THE JOURNAL

THE ELECTIONS. The election is just over in Arkansas. On a very tight vote the Democrats have a majority of 30,000.

The Populists boasted very loudly before the election, and now they are puzzled to know what to do with their majority.

Men want everything besides a calamity howl to build a party on Populist orators go about exaggerating present evils and predicting worse if the Democracy is not overthrown, but they have nothing to offer in its stead.

It really looks as if Democracy is invincible before the people. In Alabama every opposing political element combined against the Democrats, but the untamed Democracy moved right on, while the cyclone that struck the opposing hosts left them the most confused and mangled people the sun ever shone on.

There was hardly a man whose neighbor recognized him, and Kolb is reported to have been so changed and used up his yard dog had to be chained before "the Governor" could get in his house.

In Arkansas all the parties had tickets in the field. Three horses were on the track, and "Old Democrat" had his bridle off and was grazing in the pasture when "Republican" came on the home stretch and said "Populist" was coming. There is no use trying to beat "Democrat". All that is necessary for him to win the race is to put up a good rider and hold him to the track.

With good candidates who stand flat-footed on the platform, the Democracy is invincible. THE SENATORIAL CONVENTION. The Convention of this Senatorial district will meet at Kingston on next Tuesday, Sept. 11, for the purpose of nominating two candidates for the State Senate.

No more important Convention has yet assembled. The State Convention did well, and the Congressional and Judicial Conventions discharged the duties entrusted to them faithfully and nominated candidates worthy of all acceptance, but the convention that is about to meet is to nominate candidates for the upper house of the State Legislature at a time when issues will be before that body involving the highest interests of the people. The Republicans, in their platform, adopted in State Convention a few days ago, declare, among other hurtful things, their opposition to the present system of county government. Their language is as follows: "We favor the repeal of the present system of county government and the enactment of such law as will guarantee the right of local self-government in every county in the State."

Nothing could be more disastrous to our people in Eastern North Carolina than the repeal of the present system of county government. Not only would improvements that are now going on be abandoned, but our civilization would give place to a barbarism that would rather all that is beautiful and promising in this fair land.

We know that it will be said that the Republican party is not in the field, but will lend their aid to the Peoples Party in this campaign. Nonsense! Wherever there is a coalition the stronger element is the ruling power. Republicans are more numerous than Populists in this senatorial district and they will direct the movements of the combined forces. Never has the tail been able to wag the dog and it never will be. If the Democrats are defeated in this district the senators who are elected will give their votes and their influence to the repeal of the present system of county government.

The Convention must nominate our strongest men. The Hon. Swift Galloway, of Green County, mentioned as one of the candidates to be nominated by the Kingston Convention. There are few, if any, better men than Swift Galloway. He has a big body, a big brain and a big heart, and he can hold the party in line, and no doubt bring many a wonderer to the fold again. Who his associate will be, if indeed the gallant Captain is to be one of our nominees, has not been much discussed. Mr. George Dudley, of Craven, has been mentioned in this connection, but we do not know that he is a candidate for the nomination.

It is clear to us that it would be unwise for the Kingston Convention to express any opinion as to the comparative merits of Democrats who will be before the Legislature as candidates for election to the highest importance that our constituencies are entrusted in the race. To commit them to any particular candidate would handicap them and make doubtful their election. We have no votes to spare in this district, and our candidates must be in condition to command the support of every Democratic voter in the district.

Let us first secure the Legislature, and then we can more properly talk about the United States Senate.

An instructed caucus of Democrats in the United States Senate, but to instruct the Democrats to vote for United States Senators in the present condition of affairs would greatly endear God to them. There are too many men of ability in North Carolina for any candidate for the Legislature to be instructed by his party to vote for any particular man. The man we prefer for United States Senator may not be in the race when the time comes, and the one whom we now oppose most bitterly may be the only man who can defeat the candidate of the opposite party.

