

"Disfigured For Life"

The shrieking cry of thousands of disfigured men is a warning to you. Do you realize what this disfigurement means to sensitive souls? It means isolation, seclusion. It bars to social and business success. Do you wonder that despair seizes upon these sufferers when doctors fail, standard remedies fail, and nostrums prove worse than useless?

Skin diseases are most obstinate to cure or even relieve. It is an easy matter to claim to cure them, but quite another thing to do so.

CUTICURA REMEDIES Have earned the right to be called 1. Skin Specifics, 2. Because for years they have met with most remarkable success. There are cases that they cannot cure, but they are few indeed. It is no long-drawn-out, expensive experiment. We invested in a cake of CUTICURA SOAP. Will prove more convincing than a page of advertisement.

CUTICURA works wonders, and its cures are simply marvellous.

Send throughout the world. Price, CUTICURA, 25c. CUTICURA SOAP, 50c. CUTICURA OINTMENT, 25c. CUTICURA Lotion, 25c. CUTICURA Cream, 25c. CUTICURA Powder, 25c. CUTICURA Tablets, 25c. REBELS USED DYNAMITE

Wrecked Train Carrying Two Hundred Spaniards and Ammunition.

Terrified Troops Surrender Without Resistance—Insurgent Chief Operating in Yucatan.

Kry West, Fla., Nov. 28.—Advices from Cuba via the steamship Olivette state that near Cienfuegos on November 25 the insurgents, commanded by Leoncio Vidal, wrecked a train carrying 200 Spanish soldiers and a quantity of arms and ammunition. The insurgents tracked a dynamite bomb on the track and it exploded with terrific force.

The locomotive and the car next to it were torn to kindling wood and the other coaches derailed.

The engineer, firemen and thirteen soldiers who were in the coach were killed by the explosion. Eighteen soldiers were also killed when the rear coaches were derailed as they went down a high embankment.

About fifty soldiers were wounded some of them mortally. The soldiers who were injured were so horrified that they surrendered to the insurgents without resistance. The arms and ammunition captured were valued at many thousands of dollars.

Perico Del Gados, the insurgent chief reported killed near Banes, is alive and operating in the Yucatan. He has a list of eight hundred men. In the engagement at Banes, with three hundred Spanish troops, Del Gados' men were victorious. Thirty Spaniards were killed and sixty were wounded. The insurgents lost twenty killed and thirty wounded.

In the Yucatan Abajo district hundreds of men are leaving the tobacco plantations to join the insurgents. The planters complain that the Spanish authorities are unable to protect them.

Under an order from the Treasury Department, the arms, ammunition and supplies that were seized here three months ago on the supposition that they were destined for the Cuban insurgents have been turned over to the claimants.

The value of the seized goods was placed at \$7,000. The government made the seizure on suspicion. There was not a scintilla of evidence.

Hailed Down the Stars and Stripes.
TORONTO, Ont., Nov. 28.—There are many American students attending the Ontario Veterinary College at this time. On Thanksgiving Day, across the line they sought to honor the event by raising the Stars and Stripes in one of their lecture rooms.

To this, however, the Canadian students objected, and a heated student demonstration followed. The students were ordered to leave the building.

KILLED A FELLOW PRISONER.
CARLETT Seizes a Revolver and Paralyzes in a Free Fight.

ST. JOSEPH, Mo., Nov. 28.—Chas. Harris, awaiting transportation to return to his home, was shot and fatally wounded James Anderson, a fellow-prisoner in the county jail this morning during a fight among the half hundred prisoners in the jail, led by Tom Crowe, the noted criminal and alleged train robber.

The factions fought it out in the corridors among themselves, and the sheriff and his deputies were powerless to control the disturbance. The uproar and din attracted a crowd about the jail. How Harris secured his weapon is a mystery.

Post-Office Robbed.
AUBURN, Ala., Nov. 28.—Burglars entered the post-office at this place last night and blew open the safe with dynamite. They secured about one hundred dollars but did not molest the stamps. Several registers and other valuables were also taken.

