CITY AND COUNTRY POPU-LATION.

Overflowing cities attract more attention than they deserve in the study of the real quality of our population, for we are still a rural people. The World's Work for May has an interesting map showing the distribution of population in America. This study of the comparative density of population gives the suggestive fact that the New England hill region, which is less than 3 per cent. of the area of America, has more than 18 per cent. of our continental population. In other words, it is four times as thickly settled as the average district in America. The country east of the great plains contains 51

cent, of the population. In other words, all but 6 per cent. of the people live in one-half of our territory. But this is not all that is of our interest. Only two-fifths of our people live in towns of over 2,500. To be sure, in the North Atlantic group of States the city dwellers are more than twothirds, but in the North Central and form. No cure-no pay. Price 58c. Western States they are only one-third, and in the South only a little more than one-sixth, How few of us think threefifths of our population live outside the zone of gaslights and bath-tubs, that is, they dig their living out of the soil. until they see others chasing after it. Billiousness is a condition character-

ized by a disturbance of the digestive organs. The stomach is debilitated, the liver torpid, the bowels constipated. There is a loathing of food, pains in the bowels, dizziness, coated tongue and vomiting, first of the undigested or partly digested food and then of bile. Chamberlain's Stomach and Liver Tablets allay the disturbances of the stomach and create a healthy appetite. They also tone up the liver to a healthy action and regulate the bowels.
