, but it is true. Theatre goers have perhaps noticed that opera glasses are a help in hear-

The Cotton-Seed Cure,

A Fiorida writer describes the following remarkable cure for consumption. which may be of interest to many:-"A medical friend sent a young man o me with a note, requesting me to employ him in my mill and, as a last resort, feed him on cotton-seed oil. The Corn for ensilage should have just as noy appeared to me to be far gone with much evre in planting and cultivating as throat and lung disease. I didn't think he would live six months. I gave him light work, and told him to eat all the will pay to continue feeding some hay oil he wanted. In the course of a few weeks I noticed a great change. His cough had left, and he gained strength enough to do heavier work. He had increased in weight, so that he began to fill out clothes which had hung on him ike a pole when he came first. He scorked with me all that season and was to all appearances well. For over The variety is important, but the best eight months he are nothing but cot-

In Kings' Palaces.

It is well known that a visitor when about to enter a Japanese house must lower of Mahomet does the same upon entering his sacred places. It seems also that the visitor to the Old Schloss it pays to roll the oats. This may be (palace) at Berlin is required to make a

"As we entered the palace," writes a friend, "we were detained in one of the corridors, and all obliged to put on seft. thick, gray felt slippers, in which we noiselessly passed over the polished floors, leaving no mark upon the shining surface. These slippers consist merely of a toe and sole, with no heel. We were each obliged to step up in turn before the guard, who dropped them before us, and then skate off over the slippery floors as best we could."

No attention is paid to the fit, of course. Each must take them as they

"Mine," says my friend, were tremendous. I believe they would have been too large for the biggest ntan I ever saw; so you may imagine that I had to slide along cuttionsly lest I should lose them off. The occasional glimpses of ourselves that we had in the mirrors were very ridiculous -- stan '

ing in these great canal boats!" The Lady Boers of Afrix.

The ladies are handsome, tall, and of good figure; inclined, however, toward corpulency at middle age. Blue eyes and light hair predominate. Feet and Sick Headache, Malaria, Costiveness, Heart hand are large. A young man going to a store and asking for a pair of number nine shoes, gent's size, for his sister to be maaried in, is not an uncommon in cident. The ladies dress in a fantistic style. A Boer voung lady considers a dress of five or si; colors, a headgear ly rainy weather it is better to use the in which are blended the most startling contrasts-green, yellow, red, brown, over the face to serve as a veil, de riqu vr. The climate being always moderate, they dress in light garments, and seldom wear stockings and bustles, and tight lacing is something as yet unknown and unheard of. A Boer young adv is a flirt. Many are the simple blandishments she uses to bring her beau to her feet. A very slight marked attention on his part may be construed J. F. SMITH & CO., NEW YORK CITY into something far more serious than he intended, and the unlucky swain

A Railroad on Tree Tops. ---It may not be known outside of the neighborhood in which it is situated. but it is nevertheless a fact that in Sonoma county. Uniformit, there exists an original and successful piece of railroad engineering and building that is not to be found in the bests. In the upper part of the course named, mear the coast, may be seen an actual railroad bed on tree to; s. Between the Clipper Mills and Stuart Foint, where the road crosses a deep ravine, the trees are sawed off on a level with the surrounding hills and the timbers and ties laid n the stumps - In the centre of the raving mentioned two huge redword trees, standing side by side, form a substantial support. These giants have been lopped off seventy-five feet above the bed of the creek. This natural to e bridge is considered one of the wonders of the Golden State and for safety and security far exceeds a bridge framed in the most scientific manner.

Dyspepsia is one of the most common

Makes the Weak Strong

The way in whi is Elect's Carsaparilla builts up people in run down or weakened state of health conclusively proves the claim that this medicine "makes the weak strong." It does not act like a stimulant, finnarting fietitions strength from which than before, but in the most natural way Hord Sarsaparilla overcomes that thred feeling creates a appetite, purifies the blood and, in short golden area