HUNDREDS OF BODIES. 72 Settlers Annihilated by Fire—Not a House Left in an Area 15 x 26 Miles. WEST SUPERIOR, Wis., Sept. 4.—Nearly all those who survived the terrible forest fires in Northern Minnesota have now been removed to places of safety Superior and Duluth, and, as a heavy rain has quenched the flames, there will be no further casualties. The work of burying the dead is progressing in earnest.

Yesterday afternoon fifty-four bodies were buried at Sandstone, most of them charred beyond recognition, and were buried elsewhere. When the relief train reached Sandstone not a sign of a building was left in the town. Around or in the ruins of each house were found several human bodies. The living inhabitants of the town were brought into Superior at midnight.

A Hinckley 328 bodies were lying in the streets. They are being buried as rapidly as possible by a committee from Pine City. At Kokosagam, on the St. Cloud division of the Great Northern, there are twenty eight corpses. They are still lying unburied, the rest of the people having left the place.

At Partridge only two are dead, though not a building was standing. It is impossible to tell where Partridge was, as the whole surrounding country is in ashes. Passenger traffic was resumed on the St. Paul and Duluth road today, but the Great Northern through train will not be running for some time.

DELUTH, Minn., Sept. 4.—In a stretch of territory twenty-six miles long, and from one to fifteen miles wide, not a single human habitation has been left standing, except a section house at Miller, and in every part of the track of the flames bodies of men, women, children, horses and cattle were found.

The position of everybody found outside of Hinckley shows that shelter of some kind was sought by the agonized sufferers, and the dead are found in holes, behind overturned stumps, trees, marshy depressions and in every water course.

The work of the flames has been complete and cyclonic in character. Where the fire held sway, not a blackened stump, thousands of overturned trees, and the roots were burning fiercely up to last evening when the welcome rain fell.

A careful canvass reveals the fact that several hundred homes, outside of the towns left, as near as can be learned there were 500 people in these homes. At Brookdale, a little town on the East ern Minnesota railroad, south of Hinckley, about ninety persons took refuge in the water of a small creek. Out of this place sixty-seven dead bodies were taken and buried, and some thirty living persons were rescued, some badly burned.

Conductor James Sargeant, of the St. Paul and Duluth road, has been working for the railroad with an improvised train, consisting of three hand cars spliced together with planks, picking up and identifying the bodies of the dead, and the bodies were carefully examined and in many cases were fully identified and in every case a complete record was made of everything that could possibly lead to identification.

By Duluth relief committees most remarkable work has been done. Without regard to age, sex or social standing hundreds of people, including those of the very highest social standing in the city, have been working day and night since Saturday night, have organized thoroughly into an needed sub-committees, and have in a systematic way taken care of men and women, children and babies. Several committees have been caring for the little ones. Over \$8,000 in cash has been given for temporary relief and goods and clothing valued at as much more have been given.

The Pharmaceutical Association, ASHEVILLE, N. C., Sept. 3.—The forty-second annual session of the American Pharmaceutical Association opened here this morning with a council meeting at 10 o'clock. This afternoon an address of welcome extending the freedom of the city, was delivered by Mayor Patch, and responded to by Vice President Loo Blera.

President Patch, of Boston, delivered his annual address, and the remainder of the session was taken up with routine business. Meetings were held at Battery Park hotel, the headquarters for delegates. To-night a reception was tendered the visitors by citizens at the hotel.

Burglary and Attempted Murder at Asheboro. HIGH POINT, S. C., Sept. 4.—A he-tero had a first-class robbery last night. At 8:30 p. m. two or three persons entered the residence of Col. McAlister and took from the drawer of Dr. J. J. Worth \$500 in cash, \$15,000 in bonds, and other valuable papers. All the family, except Mr. Worth and Col. McAlister, were at church. It was no doubt the intention of the thieves to kill Dr. Worth, as one shot was fired at him. It is thought the guilty parties have been found.

We recommend Johnson's Magnetic Oil for rheumatism, neuralgia, sprains, bruises, lame back, it quickly relieves pain. 25 and 50 cts.

