

MALARIA

An Invisible Enemy to Health

Means bad air, and whether it comes from the low lands and marshes of the country, or the filthy sewers and drain pipes of the cities and towns, its effect upon the human system is the same.

These atmospheric poisons are breathed into the lungs and taken up by the blood, and the foundation of some long, debilitating illness is laid. Chills and fever, chronic dyspepsia, torpid and enlarged liver, kidney troubles, jaundice and biliousness are frequently due to that invisible foe, Malaria. Noxious gases and unhealthy matter collect in the system because the liver and kidneys fail to act, and are poured into the blood current until it becomes so polluted and sluggish that the poisons literally break through the skin, and carbuncles, boils, abscesses, ulcers and various eruptions of an indolent character appear, depleting the system, and threatening life itself.

The germs and poisons that so oppress and weaken the body and destroy the life-giving properties of the blood, rendering it thin and watery, must be overcome and carried out of the system before the patient can hope to get rid of Malaria and its effects.

S. S. S. does this and quickly produces an entire change in the blood, reaching every organ and stimulating them to vigorous, healthy action. S. S. S. possesses not only purifying but tonic properties, and the general health improves, and the appetite increases almost from the first dose. There is no Mercury, Potash, Arsenic or other mineral in S. S. S. It is strictly and entirely a vegetable remedy. Write us about your case, and our physicians will gladly help you by their advice to regain your health. Book on blood and skin diseases sent free.

THE SWIFT SPECIFIC CO., Atlanta, Ga.

GERMAN GLEANINGS.

One German engineer officer has been sentenced to a month's imprisonment and another heavily fined for receiving presents from the contractors engaged on the new fortification scheme at Metz.

The Prussian budget for 1902 appropriates 20,000 marks for further study of means of prevention and early diagnosis of typhoid fever, 10,000 marks to the committee for cancer research and 53,000 marks for a cancer ward and laboratory.

Prussia has 200 meteorological stations fully equipped, 2,500 rain gauge stations and 1,400 stations that record storms and unusual phenomena. The results of their observations are reduced and published for each week, for each month and for each year.

Kaiser Wilhelm has given orders that a gift of money, the Chinese war medal, a letter of honorable mention and a book called "German Marines in the Siege of Peking in 1900" shall be presented to the family of every marine that was killed at Peking.

MERE MEN.

Aaron French, who died in Pittsburg the other day, was the inventor of the spiral car spring, now used by all railroads.

Hon. Edward S. Cutter, who has been a member of the New Hampshire bar for fifty-four years, recently celebrated his eightieth birthday.

C. A. Black, the Detroit millionaire, has been settling an example in the duties of citizenship by voluntarily serving as a juror in a petty court.

Francis Varga, judge advocate general of the forces of Louis Kossuth in the Hungarian revolution of 1848-49, is now living, an invalid, at Leon, Ia.

Howard Gould has, it is said, had Kilkenny castle photographed from every possible point, so that he can build an exact replica of the castle and grounds for his own use.

Mayor Seth Low has chosen for his summer home a house on the north shore of Long Island sound, at Milton point, near Rye. He has purchased a steam yacht to carry him back and forth daily between New York city and his summer residence.

Ex-Congressman Frank Jones of New Hampshire, who was very seriously ill during the winter, has recently greatly gained in health and strength. He is now able to ride out and expects soon to be again actively engaged in the management of his large business interests.

Patrolman John M. Penniman, who has served on the Boston police force for fifty-four years, was retired a few days ago at his own request and will hereafter receive a pension of \$400 a year. He was the oldest officer in point of service in the city. His age is seventy-nine years.

The youngest governor in the Union is the newly inaugurated executive of the state of Washington, William McCrocker, aged twenty-eight, who recently succeeded ex-Governor Rogers. Mr. McCrocker, who is a native of Tennessee, is a son of the Rev. Solon McCrocker, a Methodist clergyman. He was graduated at Grant university, at Athens, Tenn.

MOTHERS DO YOU KNOW

the many so-called birth medicines, and most especially for women in the treatment of her delicate organs, which are so often injured by the use of such medicines. Do you know that Opium and Morphine are strictly prohibited in the treatment of women? Do you know that the most dangerous poisons are not permitted to be used in the treatment of women? Do you know that you should not take any medicine unless it is recommended by a physician? Do you know that Mother's Friend is a purely vegetable preparation, and that it is applied to the system only? Do you know that Mother's Friend is a strictly vegetable preparation, and that it is applied to the system only? Do you know that Mother's Friend is a strictly vegetable preparation, and that it is applied to the system only?

