Fatal -:- Food Bugs and Cockroaches. Emphatically new and desirable discovery in every particular. Entirely unlike all other Insect Pow-

while all other insect powders partially

suffocates them, driving them wildly to other rooms and other houses to live or and multiply. No. a poison. A child may taste or at this food with impunity, hence there s no danger in having it about, as with Large and Roomy ther poisonous powders. No extra apliance required for distributing this food ts own case is its own best distributor ourposely constructed to do it perfectly nd easily. As the bugs go to the food ou are not compelled to carefully bel ows it into every crooked cell and mear each individual bug, as with the did insect powders. One package of this Facilities for handling GROCERIES, ood, tolerably well distributed, will er sure entire freedom from the nasty bugs, arge and small, as there is always enough

omers for years to come. Dumpness does not destroy its efficiency. The above facts being guaranteed, what by veuse is there for any Dwelling Restaur. ant, Hotel or Ship being intested with he vile bugs. All that use this, make o comparison with other powders. Save The natural place for bugs is in the