GREATLY FAVORABLE. Senator Jones, of Nevada, announces His Withdrawal from the Republican Party.

WASHINGTON, Sept. 4.—The Evening Star today says: Today there is a genuine sensation in political circles by the statement that Senator John P. Jones, of Nevada, who has represented his State in the United States Senate for over twenty years as a Republican, has formally renounced his allegiance to that party and cast his lot with the Democrats.

He has written a letter to his constituency which will be published in Nevada tomorrow, and will be the first intimation to the people of that State that he has defied the political garment which he has worn with such distinction for so many years, and will don the garb of the Third. His intentions have been kept secret from all but his most intimate associates. It is understood that his change of policy is based almost entirely upon the question of silver. He has long been a champion of the gold standard, and his long makes the Nevada Congressional delegation solidly Populist.

Senator Stewart having left the Republican party some time ago, and Representatives Newalls having been elected as a Silverite.

STRIKERS VICTORIOUS. The Coal Makers Return to Work on Greatly Increased Wages.

NEW YORK, Sept. 6.—The big strike of the coal makers was practically settled last evening. The fight was short and hard. It was directed squarely against the sweating system, and the workers gained the day. This morning 7,000 of the 12,000 who have returned to work since Sunday morning, went back to work on their own terms. The other 5,000 will probably be employed by the first of next week, though there are many details yet to be settled.

This victory is a notable one for the workers, as it means the overthrow of the sweating system, as general practice in the clothing trade of this city.

AN ADVERTISEMENT IN POLITICS. The Democrats Will Make Use of Mr. Wanamaker's Announcement.

WASHINGTON, Sept. 4.—The Democratic Congressional campaign committee proposes to use as campaign material an advertisement of John Wanamaker, ex-Postmaster General, in which he advocates the repeal of the new tariff on domestic goods, and will be obliged to sell his wares much cheaper than under the McKinley law.

NOTES AT RANDOM. The diamond, if laid in the sun and then carried into a dark room, shows distinct phosphorescence.

The family of Pope Leo is singularly long-lived. With one exception, all his immediate relatives have lived to be over ninety.

A novel way of stirring up business is adopted by a shoemaker in Lynn, Mass. Every eligible pair of shoes left at his shop he repairs free of cost.

St. Louis dispatches announce that a St. Louis woman was put under the influence of an opiate in Chicago and sent to the metropolis of Missouri. That's the only way you can get anybody to leave Chicago for St. Louis, boasts the Chicago News.

Since the death of Henry Ward Beecher, the clergyman who preaches to the largest congregation in this country is Rev. Russell H. Conwell, of New York. He addresses 8,000 people every Sunday, and he has established a college where 120 students are taking a regular course, and 7,500 others attend evening classes in various subjects.

Authentic documents show that at the time of his death, a few weeks ago, Petro Erillo, of Guanajuato, Mex., was one hundred and thirty-three years of age. He leaves over four hundred living descendants, and among them a son eighty-five years old, who recently broke his arm while trying to ride a bicycle.

The Khedive of Egypt, like the Chinese Emperor, takes more stock in his mother's advice than in that of any other of his counselors, and, fortunately for him, she is one of the bravest as well as one of the most beautiful women in the land of Sphinx. Though he may be a heathen he sets the boys a mighty good example by taking his mother's advice.

Nothing is Wasted in Paris. Even the smallest scrap of paper, that which every one throws away, here becomes a source of profit. Old provision tins, for instance, are full of money; the lead soldering is removed and melted down into cake, while the tin is used to make children's toys. Old boots, however bad, always contain in the arch of the foot at least one sound piece which is again, and generally there are two or three others in the sole, the heel, and at the back. Scraps of paper go to the cardboard factory, orange peel to the marmalade maker, and so on. The ideas suggested are no always agreeable, and to see a rag-picker fishing orange peel out of the basket is enough to make one forewarned of the fact that there is worse than that. The most valuable refuse—that which fetches two francs the kilo—is hair. The 1902 goes to the hair dresser, while the short is used, among other things, for clarifying oil.