THE BRADFIELD REGULATOR CO., ATLANTA, GA.

UNITED STATES COURTS.

Formal and Dignified Opening With Judge in Gown, Grand Jury Proceedings.

The April term of the United States District and Circuit Courts for the Eastern District of North Carolina convened in this city, yesterday morning, His Honor, Judge Thos. R. Purnell, presiding, Colonel Harry Skinner, District Attorney, Mr. H. C. Dockery, Marshal.

The opening of the court marked a new epoch, it being a return to the severe and dignified English style.

Judge Purnell, in the traditional judicial manner, preceded by Deputy Marshal Sharp, and Marshal Dockery, the Marshals proclaiming aloud, and the entire assemblage in the court room rising and standing during the proclamation of the court's opening.

It was impressive and dignified, and gave character to subsequent proceedings.

The following Grand Jury was drawn:

S W Smallwood, Foreman, W H Cox, R L Davis, W G Hollowell, R B Kinsey, Needham Morgan, J W Beaman, John Blidde, M L Hollowell, John Westcott, J W Freeman, B L Brock, David McCane, W T Hale, Adrian Eastwood, T A Bell, W P Burrus, Jas B. Casey. Officer in charge of the Grand Jury, G W Bryant.

Judge Purnell's charge to the Grand Jury was full and masterly, and was listened to with careful attention by the Jurors, as well as the large number present in the court room.

The case of W. J. Brothers from Leon county, charged with opening and destroying mail, while postmaster at Institute, N. C., occupied the attention of the court the entire day, and will be resumed this morning at 10 o'clock.

A Suspicious Fire.

The fire last night, shortly before eight o'clock, was discovered between the stable of Mr. G. N. Ives and an out building, on Graves street.

The fire had every sign of being incendiary origin, and is the third suspicious fire in the same neighborhood.

The Fire Department responded promptly, and no damage resulted.

A Pretty Wedding.

April 28.—Mr. C. J. Heath and Miss Rose Oton, were united in marriage at the home of the bride's father, A. A. Oton, in Wasp, Sunday afternoon April 27th at 4:30 o'clock. Accompanying the bride couple were Messrs. Silas Ippock and S. L. Smith and Miss Cora Oton and Thilo Tingle. G. G. Gaskin, Esq. performed the ceremony. A largely attended and very pleasant reception at the home of the groom followed the ceremony.

ROE.

April 25.—Mr. Willie L. Carrawan, of Hyde County, and Miss Martha W. Goodwin of this place, were married April 23rd.

Another marriage occurred on April 28th, which is rather old news, but this being our first letter we will report it. On the date mentioned Mr. Jackson H. Goodwin and Miss Jantine Harris, were happily married. The contracting parties were both of this place.

Some of our young sportsmen, secured a fine deer while on a hunt, the 25th.

A Painful Injury.

Pollockville, April 30.—Mr. H. C. Fouace had the misfortune to get his leg broken this morning by falling in his cellar. He was having some repairing done and the steps leading down to the cellar floor had been moved he had forgotten it and started down to the floor and fell breaking his left leg just above the ankle. Dr. Koonce attended him and pronounced him as doing well, inferring some little pain only.

Cyclone Wrecks a Town.

Fort Worth, Tex. April 28.—A cyclone in Sumner county resulted in ten killed and fifty wounded. The town of Glenrose is a total wreck.

Now an Oyster Trust.

Norfolk, Va. April 28.—An oyster trust to control the planting, growing, opening, canning and shipping of oysters in Virginia was incorporated here this afternoon under the name of the Virginia Oyster Packers and Planters Association with a capital of \$100,000.

VANCEBORO.

April 28.—Mrs. S. J. Lane and Miss Mayne Adam, Mrs. J. A. Jackson's new milliner left Monday the 28th. for Bath N. C. to spend a few days. Mr. Lane on business and Miss Mayne to visit her old home.

Misses Cora Dinkins, Mayne Adams, and Lillie Smith attended church at Butlers Sunday.

Vanceboro was visited last week by the Ellsworth troops who presented a play "The turn of the tide".

Mr. V. A. Routure one of our most popular drummers spent several days here last week.

Mr. H. A. Brown, of your city spent Saturday night in our town.

Miss Nellie Bowden and Mr. Jack Willis of your city spent Friday here. Miss Nellie visiting her aunt Mrs. D. S. Lancaster.

