35 DROPS - 35 CENTS.

EXACT COPY OF WRAPPER.

NEW BERN ACADEMY.

Meeting of Board Trustees. Election of Superintendent, Assistant and Teachers.

A meeting of the Board of Trustees New Bern Academy, was held at the Citizens Bank yesterday.

The Superintendent of the city graded schools and the Secretary and Treasurer made their reports from the scholastic year ending May 31, 1903, which were accepted and regarded by the Board very satisfactory. The reports were ordered to be published and will appear as soon as they can be furnished.

Superintendent H. P. Harding was unanimously re-elected.

Prof. J. Paul Spence was re-elected Principal of the white school, also the following teachers:

Misses Annie D. Chadwick, Rachel C. Brookfield, Carrie M. Willis, Mollie H. Heath, Susan C. Jenkins, Emily C. Ferebee, Lizzie R. Hancock, Maye C. Holland, Gannette T. Hollister, was elected assistant teacher.

The Secretary was instructed to advertise for applicants to fill 3 vacancies who shall be recommended by the Superintendent, after a competition examination by him, to be held on the 2nd Monday in July 1903.

Rev. W. G. Avant was re-elected Principal of the colored graded school, also the following named teachers:

A. W. Wetherington, J. T. Barbee, Lillian Physis, W. L. Blackwell, Elizabeth Cordan, Carrie E. Green and Catherine Dudley.

The selection of janitor was left to the Superintendent.

Kodol Dyspepsia Cure

Digests what you eat.

ST. PIERRE.

The destruction of St. Pierre is apparently more complete even than that of Pompeii and Herculaneum in the first century of this era.—Philadelphia Times.

To suggest that St. Pierre was destroyed because of the "vice and immorality" of its inhabitants does not seem to be reasonable. It is far more satisfying to think of the destruction of the town as the work of the elements alone.—Baltimore Sun.

Are You A Coming Mother?

Are You Expectant?

MOTHER'S FRIEND

makes childbirth easy and almost painless, by preparing the system for parturition, thus making the labor and delivery easy. This is the only medicine that has been found to be so effective in relieving the sufferings of the mother and child. The period of confinement is also greatly shortened, the mother recovers, and the child is born healthy, strong and happy.

Morning sickness, or nausea arising from pregnancy, is prevented by relieving the stomach from the pressure brought to bear on it by the expanding organs, and by which it is induced through indigestion.

A pregnancy advances, the female enlarges, becomes restless, hard and tight. Long before the child is born, they are preparing for the secretion of milk. It is important in successful child rearing that these glands receive their proper stimulation. Mother's Friend relieves the tension of the breasts, and facilitates the secretion of Milk. It also relieves the swelling of the breasts, and prevents the formation of Milk. It also relieves the swelling of the breasts, and prevents the formation of Milk.

Afterwards, it relieves the tension of the breasts, and facilitates the secretion of Milk. It also relieves the swelling of the breasts, and prevents the formation of Milk.

It is a most valuable medicine for the mother and child. It is a most valuable medicine for the mother and child.

THE BRADLEY REGULATOR CO. CHICAGO, ILL.

Give The Horses Water.

The city authorities continue to build drinking fountains in different parts of town. Places for watering horses have been badly needed for a long time. The flow of the old fountains not being sufficient for the demand upon them, besides they were often out of fix, and the horses were many times compelled to go without water.

There were several cruelty to animals cases before the last court, charges for overloading, overdriving and unmercifully beating, were made against persons who were convicted and fined, which was as it should be.

There are many ways to be cruel to an animal but to let a tired, hot, thirsty horse go without water is about the worst punishment of all, the horse being dumb, no one knows or can see what agony he is enduring.

It is to be hoped that the work on these watering places will be pushed along as fast as possible in order that there may be plenty of water for horses during the summer months.

Spring Fever.