If all the good points of men. All earthly things that men call wealth. We're mine, with every tick and tock. I'd give them all prizes for nothing.

This is enough, were a jelly teacher to a neighborhood, to get a pile of gold, and a pile of silver, and a pile of copper, and a pile of iron, and a pile of tin, and a pile of lead, and a pile of zinc, and a pile of nickel, and a pile of cobalt, and a pile of manganese, and a pile of phosphorus, and a pile of sulfur, and a pile of chlorine, and a pile of bromine, and a pile of iodine, and a pile of fluorine, and a pile of oxygen, and a pile of hydrogen, and a pile of nitrogen, and a pile of carbon, and a pile of silicon, and a pile of boron, and a pile of aluminum, and a pile of magnesium, and a pile of calcium, and a pile of strontium, and a pile of barium, and a pile of lanthanum, and a pile of cerium, and a pile of praseodymium, and a pile of neodymium, and a pile of promethium, and a pile of samarium, and a pile of europium, and a pile of gadolinium, and a pile of terbium, and a pile of dysprosium, and a pile of holmium, and a pile of erbium, and a pile of thulium, and a pile of ytterbium, and a pile of lutetium, and a pile of hafnium, and a pile of tantalum, and a pile of tungsten, and a pile of rhenium, and a pile of osmium, and a pile of iridium, and a pile of platinum, and a pile of gold, and a pile of silver, and a pile of copper, and a pile of nickel, and a pile of cobalt, and a pile of iron, and a pile of manganese, and a pile of chromium, and a pile of vanadium, and a pile of niobium, and a pile of molybdenum, and a pile of technetium, and a pile of ruthenium, and a pile of rhodium, and a pile of palladium, and a pile of arsenic, and a pile of selenium, and a pile of bromine, and a pile of krypton, and a pile of xenon, and a pile of caesium, and a pile of barium, and a pile of lanthanum, and a pile of cerium, and a pile of praseodymium, and a pile of neodymium, and a pile of promethium, and a pile of samarium, and a pile of europium, and a pile of gadolinium, and a pile of terbium, and a pile of dysprosium, and a pile of holmium, and a pile of erbium, and a pile of thulium, and a pile of ytterbium, and a pile of lutetium, and a pile of hafnium, and a pile of tantalum, and a pile of tungsten, and a pile of rhenium, and a pile of osmium, and a pile of iridium, and a pile of platinum, and a pile of gold, and a pile of silver, and a pile of copper, and a pile of nickel, and a pile of cobalt, and a pile of iron, and a pile of manganese, and a pile of chromium, and a pile of vanadium, and a pile of niobium, and a pile of molybdenum, and a pile of technetium, and a pile of ruthenium, and a pile of rhodium, and a and a pile of tungsten, and a pile of rhenium, and a pile of osmium, and a pile of iridium, and a pile of platinum, and a pile of gold, and a pile of silver, and a pile of copper, and a pile of nickel, and a pile of cobalt, and a pile of iron, and a pile of manganese, and a pile of chromium, and a pile of vanadium, and a pile of niobium, and a pile of molybdenum, and a pile of technetium, and a pile of ruthenium, and a pile of rhodium, and a pile of palladium, and a pile of arsenic, and a pile of selenium, and a pile of bromine, and a pile of krypton, and a pile of xenon, and a pile of caesium, and a pile of barium, and a pile of lanthanum, and a pile of cerium, and a pile of praseodymium, and a pile of neodymium, and a pile of promethium, and a pile of samarium, and a pile of europium, and a pile of gadolinium, and a pile of terbium, and a pile of dysprosium, and a pile of holmium, and a pile of erbium, and a pile of thulium, and a pile of ytterbium, and a pile of lutetium, and a pile of hafnium, and a pile of tantalum, and a pile of tungsten, and a pile of rhenium, and a pile of osmium, and a pile of iridium, and a pile of platinum, and a pile of gold, and