WHAT FASHION AND FANC SAYS IT SHOULD CONTAIN

An Outfit Arranged for the Land of Flowers. Requirements of the Tollof Sag. Party Frecks for the Little Ones.

[Our New York Letter. The latitude of New York does no: low in Fashion's train.

Designed by THE NATIONAL CLOAK CO. West 23rd St., New York.

holding court, side by side with cold defying furs such assortments of lighter garments as are in demand for wear in Southern lands, where Jack Frost is both a rare and an unwelcome guest. But so long as New York remains the Mecca of snoppers so long must Metropolitan stocks of attire run, figurati-ely, the gamut of the thermometer at every season of the year.

At the Waldorf today, at the Ponce de Leon almost tomorrow, my lady's wardrobe must embrace all the climate requirements. Let us see what it must contain: From the starting point in New York, at least as far as the tropically temperatured Pullman, a good warm golf cape made of cloth and neatly lined with silk is the most acceptable outer gar ment, for it can be removed without assistance and thrown over the back of the chair and, in fact, will be found convenient in many ways.

As the national capitol is passed the wardrobe must respond to a demand for wraps, at least, of lighter texture and before the sun has erased another date from the calendar, the Land of Flowers will have been reached and clothing appropriate to our Northern June will be not only desirable but necessary. Now the golf cape can be strapped with the umbrells, etc., but the sensible woman will always keep it handy. for the evenings have an Octaber chill and then the game of golf is as much a fad in the South as it is at fashionable Lakewood.

The tailor-made traveling dress should be made in the coat and skirt style, which admits of many scceptable changes. A mixed material is preferable for this gown for it will not show dust or other effects of wear as quickly as smooth-faced cloths. The jacket should be made to fit over a vest or silk blouse, for frequently even this light jacket day, so a few hints on tiny frockmeeds to be removed.

Of course, a vest, white col ar and a silk tie give a touch of smart ness, but a soft blouse certainly gives the greater amount of comfort

Heaven at the same time and the short skirt escapes the wet decks and, consequently does not dampen the wearer's shoes.

The jacket of the bicycle suit here llustrated is a smart double-breasted affair made thoroughly comfortable scross the shoulders and about the arm holes and it can be worn over a olouse or sweater or with a collarette to match the material. Perhaps the most charming way in which to complete such an outfit is to have the collarete made of bright red loth. This touch of color is like : bit of sunshine on a dull day brightening its surroundings and

making the wearer more welcome. It is just at this season that par ties for children are the order of the for the little ones may be appreciated by busy mammas. The etyler never were prettier nor more varied than they are this season, and silks or soft, pliable fabrics of every de scription are used in their construction. Pink, pale blue, yellow and soft green are the popular colors Dainty Eastern silks are used for the full, loose hanging dresses which very young girls wear, and many o' these are accordion-plaited to give