Spring fever is another name for biliousness. It is more serious than most people think. A torpid liver and inactive bowels mean a poisoned system. If neglected, serious illness may follow such symptoms. DeWitt's Little Early Risers remove all danger by stimulating the liver, opening the bowels and cleansing the system of impurities. Safe pills. Never gripe. "I have taken DeWitt's Little Early Risers for torpid liver every spring for years," writes R. M. Everly, Moundsville, W. Va. "They do me more good than anything I have ever tried."

Bradham's Anti-Bilious Liver Pills,

are purely vegetable and act by stimulating the liver, causing increased flow of bile and producing natural movements of the bowels. They do not produce griping or sick stomach. Sure cure for Constipation, Flatulency, Heartburn etc. Price 35 cts. Manufactured by C. D. Bradham, wholesale and retail druggist.

GATHERING OPIUM.

How the Petals and Juice of the Poppy Plant Are Procured.

It is a sort of garden cultivation, the poppy plants being grown in little squares or beds intersected by tiny water channels for irrigation wherever this is possible. The growth of the plants is carefully tended, and at length the time comes when they burst out into flower, and the fields look like a sheet of silver as the white petals of the flowers glisten in the morning dew.

These beautiful petals are the first produce of the crop, for the women and children of the cultivators' families come forth and pick them off one by one and carefully dry them, so that they may serve afterward as the covering of the manufactured cakes of opium. Then the poppies, with their bare capsule heads, remain standing in the open field until it is considered that they are ripe for lancing. The cultivators then come forth in the evening, and, with an implement not unlike the knives of a cupping instrument, they scarify the capsule on its sides with deep incisions, so that the juice may exude.

In the early morning the cultivators reappear with a scraping knife and their earthenware pots, and they scrape off the exuded juice and collect it in their pots. And this is crude opium.—Blackwood's Magazine.

Let The Fences Go.

The dwelling recently purchased by the Ice Company has been thoroughly repaired and painted and presents a very nice appearance, a brick and cement curbing has been built along the front of the premises and a grass plot will be sown. This curbing and grass plot in front of residences are much prettier than fences with open or broken down gates and scraggy shrubbery, and no doubt many others will be made in the near future. Let us hope so.

THE COTTON MILL INDUSTRY.

The cotton industry is assuming more than usual activity as is shown by the erection of new factories and the enlarging of the old ones. Their work alone gives employment to many thousands in this State and is one of the principal industries of the State and is of great interest to everybody. We call from the Tradesman, published at Chattanooga, Tenn., the reports from the mills in this State and South Carolina.

The Erwin Cotton Mill Co. will erect a new mill at Durham which is to be known as Erwin Mill No. 3. It will have 35,000 spindles and 100 looms and will cost approximately \$600,000.

In connection with their mill it is said that there will be built 300 houses for the operatives and all will be built simultaneously. Work will begin at once. It is also stated that the present Erwin mill will be enlarged.

The Linn Mills Co. at China Grove, N. C. has completed its plant.

W. U. Hagood will erect a 15,000 spindle cotton mill at Easley, S. C.

A 17,000 spindle mill will be built at Glendale, S. C. by the D. E. Converse Co.

J. V. Pomeroy and others have chartered the Oberon Cotton Mill at Graham, N. C., capitalized at \$300,000.

P. H. Hanes will establish a knitting mill at Winston-Salem which will be in operation at an early date.

The Randeman Knitting Mill at Asheville is going up rapidly and will soon be in operation.

A \$400,000 cotton mill will be erected at Anderson, S. C. by J. E. Brock, R. E. Ligon and others. This will be devoted exclusively to the manufacture of fine cotton goods.

The Drayton Cotton Mill Co. was recently organized at Spartanburg, S. C. and will begin work on their plant soon.

The Borden Cotton Mill at Goldboro will enlarge their plant and increase their capacity.

The McCreville Cotton Mill at Mooresville, N. C. will double the capacity of its plant.

New machinery has been added to the mill at Lumberton, N. C. increasing its capacity 10 per cent.