a pile of silver, and a pile of copper, and a pile of nickel, and a pile of cobalt, and a pile of iron, and a pile of manganese, and a pile of chromium, and a pile of vanadium, and a pile of niobium, and a pile of molybdenum, and a pile of technetium, and a pile of ruthenium, and a pile of rhodium, and a pile of palladium, and a pile of arsenic, and a pile of selenium, and a pile of bromine, and a pile of krypton, and a pile of xenon, and a pile of caesium, and a pile of barium, and a pile of lanthanum, and a pile of cerium, and a pile of praseodymium, and a pile of neodymium, and a pile of promethium, and a pile of samarium, and a pile of europium, and a pile of gadolinium, and a pile of terbium, and a pile of dysprosium, and a pile of holmium, and a pile of erbium, and a pile of thulium, and a pile of ytterbium, and a pile of lutetium, and a pile of hafnium, and a pile of tantalum, and a pile of tungsten, and a pile of rhenium, and a pile of osmium, and a pile of iridium, and a pile of platinum, and a pile of gold, and a pile of silver, and a pile of copper, and a pile of nickel, and a pile of cobalt, and a pile of iron, and a pile of manganese, and a pile of chromium, and a pile of vanadium, and a pile of niobium, and a pile of molybdenum, and a pile of technetium, and a pile of ruthenium, and a pile of rhodium, and a pile of palladium, and a pile of arsenic, and a pile of selenium, and a pile of bromine, and a pile of krypton, and a pile of xenon, and a pile of caesium, and a pile of barium, and a pile of lanthanum, and a pile of cerium, and a pile of praseodymium, and a pile of neodymium, and a pile of promethium, and a pile of samarium, and a pile of europium, and a pile of gadolinium, and a pile of terbium, and a pile of dysprosium, and a pile of holmium, and a pile of erbium, and a pile of thulium, and a pile of ytterbium, and a pile of lutetium, and a pile of hafnium, and a pile of tantalum, and a pile of tungsten, and a pile of rhenium, and a pile of osmium, and a pile of iridium, and a pile of platinum, and a pile of gold, and a pile of silver, and a pile of copper, and a pile of nickel, and a pile of cobalt, and a pile of iron, and a pile of manganese, and a pile of chromium, and a pile of vanadium, and a pile of niobium, and a pile of molybdenum, and a pile of technetium, and a pile of ruthenium, and a pile of rhodium, and a pile of palladium, and a pile of arsenic, and a pile of selenium, and a pile of bromine, and a pile of krypton, and a pile of xenon, and a pile of caesium, and a pile of barium, and a pile of lanthanum, and a pile of cerium, and a pile of praseodymium, and a pile of neodymium, and a pile of promethium, and a pile of samarium, and a pile of europium, and a pile of gadolinium, and a pile of terbium, and a pile of dysprosium, and a pile of holmium, and a pile of erbium, and a pile of thulium, and a pile of ytterbium, and a pile of lutetium, and a pile of hafnium, and a pile of tantalum, and a pile of tungsten, and a pile of rhenium, and a pile of osmium, and a pile of iridium, and a pile of platinum, and a pile of gold, and a pile of silver, and a pile of copper, and a pile of nickel, and a pile of cobalt, and a pile of iron, and a pile of manganese, and a pile of chromium, and a pile of vanadium, and a pile of niobium, and a pile of molybdenum, and a pile of technetium, and a pile of ruthenium, and a pile of rhodium, and a pile of palladium, and a pile of arsenic, and a pile of selenium, and a pile of bromine, and a pile of krypton, and a pile of xenon, and a pile of caesium, and a pile of barium, and a pile of lanthanum, and a pile of cerium, and a pile of praseodymium, and a pile of neodymium, and a pile of promethium, and a pile of samarium, and a pile of europium, and a pile of gadolinium, and a pile of terbium, and a pile of dysprosium, and a pile of holmium, and a pile of