RUTCH-BOU

The man with the crutch never fails to arouse the deepest sympathy and awaken the tenderest emotions of his more fortunate fellow being. The haggard countenance, swollen joints and twisted and deformed limbs tell a pathetic story of suffering such as Rheumatism alone can inflict. Only those who are painfully and slowly hobbling through life can fully realize what it means to be crutch-bound. They feel most keenly their helpless and dependent condition when it dawns upon them that they are no longer workers but unwilling drones in the busy world.

Rheumatism should not be neglected because the pains at first are wandering and slight. These are only the rumblings of an approaching storm of pains and aches that may transfer you from a life of activity to the ranks of the crutchbound cripples.

Rheumatism is due to acrid gritty particles being deposited in the joints, muscles and nerves by an impure and too-acid blood, and the strongest constitutions or muscles of iron and nerves of steel can long withstand these corroding poisons. They penetrate to every fibre of the body, and no liniment, lotion or other external application can reach and dislodge them.

Finally the natural oils are consumed when there is a creaking, grinding noise with every movement of the limbs, the joints become locked and immovable, the muscles wither or contract, the nervous system gives way and the patient becomes a physical wreck and crutchbound cripple. Rubbing with liniments may produce counter-irritation and afford temporary ease, but they cannot reach and destroy these corrosive particles, which are daily forming in the blood.

The correct treatment the true cure for Rheumatism-is a remedy that will dissolve and wash out this inflammatory matter and expel it from the system. and no medicine does this so promptly and thoroughly as S. S. S. It neutralizes and eliminates from the blood

for cighteen months, and during my sickbent triest the skill of many good physicians,
all of whom pronounced my case hopeless.

I wan for a year in such a helpless condition that I was unable to dress or feed myself. I had filled at different times, fiftytwo prescriptions suggested by friends,
wand of them giving me any relief; I finally 6-dided to try S. S. S. and took the first
does while hobbling about on crutches.

After taking two bottles I found so much
relief I was able to relinquish the use of
one crutch, and a faithful continuance
of the medicine relieved me of the other
crutch and shortly afterward enabled me
to go to my work, at which I have been ever
since. I have had no return of any symptoms of Bheumatism, although this was
seven years ago. Yours very truly,

LISS N. Senate Ave., Indianapolis, Ind. current all poisonous, noxious substances and makes the blood pure and strong again and, as it circulates through the body, all effete matter is gathered up and sent out through the proper channels. This rich new blood cools the feverish, throbbing muscles and joints and refreshes the tired nerves, and welcome relief comes to the wretched sufferer.

S. S. S. contains no Potash, Opium, Anodyne or mineral of any description, but is a Guaranteed Purely Vegetable Compound. The strong minerals that are usually prescribed in Rheumatic cases act very injuriously upon the lining of the stomach, causing inflammation and a most dis-

tressing form of dysper in.

S. S. S. not only profiles the blood, but at the same time invigorates and tones up the whole system, increases

VOICE OF THE PEOPLE.

Ex-Slaves and Bountles.

MR. EDITOR:-In the issue of the Journal, of January 1st, I see under "Bornties and Pensions" together with "the colored people defrauded." In the close of the article, the writer expresses his astonishment at the scantiness of intelligence among the colored ministers to this log, pulled the lever operating the prevent the robbery of their poor igno- 'nigger," and from some cause the "nigrant fellows.

Permit me Mr. Editor, to say to you and the readers of our city organ, "that tween the two levers, the other of which it is not for the want of intelligence on the part of the colored ministry of our started the carriage and drove Mr. Koutz city" for I verily believe that no city in the State, the same size of ours can boast of a better prepared ministry than New back with terrific force and, jumping the this morning. Mr. S. Barker accompa-Bern among our people, of course I say track, pushed through the end of the nied them as far as Kinston. therefore, it is not the lack of intelligence, neither is it indifference on the part of the colored clergy. But the cause laies in the poor colored people who are was unburt, but Watson jumped on the he was not guilty, but thinks he (Wil- and hear His voice in the wave that being duped by their own blood and side on which the carriage ran off, and cox) knows something of her disappear- breaks upon the sand where the first

When you stop to consider the class o people that are being relieved of their dimes, the "Ex-slaves," these poor, honest, faithful, and ignorant mothers and fathers of my race, you can see that it is the condition that makes them an easy victim for the dime robber.