The High Shoals, N. C. Cotton Mill Co. will erect a four story building and add 5,000 spindles and 100 looms. The addition will cost \$400,000. Product, brown goods and prints.

The Dover Yarn Mill at Pineville, N. C. has added to its machinery.

Virulent Cancer Cured.

Startling proof of a wonderful advance in medicine is given by druggist G. W. Roberts of Elizabeth, W. Va. An old man there had long suffered with what good doctors pronounced incurable cancer. They believed his case hopeless till he used Electric Bitters and applied Bucklen's Arnica Salve, which treatment completely cured him. When Electric Bitters are used to expel bilious, kidney and microbe poisons at the same time this salve exerts its matchless healing power, blood diseases, skin eruptions, ulcers and sores vanish. Bitters 50c, Salve 25c. at C. D. Bradham's.

Military Crimes.

Hardship and privations do not improve the temper, and insubordination easily supervenes, while the temptation of drink, if it is to be had, is too often irresistible to weak but well meaning men long deprived of such dissipation. Another fruitful source of transgression which, if we care to trust, vague reports, became at times epidemic, was the almost natural surrender to physical exhaustion, says Major Arthur Griffiths in The Fortnightly Review. To sleep on sentry, is one of the most serious of military crimes. It is inexcusable from the military point of view, for the safety of thousands may hang upon the vigilance of one man, yet the strain of some wearisome, long protracted march or fatiguing operations will sometimes explain what cannot be defended.

Nor can we shut our eyes to possible guilt of a more contemptible, if not more flagrant, kind. Misbehavior before the enemy—cowardice, in plain English—is not absolutely unknown in our army. It is wiser, perhaps, to draw a veil over its exhibition and the punishment that must follow, yet we cannot shut our eyes to the certainty of its occasional occurrence.

A Historian's Reward.

On April 5, 1903, John Stow, tailor and historian, died. His minute and painstaking survey can never be overlooked by any one who wishes to know London of the sixteenth century. It contains a wealth of fact and detail and has, moreover, been described as the most picturesque of narratives. At the age of eighty years he was given by James I. as a reward for his many and useful books and chronicles—a license to beg!

"We have been pleased to grant," runs the license, "our Letters Patent under our great Seal of England thereby authorizing him to collect among our loving subjects their voluntary contributions and kind gratuities." When the license had been extended so as to avail for two years, it yielded from a single London parish the magnificent sum of seven and sixpence.

John Stow's monument is a pleasing work in terra cotta on the wall of St. Andrew's underneath. The fire of London that destroyed so much spared the edifice of London's chronicler, so that the posterity for which he labored might photograph it.—London News.

Call at F. S. Duffy & Co's drug store and get a free sample of Chamberlain's Stomach and Liver Tablets. They are an elegant physic. They also improve the appetite, strengthen the digestion and regulate the liver and bowels. They are easy to take and pleasant in effect.

WASHINGTON LETTER

(Special Correspondence.)

Commissioner of Pensions Evans underwent a trying ordeal recently that added to his gray hairs. He is a great stickler for punctuality, and the clerks are required to begin and cease work at the sound of a great gong that can be heard all over the large building.

An electrician was up on a twenty foot ladder repairing a line connecting the commissioner's telephone. He lost his balance and fell. In plunging downward he caught a bunch of wires and carried them with him. Among these was the wire running to the gong. The big bell promptly sounded the alarm for quitting work, although it was then only 3:20 p. m. All the clerks made a bustle to get away without delay.

The commissioner tried to prevent the exodus. He sounded the signal for beginning work, but it did not meet with success. After trying for ten minutes to stop the stampede he gave it up and sounded the signal for closing the day's work, and everybody got a thirty minute holiday.

The commissioner tried to prevent the exodus. He sounded the signal for beginning work, but it did not meet with success. After trying for ten minutes to stop the stampede he gave it up and sounded the signal for closing the day's work, and everybody got a thirty minute holiday.