erbium, and a pile of thulium, and a pile of ytterbium, and a pile of lutetium, and a pile of hafnium, and a pile of tantalum, and a pile of tungsten, and a pile of rhenium, and a pile of osmium, and a pile of iridium, and a pile of platinum, and a pile of gold, and a pile of silver, and a pile of copper, and a pile of nickel, and a pile of cobalt, and a pile of iron, and a pile of manganese, and a pile of chromium, and a pile of vanadium, and a pile of niobium, and a pile of molybdenum, and a pile of technetium, and a pile of ruthenium, and a pile of rhodium, and a pile of palladium, and a pile of arsenic, and a pile of selenium, and a pile of bromine, and a pile of krypton, and a pile of xenon, and a pile of caesium, and a pile of barium, and a pile of lanthanum, and a pile of cerium, and a pile of praseodymium, and a pile of neodymium, and a pile of promethium, and a pile of samarium, and a pile of europium, and a pile of gadolinium, and a pile of terbium, and a pile of dysprosium, and a pile of holmium, and a pile of erbium, and a pile of thulium, and a pile of ytterbium, and a pile of lutetium, and a pile of hafnium, and a pile of tantalum, and a pile of tungsten, and a pile of rhenium, and a pile of osmium, and a pile of iridium, and a pile of platinum, and a pile of gold, and a pile of silver, and a pile of copper, and a pile of nickel, and a pile of cobalt, and a pile of iron, and a pile of manganese, and a pile of chromium, and a pile of vanadium, and a pile of niobium, and a pile of molybdenum, and a pile of technetium, and a pile of ruthenium, and a pile of rhodium, and a pile of palladium, and a pile of arsenic, and a pile of selenium, and a pile of bromine, and a pile of krypton, and a pile of xenon, and a pile of caesium, and a pile of barium, and a pile of lanthanum, and a pile of cerium, and a pile of praseodymium, and a pile of neodymium, and a pile of promethium, and a pile of samarium, and a pile of europium, and a pile of gadolinium, and a pile of terbium, and a pile of dysprosium, and a pile of holmium, and a pile of erbium, and a pile of thulium, and a pile of ytterbium, and a pile of lutetium, and a pile of hafnium, and a pile of tantalum, and a pile of tungsten, and a pile of rhenium, and a pile of osmium, and a pile of iridium, and a pile of platinum, and a pile of gold, and a pile of silver, and a pile of copper, and a pile of nickel, and a pile of cobalt, and a pile of iron, and a pile of manganese, and a pile of chromium, and a pile of vanadium, and a pile of niobium, and a pile of molybdenum, and a pile of technetium, and a pile of ruthenium, and a pile of rhodium, and a pile of palladium, and a pile of arsenic, and a pile of selenium, and a pile of bromine, and a pile of krypton, and a pile of xenon, and a pile of caesium, and a pile of barium, and a pile of lanthanum, and a pile of cerium, and a pile of praseodymium, and a pile of neodymium, and a pile of promethium, and a pile of samarium, and a pile of europium, and a pile of gadolinium, and a pile of terbium, and a pile of dysprosium, and a pile of holmium, and a pile of erbium, and a pile of thulium, and a pile of ytterbium, and a pile of lutetium, and a pile of hafnium, and a pile of tantalum, and a pile of tungsten, and a pile of rhenium, and a pile of osmium, and a pile of iridium, and a pile of platinum, and a pile of gold, and a pile of silver, and a pile of copper, and a pile of nickel, and a pile of cobalt, and a pile of iron, and a pile of manganese, and a pile of chromium, and a pile of vanadium, and a pile of niobium, and a pile of molybdenum, and a pile of technetium, and a pile of ruthenium, and a pile of rhodium, and a pile of palladium, and a pile of arsenic, and a pile of selenium, and a pile of bromine, and a pile of krypton, and a pile of xenon, and a pile of caesium, and a pile of barium, and a pile of lanthanum, and