Dr. Covington, of Norfolk, Va., will locate here in a few days, filling the vacancy made by Dr. J. E. Nobles, who left the first of the year. We can only say we hope he will gain the respect and esteem that our former Dr. did.

Mr. A. J. Gatlin and son Oscar left yesterday for New Bern.

Mr. W. H. Winfield passed through our town yesterday, Sunday, on his way to New Bern.

Mr. M. D. Laughinghouse is spending the week in your city.

Miss Beale Parkerson of Greenville is visiting her sister, Mrs. J. F. Edwards.

Mrs. F. L. Post of Spartanburg, S. C. who has been on an extended visit to her parents returned to her home Monday.

The boys of Vanceboro will give a ball Friday night, complimentary to the young ladies.

Various Styles of Hairdressing.

The various styles of hairdressing under Louis XVI. were known as the cascade of St. Cloud, the windmill, the sheep and lamb, the hen and chickens, the dog and hare, the pearl of bells, the milkmaid, the bob wig, the bother, the kerchief, the oriental, the Circassian, Minerva's helmet, the crescent, the enigma, the desire to please, the turned up cascade, the treasurer of the age, the frivolous bather, the rat, the drunken monkey and the lover's snare, the last named consisting of a mass of curls covered with powder, particles of which, deposited on the coat or shoulder of a gentleman, indicated the previous whereabouts of the lady's head.

The schooner Lorena D. Capt. Ealter sailed for Bay Shore last evening loaded with brick.

Schooner Levon J. Marvel, Capt. Wright, sailed yesterday morning for Baltimore with lumber from J. S. Basnight's mill.

Schooner Marietta Capt. George, sailed for Harlowe last night with a cargo of merchandise.

Schooner Bessie May lumber and merchandise, to Norfolk sailed yesterday afternoon.

Sharpie, Lorena D. Capt. Ealter, sailed for Portsmouth last night with brick and shingles.

The schooner Essex, Capt. Lupton, arrived yesterday evening from Pamlico with sweet potatoes, hogs, chickens and eggs.

The Season's Last Dance.

A delightful dance was held in Lowthrop hall last evening. The ladies were the guests of honor at the dance, the last of the season, the young gentlemen were the hosts.

The music was furnished by the Italian orchestra from Wilmington. Mrs. Jones and Mrs. Windley acted as chaperones.

The following were the couples attending:

George Henderson with Miss Agnes Foy; Mark Stevenson with Miss Alice Cole of New York; Adolph Nunn with Miss Mary Gule; Ellis Williams with Miss Della Purnell; N. C. Hughes with Miss Birdie Tyler; Jesse Claypoole with Miss Sophie Whitford; R. A. Nunn with Mrs. Shultz; John Jones with Miss Bettie Windley.

FACTS FROM FRANCE.

Forty years ago tuberculosis was nearly unknown in the Basque district of France, but is now rife there.

Within the last five years the consumption of alcohol has doubled in Paris. The amount now drunk in a year is 8,000,000 bottles.

Among the French conscripts drawn from the department of the Charante-inférieure in a young man named Jaroche, the youngest of a family of thirty-two children, twelve of whom are still living.

A Parisian lamp lighter makes his rounds on a bicycle, with a long torch carried over his right shoulder. He guides the wheel with the left hand and is so expert that he lights the lamps without dismounting.

A monument to Lieutenant Francois Garnier, who explored Yunnan in 1806-08 and in 1873, has been erected at St. Etienne. His discoveries and his murder on the Red river led to the French expedition to Tonquin and the establishment of the French colonies in Indo-China.

General Strike Order.

Pittsburg, April 28.—The building trades council has called an almost general strike for May 1 unless the demands of the craftsmen are granted by that time. It is estimated that 15,000 men will be idle.

Summer Complaint.

is not always brought about by change of air and water. The "stay-at-homes" are just as susceptible to diarrhoea, due, generally, to over eating, as unripe fruits, etc., and drinking hot water; all accompanied by painful bowel discharges; and, if not checked, results seriously. Perry Davis' Peppermint Cure is the only purely reliable remedy. 25 and 50c.

Now an Oyster Trust.

Norfolk, Va. April 28.—An oyster trust to control the planting, growing, opening, canning and shipping of oysters in Virginia was incorporated here this afternoon under the name of the Virginia Oyster Packers and Planters Association with a capital of \$100,000.

Kodol Dyspepsia Cure

Digests what you eat.

HINTS FOR FARMERS

Better Farming Needed. Agriculture is the occupation of the majority of the people of this country; hence it seems when agriculture is flourishing all other business should be prosperous. Therefore it follows that anything which aids the agricultural cause benefits the whole country and the whole people, for all its inhabitants must be fed and clothed.