How Britishers Were Captured by Smart Yankees in 1812.
British fondness for good eating, and especially mutton, on more than one occasion has cost England a good deal more than she bargained for, says the New York Sun.

Eighty-one years ago it cost her a sloop of war. It has been seriously charged, and with some grains of truth, that during the war of 1812 British naval officers stationed on the coast of the United States gave a sharper lookout Yankee poultry, sheep and things of the kind than they did for their own cruisers.

The Americans were not long in discovering this weak point of their enemy, and on July 4, 1813, a party of Connecticut fishermen planned to capture a large flock of sheep, which was grazing on Long Island sound. The "grand strategy of war" on this occasion was based on the well-known fondness of the British for mutton.

The fishing-smok Yankee was fitted out in New York harbor early on the morning of July 4th, having forty well-armed men concealed in her hold, while three innocent-looking fishermen, together with a calf, a sheep and a goose, were purposely left on deck and in plain sight.

Working her way through Hell Gate, the Yankee entered the sound to all appearances a harmless trading vessel. It was not long before the sharp-eyed lookout in the Eagle spotted the calf, although her owners declared she was celebrating the birth of the first lamb.

The innocent-looking fishermen, however, made great efforts to escape, but promptly heaved to when the order was given to do so.

The Eagle gallantly ran alongside the calf, and the people aboard, and their mouths watering at the sight of the calf, the sheep, and the goose. But at this moment the watchword "Lawrence was passed, and in a twinkling forty Americans rushed to their feet, and, taking deliberate aim, fired, killing and wounding a number of the English crew and driving the rest below.

The Americans then boarded the Eagle and hoisting the Stars and Stripes over the British colors, carried her safely into New York, where they were greeted with great enthusiasm by the people who were celebrating the glorious Fourth on the battery.

Thanksgiving Day!

ORIGIN AND HISTORICAL EVENTS OF THE DAY BRIEFLY TOLD IN VERSE AND PROSE—OTHER INCIDENTS RELATIVE THERETO.

ORIGIN OF THANKSGIVING DAY.
The Pilgrims of the Mayflower, who landed at Plymouth, Mass., on the 11th of November, 1620, after a long and arduous voyage, were met by the Indians, who showed them the way to a friendly settlement.

THE ROCKEFELLER MARRIAGE

The Millionaire's Daughter Weds Harold S. McCormick.

New York, Nov. 28.—Miss Edith Rockefeller was married to Mr. Harold S. McCormick at the latter's home in New York today.

The bride was the daughter of John D. Rockefeller, the millionaire oil magnate. The groom is the son of a prominent New York family.

The ceremony was performed by the Rev. Dr. John Hall, the Episcopal minister of the Church of the Holy Trinity.

The bride and groom were accompanied by a large number of guests. The reception was held at the groom's home.

NORTH CAROLINA EXHIBIT.

An Interesting Feature in the Mining and Forestry Building.

The North Carolina mineral exhibit in the Mining and Forestry building, which has just been awarded a gold medal, is as it was planned to be.

The exhibit is a most interesting one, showing the rare species and fancy specimens have been left at home, and the exhibit here have been selected from the best known workable deposits of iron, gold, silver, copper, lead, zinc, tin, manganese, and other geological products.

The more important mines are illustrated on geological maps and illustrated by beautiful transparencies in the windows over the exhibit, and a colored chart, 240 feet long, shows the various geological formations across the entire State, including the valuable mineral deposits in the middle and western counties, and arsenic water supplies in the eastern counties.

An important feature of these North Carolina exhibits is that their completeness, arrangement and labeling, give an educational value not elsewhere seen. The exhibits include the most valuable mineral specimens in the building, and a complete mining outfit show the methods of mining and washing the ore, and the utilization of the same.

The exhibit is a most interesting one, showing the rare species and fancy specimens have been left at home, and the exhibit here have been selected from the best known workable deposits of iron, gold, silver, copper, lead, zinc, tin, manganese, and other geological products.