a pile of cerium, and a pile of praseodymium, and a pile of neodymium, and a pile of promethium, and a pile of samarium, and a pile of europium, and a pile of gadolinium, and a pile of terbium, and a pile of dysprosium, and a pile of holmium, and a pile of erbium, and a pile of thulium, and a pile of ytterbium, and a pile of lutetium, and a pile of hafnium, and a pile of tantalum, and a pile of tungsten, and a pile of rhenium, and a pile of osmium, and a pile of iridium, and a pile of platinum, and a pile of gold, and a pile of silver, and a pile of copper, and a pile of nickel, and a pile of cobalt, and a pile of iron, and a pile of manganese, and a pile of chromium, and a pile of vanadium, and a pile of niobium, and a pile of molybdenum, and a pile of technetium, and a pile of ruthenium, and a pile of rhodium, and a pile of palladium, and a pile of arsenic, and a pile of selenium, and a pile of bromine, and a pile of krypton, and a pile of xenon, and a pile of caesium, and a pile of barium, and a pile of lanthanum, and a pile of cerium, and a pile of praseodymium, and a pile of neodymium, and a pile of promethium, and a pile of samarium, and a pile of europium, and a pile of gadolinium, and a pile of terbium, and a pile of dysprosium, and a pile of holmium, and a pile of erbium, and a pile of thulium, and a pile of ytterbium, and a pile of lutetium, and a pile of hafnium, and a pile of tantalum, and a pile of tungsten, and a pile of rhenium, and a pile of osmium, and a pile of iridium, and a pile of platinum, and a pile of gold, and a pile of silver, and a pile of copper, and a pile of nickel, and a pile of cobalt, and a pile of iron, and a pile of manganese, and a pile of chromium, and a pile of vanadium, and a pile of niobium, and a pile of molybdenum, and a pile of technetium, and a pile of ruthenium, and a pile of rhodium, and a pile of palladium, and a pile of arsenic, and a pile of selenium, and a pile of bromine, and a pile of krypton, and a pile of xenon, and a pile of caesium, and a pile of barium, and a pile of lanthanum, and a pile of cerium, and a pile of praseodymium, and a pile of neodymium, and a pile of promethium, and a pile of samarium, and a pile of europium, and a pile of gadolinium, and a pile of terbium, and a pile of dysprosium, and a pile of holmium, and a pile of erbium, and a pile of thulium, and a pile of ytterbium, and a pile of lutetium, and a pile of hafnium, and a pile of tantalum, and a pile of tungsten, and a pile of rhenium, and a pile of osmium, and a pile of iridium, and a pile of platinum, and a pile of gold, and a pile of silver, and a pile of copper, and a pile of nickel, and a pile of cobalt, and a pile of iron, and a pile of manganese, and a pile of chromium, and a pile of vanadium, and a pile of niobium, and a pile of molybdenum, and a pile of technetium, and a pile of ruthenium, and a pile of rhodium, and a pile of palladium, and a pile of arsenic, and a pile of selenium, and a pile of bromine, and a pile of krypton, and a pile of xenon, and a pile of caesium, and a pile of barium, and a pile of lanthanum, and a pile of cerium, and a pile of praseodymium, and a pile of neodymium, and a pile of promethium, and a pile of samarium, and a pile of europium, and a pile of gadolinium, and a pile of terbium, and a pile of dysprosium, and a pile of holmium, and a pile of erbium, and a pile of thulium, and a pile of ytterbium, and a pile of lutetium, and a pile of hafnium, and a pile of tantalum, and a pile of tungsten, and a pile of rhenium, and a pile of osmium, and a pile of iridium, and a pile of platinum, and a pile of gold, and a pile of silver, and a pile of copper, and a pile of nickel, and a pile of cobalt, and a pile of iron, and a pile of manganese, and a pile of chromium, and a pile of vanadium, and a pile of niobium, and a pile of molybdenum, and a pile of technetium,