The improvement of the soil should, then, be the aim of all true farmers and especially all farm owners. As a rule, however, we have two distinct classes of farmers, the first and larger class being those who farm for dollars and cents that can be got out of the farm during the current season; the second class are those who farm for permanent improvement and the dollars they expect not only in the present, but in the future. If their crops do not pay the first season for the extra labor, they know they will certainly pay the second season, the future crops being benefited thereby.

How much better, then, the country at large would be in a few years if our farmers would till the soil for permanent improvement. It is said that "he who makes two blades of grass to grow where but one grew before" is a public benefactor. Our farmers at large do not generally see this or will not see it and so keep on with the old skinning process, their farms going down and producing less each season.—A. E. Haught in American Cultivator.

Fertilizers For Potatoes.

Fertilizers for potatoes received the best and widest of tests all over the country in the American Agriculturist crop contests of 1880 and again in 1890. The ten largest crops averaged 633 bushels per acre the first year and 633 bushels the next year. Most of them were grown by the use of high grade special potato fertilizers. The amount of fertilizer used ran all the way from 500 to 5,000 pounds per acre, but the largest yields over the greatest variety of soils and climates were obtained from 1,800 to 2,500 pounds of fertilizer per acre. Plant food in excess of 2,000 pounds per acre did not materially increase the yield, and that is probably the utmost fertilizer that can be profitably used per acre by expert growers. All these large crops of potatoes paid handsome profits. Some put half the fertilizer in the furrow, running through with a brush harrow to lightly mix it with soil before planting, the rest of the fertilizer being sown between the rows just before the first cultivation. Others broadcasted half the fertilizer and harrowed it in before furrowing out for the seed and cultivated or hoed in the balance. Stable manure does not produce as large crops of potatoes or as good quality as the best grades of fertilizers.

Value of Good Seed Corn.

As an illustration of the importance which some corn growers place upon having good seed The Live Stock World tells of a Missouri man, who usually grows several thousand acres of corn, who applied to an Illinois man to furnish him the seed to use this spring. The Illinois man also raises several thousand acres of corn and has a reputation as a grower of one of the best varieties, but he had to decline the liberal offer made for what the other wanted, as he thought he had not enough to fill it after filling other orders taken and taking what he would need for his own use. He had lots of corn to sell, but not such as he would send out as well bred and carefully selected seed. The would be buyer also had corn to sell, and he was asked why he did not save seed from his own crop. He replied, "Because I have not the time and cannot hire men to do it properly." Breeding good seed corn is a special business in that section, as much as breeding the stock to feed it to.

Potash In the Orchard.

Potash is the fertilizing element of most needed in an orchard. The roots of fruit trees in most cases find all the nitrogen needed for growth and enough of phosphoric acid to perfect the seed. With the exception of nuts, the seed is not an object to be fertilized for, but the flavor and color of the pulp, and there is where potash gets in its work. Rabbit or muriate of potash—500 to 700 pounds of the former or 250 pounds of the latter per acre—will nearly always prove beneficial even when repeated every year. Wood ashes can always be used to good advantage in large quantities. We have never known too much wood ashes applied to an orchard.

Where Do the Fruit Trees Get?

Professor L. H. Bailey makes the statement that of 250,000,000 fruit trees sold by nurserymen last spring only 250,000,000 were alive now, including all planted in former years and all one tree in sixteen lives at all, only one in five of these lives to bear fruit, and only one tree in a hundred that gives anything like good results. The above statement is remarkable, and, if correct, it indicates great carelessness and lack of knowledge in planting and caring for the trees. Professor Bailey says further that "the loss of seeds is equally great."

Feeding the Soil.

A soil can be termed fertile only when it contains all the materials requisite for the nutrition of plants in the required quantity and in the proper form. With every crop a part of these ingredients is removed, and it remains for nature and man to make good this loss. Practical experience has proved that nitrogen, phosphoric acid and potash are the substances most needed to be applied to soils to make or keep them fertile. No crop can be grown on any one of these elements if the other two are lacking.

Amos Cummings Very Sick.

Baltimore, April 28.—Congressman Amos J. Cummings is in a very critical condition. He developed double pneumonia this morning and the attending physicians are much alarmed.

Sol Smith Russell Dead.

Washington, April 28.—Sol Smith Russell, the actor, who had been in poor health for several years, died here this afternoon, aged 64.

