To be Provided for by Act of Congress --- Measures to be all of One Shape-as Well as Size-Difference in Wholesale and Retail Weights.

UNIFORM WEIGHTS & MEASURES

Vi- Rosel, sealer of weights and a-new- im- reported fayorably to te Commissioners on Senate bill ... t. cetablishing a standard shape and size for dry measures. The commissioners have sent his report Congress, and they advocate inreasing the penalty for violating the provisions of the bill to \$5. The presented sizes for the different measures were published in the Poet when the Commissioners reported favorably upon the bill. Mr. Bond

If all measures purporting to hold he same quantity were of equal drape deceptions as to size would be easier detected, and they could be tested by rule and measure, instead It is now a common thing for a

purchaser, and again, in all fruits and vegetables sold by messure, & much smaller quantity will round up a small end than a larger one. It is only just and fair that deal-

hape, as well as the same size. I beg leave to recommend that the wholesale weight of a bushel of potatoes be made sixty pounds, tent the retail weight be made fifty six pounds. This differcare is fully equalized by the amount of dirt shoveled up when putting potatoes in sacks for wholesale delivery and the care taken when pre-

Alber, because by wholesale, one down weight is given; but by retail leight or sixteen down weights are given. Also, because fifty-six pounds divides up into eights and sixteenth with less fractions than sixty pounds and because there are now in use in the District several hundred "potato scales" that only weigh fourteen pounds, seven pounds and three and

a half pounds. It also recommends some legislation that will more certainly regulate the sale of betties in boxes or baskets. Imitation quart boxes are in common use, purporting to hold a quart, but really holding one third less than a quart. These are used by many persons, who excuse themselves by claiming they sell by the