SAVED FROM MURDER

Just as the curtain fell upon the second act, I felt my arm grasped spasmodically and, turning round to my companion, Earl Hanathon, from whom the grasp proceeded, saw with surprise that a dark, angry flush was growing upon his forehead, while his usually calm eyes were lurid and blood-shot.

"Let us go home," he said hurriedly. "Let us go home at once, Arthur." And as he spoke he arose from his seat. Seeing that he was in no mood to be questioned, I followed him in silence, and in a few minutes afterward we were in our cab, being driven rapidly toward the Astor House.

It required but few words to explain the cause of his sudden emotion. "She was in the house," he said, "in the parquet seats, with Delavau beside her."

I had been Hanathon's groomsman on the occasion of his ill fated marriage. Never did wedding bells chime for a nobler bridegroom, a lovelier bride. He was tall and dark, like a young Spanish Hidalgo, and she, small and exquisitely beautiful, a peerless English girl, with a face that came nearer to my conception of an angel's than anything which I had ever before seen in nature.

It is not my intention to dwell upon the painful and disgraceful details preceding and attending the divorce, which took place in less than four years after the marriage. Suffice it to say that in Martin Delavau, an old and trusted friend, Earl Hanathon found the destroyer of his honor and happiness.

A duel took place between them. Earl escaped unhurt, but Delavau received a wound which was thought at first to be mortal. He recovered, however, and in a short time after the granting of the divorce took himself off to parts unknown, accompanied by the partner of his infamy. When informed of this flight, Earl was heard to say:

"I should have shot him down without mercy and thus have saved her from further sin. Well, well, he has escaped me once. Let him ever cross my path, and I will write myself murderer in his blood."

These words recurred to me as I witnessed the smothered yet terrible wrath with which he spoke of his wife's and Delavau's presence in the theater. I forebode evil, and ere I went to rest that night my mind was fully made up to rise early upon the following morning, seek Delavau and warn him to leave the city. This I should do not from any kindly consideration toward the villain or his paramour, but to save my friend from the commission of crime.

Until the clock struck 12 Hanathon walked the floor of our room, never once looking toward me, but talking aloud in one long, passionate strain. He talked on until midnight, when I succeeded in persuading him to seek his couch. At 1 o'clock he had fallen into a troubled slumber, and my last remembrance as I, too, fell asleep was that of hearing him muttering his dishonored wife's name, coupled fiercely with that of his false friend.

He had made no threats respecting Delavau, but I felt assured that he would do him harm, and so my aforesaid resolution was carried into effect upon the ensuing morning.

I found Delavau, as I had anticipated, informed him of his danger in a few brief, cutting words and advised him to leave as speedily as possible, which he assured me, with an attempt at thanks, that he would do at once.

An unforeseen circumstance delayed my return to the Astor until 11 o'clock. I had just risen and was making a hasty toilet.

His revolver lay upon the bureau. I took it in my hands. "It is loaded," he said, with a strange smile.

"When did you load it?" I asked. "A few minutes ago."

I did not ask for whom he had intended its contents. I knew that full well.

"Earl," said I, looking him steadily in the eyes, "you may be angry with me now, but at some future day you will thank me for what I have done. I have seen Delavau and warned him. He is by this time many miles away from New York."

A storm of curses burst from his lips, but at 12 o'clock he had cooled down sufficiently to eat his late breakfast with satisfaction and appetite.

It is worthy of note that upon the evening of this day he was presented to the young girl who eventually became his wife, brightening his shadowed heart with the gladness of a second love.

Thus my ruse had a double success—that of preventing a murder and being instrumental in securing Earl's lifelong happiness.

His gratitude to me is boundless. His firstborn bears my name, and my place at his table is always that of the honored guest.

Nearly a year ago I pointed out to him the notice of his first wife's death in one of the great western cities. "His eyes grew dim as he muttered: 'It is better so, better so. God have mercy upon her soul!'"