The Ministers cannot reach all of these poor people, so that they can inform them that the treasury in which bounty money is stored up for all Amerlean citizens is either in the vault of the United States or in the brain and muscle that all who faithfully served in the army, get a pension from the government, all who did not carry swords or muskets get theirs from the storehouse of brain

Some of our people have been made to believe by a dream or otherwise, that the government or somebody should pay them for the days they were in bondage, and any time a robber comes along with the old story of 40 acres and a mule they are after him, and preacher, teacher practically the first that have come since and everybody class had better fall in line Christmas. Oystermen seem to have or shut up their mouths. We hope that taken a long holiday this year. Other

in this city read from the Washington poor ignorant colored people of the South, and for this, a good many of that class of his race, were much displeased telligence. The only remedy for such, is the strong arm of the law, and the banishment of the remedy for such. banishment of the perpetrate

PETITION TO CONGRESS.

To Fittingly Celebrate the Settlement of Roanoke Island Next Summer.

The committee of the State Literary and Historial Society which has in charge the arrangement for the celebra-tion on Roanoke Island next July has prepared the following petition to the Congress of the United States, to commemorate on Rospoke Island the birth of the first English child and the planting of the first English colony in Ameri-

On August 15, 1887, the first child of the Anglo-Saxon race to be born in the Western Hemisphere was given birth on Roanoke Island by Eleanor Dare, member of the colony which Sir Walter Raleigh had sent across the seas "to plant an English nation in America.

The colonies of Raleigh, all planted on

Roanoke Island, were the first deliberate

and systematic efforts for English colon-

ization. They were the real beginning of the struggle by the Anglo-Saxon race for possession of the new world. Their failure was due not to lack of courage, or patriotism, or fortitude, but to the life-and-death battle then waging in English waters between Spaniard and Saxon. The ships and heroes that would have brought salvation to the English colonies on Roanoke Island were detained at home for the destruction of the Spanish Armada. Roanoke Island was sacrificed that England might be saved. ButRaleigh's efforts at colonization were not in vain; he sowed the seed whose im mediate harvest was Jamestown and Plymouth, whose latest fruits are Santiago and Manila. He was the Father of Anglo-Saxon expansion, planting in the new world not only English men but English law and English liberty. His letters patent from the crown secured for the first English colony in America, rights and privileges, whose denial two centuries later brought on the American Revolution; "all the privileges of free denizens and person native of England, in such ample manuer as if they were born and personally resident in England" and especially the right to be governed by such laws as they might make for themselves. Soldier and sailor statesman and philosopher; poet and historian; patriot and martyr; greatest hero in the greatest age of the world, the name of Raleigh stands feremost among all who sought to "plant an English na-

tion in America." The long struggle with Spain for the possession of the American continent is at last ended. The Spanish flag floats nowhere in the Western World. Liberty and law are today the heritage of every child born in America. The tree that Raleigh planted on Roanoke Island has grown until now it covers a continent. Its branches are spreading across Balboa's ocean. Beneath its shadow sits the oldest empire in the world, crying for help to the youngest republic. Its power has shifted the center of gravity of the universe, and shaken the foundations of injustice and oppression even to the ends of the earth. The "Wilds of ! America" are become today the center of the world's activities. The infant wall of Virginia Dare is grown into the voice of a mighty nation that now de-

cides the destinies of humanity. Fitly to celebrate the beginning of these great events, honorably to commemorate the life and character of him who deserves to be called the Father of English colonization, reverently to see the hand of God upon the desert shore born American came to life, were alike

about 10 feet and when found he was lying partly out of the opening in the tion as clerk in the Post office. Mr. Take Dixon is his successor. Should pray that suitable provision may be carriage. by your honorable body for the celebration on Roanoke Island, during the months of July and August 1903, o the birth of the first English child and the planting of the first English colony

A Prominent Woman Speaks.

Prof. Roxa Tyler, of Chicago, Vicein the Cove items that it was the first President Illinois Woman's Alliance, in speaking of Chamberlain's Cough Remedy, says: "I suffered with a severe cold this winter which threatened to run into pneumonia. I tried different remedies but I seemed to grow worse and the medicine upset my stomach. A friend thing of the present and future, and as advised me to try Chamberlain's Cough 1901 has passed away let it be a thing of Remedy and I found it was pleasant to take and it relieved me at once. I am now entirely recovered, saved a doctor's bill, time and suffering, and I will never be year of peace and prosperity, and if God without this splendid medicine again. For sale by F S Duffy & Co.

Snow Water. It was long thought that the water from melted snow was the purest of all water. This idea has been proved incorrect, as the reverse is the case. Suow is really a purifier of the atmosphere attracting from it as it falls various im purities, and these are found in the snow water.