THE DOCTOR'S ROOM

Mr. and Mrs. Dr. Trenton were together with Trenton's brother, and Dr. Trenton suggested that his wife tell the story of how she came to marry.

"Herbert, my brother, had written that it would be impossible for him to meet me at the station and that I must take a cab and drive to Kings Court Mansions.

"When I arrived at King's Court, I walked bravely up the stairs with my traveling bag, the cabman following with my trunk. The length of the stairs took my breath away and also deprived me of all power of calculation, and in my ignorance I was unaware that the entrance does not count.

"Therefore, when I arrived at the landing where a door was standing open and an old manservant just replying to an inquirer that the doctor would not be in until 2 o'clock, I concluded that I had reached my journey's end, for my brother also rejoices in the title of doctor, though his degree is in music.

"To old Colonel James' astonishment I walked in, saying: 'The doctor expects me. Please have my luggage taken to my room. I am his sister.'

"With that he admitted me, muttering, 'Never heard of a sister,' into the smoky, dusty apartments I assumed to be my brother's bachelor quarters.

"To distract my thoughts I picked up a magazine, opening it where a letter had been placed to write as a mark. My eyes fell on the first page, and my attention was riveted in a moment.

"Now comes the disconcerting part of my confession, I could not refrain from reading the letter. It was signed, 'Your old friend, Ned Harwood.'

"Dear Old Man—So you have decided to install that dreadful little thing in your house, though you acknowledge yourself that all the peace and comfort of your life will be gone. Do be advised and give up the idea of such folly. At any rate, don't be surprised if I cut your acquaintance for the present and leave you to solitary enjoyment so long as I have any part of your establishment. Luckily I am off tomorrow, and by the time I come back you will have found out your mistake and sent Miss Dolly back where she came from. Your old friend,

"NED HARWOOD."

"My dear lady," cried Harwood, "you don't mean to say that any misunderstanding arose out of that?"

"I do mean to say so," she replied, laughing. "It was quite possible I should assume those words referred to me, and you cannot be surprised that at first I was highly indignant and then began to weep.

"My resolution was soon formed. I would go at once. I would not even see the heartless brother who had discussed me with his friends in such a manner. I quickly packed my traveling bag. While doing so I came upon a photograph of myself, which had been taken as a memento for the friends I was leaving.

"A sudden thought made me write a few words upon it and lay it on the table where the flowers and luncheon still remained. Then I put on my hat and mantle and was just going to open the door when I heard a latchkey inserted in the other side. It was Herbert, I thought. He should not find me there, and, seeing the door of a small room open, I slipped in and closed it behind me.

"Now let me tell the rest," interrupted Dr. Trenton, "for I was the principal actor. I fancied I was dreaming as I became aware of the invitingly spread table. Then I saw two covers laid as if for a delightful tete-a-tete and upon my dinner napkin a photo of the sweetest face I had ever seen. Look—that's the picture. I have not given it up since. And listen what was on it:

"As I am so ugly that I destroy your peace and drive away your friend, I leave you and shall find a home elsewhere."

"I puzzled over it in vain, for your letter never entered my thoughts. I could reach only one conclusion—that the original of this captivating picture had been here and that I had missed her.

"James thought I was mad. At last I extracted the facts from him, at least so far as he knew, for he did not know where my 'sister' had disappeared to. I caught up my hat in the hope of discovering some trace of her. We were both on the threshold when I heard a faint cry. I opened the storeroom door, and Dorothy, in tears, fell into my arms.

"If I had not been frightened by death in that dark room," said Dolly, "when that horrible monkey jumped on my back I would have stayed there for hours rather than call for help."

"Just think, Mr. Harwood, your special aversion, Miss Dolly, had already disturbed Jack's peace to such a degree as to be punished to the dark storeroom. No sooner had I entered it than the mischievous pet jumped on my back and would not move till Jack came to the rescue."

"Yes, I was obliged to restore my household fairy to Herbert, who had been waiting anxiously for her since 5 o'clock. However, I did not let him enjoy her company long, for soon she had to descend to the third floor flat again and preside over my breakfast, luncheon and dinner."

Ned Harwood was obliged to admit that all unconsciously, he had proved a very useful matchmaker.

Squaring the Circle.

The phrase "squaring the circle" is a mathematical question whether a circle can be made which contains exactly the same area as a square, and the difficulty is to find the precise ratio between the diameter and the circumference of a circle. Popularly it is 3.14159, etc., but the numbers would go on to infinity. This problem has given rise to an amount of labor only equaled by that bestowed upon the equally impossible one of discovering perpetual motion.
