PROMISING APPLE CROP.

Housewives will be glad to learn that while foodstuffs show a continued advance and summer fruit for preserving purposes has been high there will be such a bountiful apple crop that no "corner" could possibly be created that would advance prices above the minimum commonly found in years when the fruit is abundant and of excellent quality. Reports received by the Chicago Chronicle from all the leading applegrowing sections are extremely flattermany respects than that of 1896.

Few except those in the trade realize the immense growth of the commercial apple area in the United States, to which subject Prof. W. A. "ANY ONE TO BEAT HIM."

The Congressional nomination in the Sixth North Carolina district, which was made last week at Fayetteville, eems to have been one of considerable ocal bitterness, judging from reports.

To one who is and has been familiar it can't help with the politics of this district, and more especially with the men who have been identified with the Democracy of the district, it seems singular that such an expression as "any one to beat him," supported by the effort to a successful conclusion, should have been directed against John D. Bellamy of Wilming-

As a Congressman, it is not shown that Mr. Bellamy, had committed any act, which should have made him a target for Democratic darts of spleen from his people of the district.

Musical Spails.

A French naturalist claims that there are few if any animals which have a higher appreciation of music than snails. Place some snails on a pane of glass, he says, and you will find that as they move over it they will make musical sounds similar to those which a person can produce by wetting his finger and then rubbing it around a glass tumbler. Complete airs, he points out, have been played on tumblers in this way, and he expresses the opinion that quite as good results can be obtained by using snatls instead of fin-