Salvation Oil the Best 'Liniment. Price, 15 cts; large bottle 25 cts. Great ly, and godly in the midst of this present est cure on earth for Rheumatism, Neuralgia, Soreness, Sprains, Backache Stiffness, Cuts, Bruises, Wounds, Swellin word or deed, do all in the name of ings, Burns and Frost Bites. Sa'vation the Lord Jesus, giving thanks to God Oil kills all pain.

Castles In the Air. The phrase "castles in the air" has been attributed to Sir Philip Sydney, Swift, Fielding, Churchill and She stone. It was first used more than 250 years ago by Robert Burton in his "Anatomy of Melancholy."

at and entire at last. In a universe that is under the rule of Imfinite Love there is always hope, "Wherefore lift up the hands which hang down, and the feeble knees, and make straight paths for your feet lest that which is lame be turned out of the way; but le. it rather be healed." with the deep, hoarse bark, grimly called "a grave-yard cough." It is the cry of the tortured lungs for mercy. Give them mercy in the form of Allen's Lung Balsam, a remedy for pulmonary trouble, so highly esteemed that it is recommended even in the earlier stages of consump-tion. In the latter stages mortal skill is unavailing. Nobody can afford to neg-lect a cold.

onsia Cure

HINTS FOR FARMERS

A Cheap Smokehouse.

Any one having a small amount of mest to smoke and not caring to depend on the neighbors' smokehouses can build one himself without use of hammer or nails, says a correspondent of New England Homestead. Simply take an old hogshead and saw a hole near the bottom for a stoveplpe to enter. Get an old cust from teakettle and cut a hole near the bottom for draft. Now procure at least five lengths of stove pipe: better, ten: less than five will burn the meat. Set your hogshead at least two feet above the level of the kettle. Fill the latter with kindlings, including some blckory wood and cobs. and place the elbow of the pipe over the top of the kettle. Start a fire and hang your hams in the hogshead. The damper should be used when fuel is used it for years and find it practical.

Storing Cabbages. To have cabbage good and fresh in the winter it is best to put it in the ground, says a New Jersey grower in American Agriculturist. I open a double furrow with the plow and put the cabbage in a single row with the heads down and the outside leaves drawn in under the head. I then plow two furrows to them. The first furrow covers the cabbage, and the other I draw up over roots, smoothing along on top with a shovel so that it will shed the water. If I want to use the cabbage through the winter, then trash is thrown over it to keep the ground from freezing to it. I have been successful in keeping cabbage this way and have it to sell to my neighbors in the spring when theirs rotted by leaving the roots uncovered.

Guinea Fowls on the Farm. Keep at least a pair of guineas on every farm as a hawk, rat, weasel and perhaps even a skunk preventive, says a Maine farmer in American Agriculturist. In warm weather they will feed themselves, as they are great foragers, but they are apt to lay out, so it is advisable to keep them within the coop till they lay, as often has to be done with geese. In many regions they can be bought cheaper than common bens, and chickens can be raised for table much cheaper. Their eggs are delicious. The average chicken thief will not brave coop or yard guarded by guinea fowls, with their discordant voices and aggressive tempers.

Forage Crops.

A writer in the Ohio Farmer gives the following computations of four crops which he grew for fodder last season, computed from weighing the product of one square rod in each field, taking what he thought was the best part of the field, a method perhaps as fair for one as the other: Soy beans, medium green, 914 tons green forage per acre; whippoorwill cowpens, 121/2 tons per acre green forage; Early Orange sorghum, 1814 tons green forage per acre, and red cob enslinge corn, 31 tons per acre of green forage. All had a moderate dressing of stable manure per acre and each the same amount of commercial fertilizer.

Cowpens as a Soil improver. The depleted, wornout lands of New England need some crop that will not only add plant food to the soil, but that will repoyate these lands by rejuvenating and adding life to them, says C. W. Burkett in New England Homestend. The wornout soils of Nev England and the northern states are lacking in productivity primarily because they contain so little erganic matter. Cowpeas can be grown and left to die on the ground or be plowed under, which is better, thus improving the soil in a marked degree.

Winter Care of Calves.

Fall calves should be kept in a warm dry, light stable and fed skimmilk until the following spring, says New England Homestead. Skimmilk, however. should not form the entire ration. Oil meal is needed in place of the butter fat removed and some crushed oats and wheat bran to make growth. Silage, if you have it, or sweet clover hav should be given daily in small quantities. Calves for beef may bave some cornmeal.

Two Pig Litters n Year. Why should a hog man be content with one litter of pigs a year when he can have two at no more cost? asks Farm and Ranch. Encourage the two litter a year habit in sows, and they will live longer, do better and be productive at a greater age than one litter a year sows. It is the opinion of many experienced hog men that sows will bring more pigs at a litter twice a year than once a year.

Wheat Screenings For Sheep. In some feed tests carried on at the Utah station with sheep to determine the comparative value of wheat, frost ed wheat and wheat screenings it was shown that it is more profitable to feed the screenings than either good or frosted wheat, cost considered.

Feed For the Brood Sow. A brood sow should be fed a variety, such as bran, roots, etc. Corn is fattening and should not be fed in large quantities. It promotes neither the growth of the sow nor the pigs. Some reen vegetable food should be given

Value of Stable Blankets. Stable blankets save outs and keep the horses' coats smooth. They are also as useful on the cows. Bran sacks may be foubled and used for this pur-

To Keep Sweet Potatoes. Sweet potatoes can be stored with fair success by putting in a box with alternate layers of dry, fine sand.

Killed For Assault.

Indianapolis, Ind., Jan. 2-A negro miner named Hinsley was killed by mob for assault on a white woman last night.

Island Insurrection.

Island of Martinique, Jan. 2—The British steamer Ban Righ, recently re-named Libertador, sailed to day with Gen. Matos, and several other Generals and important personages who have joined Matos. Also 800 volunteers.

FOLLIES OF FASHION

BARTORIAL VAGARIES OF THE CEN TURIES THAT ARE GONE.

Grotesque Styles That Reigned L the Time of Chaucer - Baiment That Rivaled the Rainbow and

Men Who Starched Their Beards. It is a little gratifying to reflect that, however the man of today may compare with his ancestors of bygone centuries in physique and morals, his dress is much more moderate and inexpensive, even if it is less pictur-

esque, than theirs.

It is true that here and there one may find some foolish young man whose taste in dress is as extravagant as that of any "buck" of the days of put in. This will do the work. I have the Georges. There is, for instance, a son of a well known peer who has the reputation of never wearing a suit twice. He has a wardrobe of walstcoats of all the colors of the rainbow, ranging from a light blue spangled with silver stars to a deep green satis with buttons of eighteen carat gold, each of which is adorned with the

painted face of a beautiful woman. Another wealthy aristocrat is credited with having as many suits and uniforms as there are days in the year and with spending on his tailor's bill a sum which would pay the yearly salary of a minor cabinet minister.

But such men are modestly arrayed compared with the dandles of many s past century. The earl of Northumberland who lived in the latter part of the fourteenth century boasted no fewer than sixty suits of cloth of gold alone, and the bishop of Ely of that time had a change of raiment for every day of the year.

Much later, in Queen Mary's time, Much later, in Queen Mary's time, the wardrobe of a bishop might have been the envy of Solomon for the variety and costliness of its contents, and even a simple village priest, according to Fuller, wore "a vestment of crimson satin, a vestment of crimson velvet, a stole and fanon set with pearl, gowns faced with taffetas, etc.'

In the days of Chaucer fashionable men wore clothes as many colored as Joseph's coat, so that "while one leg would be a blaze of crimson the other would be tricked out in green or blue or yellow, without any regard to harmony or contrast." Even as late as the middle of the

eighteenth century a dandy would deck himself in "a vivid green coat, a waist coat of scarlet, yellow breeches and a few years later wore, among similar sartorial vagaries, "a coat of light green, with sleeves too small for the arms and buttons too big for the ets; clouded silk stockings, a club of hair behind larger than the head that carries it, a hat of the size of a six pence on a block not worth a farthing."

At one fashionable epoch our ances tors, to quote the words of a quaint chronicler, "would weare clothes so tighte to ye skin that it might well be with feathers that, of a verity, their wearers resembled nothing so much as walking sackes."

At another period it was the growearers resembled nothing so much as walking sackes."

son the dress of all the countries of Europe-the hat would be Spanish, the coat French, the trousers Turkish, and so on-so that the wearer was a "walk ing epitome of the dress of a continent.

At one time shoes would be worn with square toes of such width that s royal proclamation was issued limiting the width to six inches, and these shoes were succeeded by others which came to the finest of points at the toes

In Henry II.'s time shoes with points two feet long were worn by the fashionables, and in the reign of Henry IV. these points had grown to such an inordinate length that in order to be able to walk at all it was necessary to attach the tips to the knees by chains, which were of gold or silver, while the tops of the shoes were carved with all kinds of fantastic designs.

In the early part of the eighteenth century it was a common thing for a man of fashion to spend several hours a day with his valet, among the many quaint operations being "the starching of the beard and the proper perfuming of garments, the painting of the face of garments, the painting of the face Buy your friends and anointing with oils, tinetures, quintessences and pomatums." It is ever said that some of the dandles of the time bathed in wine and milk "for the preservation of their complexions and preservation of their complexions and that are useful. London Tit-Bits.
