

A GRUESOME DISCOVERY.

A Skeleton Uncarthed While Digging a Sewer.

Workmen on the sewer extension on not yield readily and on investigating the cause found that the pick had penetrated a skull. A little more careful work revealed the fact that there was a skeleton in those diggings. The bones of the body were so thoroughly decayed part of the skull and lower jaw bone were saved and taken up, and were on exhibition at Mr. C. P. Bartling's barber shop. The teeth were intact and showed that after years, perhaps 125, or even longer they are in a good state of preser vation. They are very large for human teeth and the jaw bone is abnormally large. Dr. Benton, the dentist, says the teeth indicate that they belonged to a man who had not reached middle life as the wisdom tooth had not developed and they were all sound and not a broken one in the lot. What could be gathered from the way the bones lay the person must have been larger than ordinary ac fo and was probably an Indian.

The skeleton was found close to the site of the old palace which was occupled by Gov. Tryon, the Tory governor before the revolutionary war. It is probable that the person was buried before that "palace" was built and that would account for more than 125 years.

An amusing feature of this incident was the way the superstitious negro will exercise his imagination over any such find. "Dar now," said one of the laborers. "didn't I tole yo about de lights which I seen dar; I knowed dar was somebody buried heah." The place will doubtless be regarded by the negroes with their peculiar superstitious dread until the incident is forgotten.

Bradfield's Female Regulator

RADFIELD REGULATOR CO

A Youthful Criminal. At the Municipal court yesterday morning John Moore a strong lusty colored boy of 15 was at the bar of justice on a charge of assault and battery which seemed to show the viciousness of the George street] had a rather unusual find boy's nature as well as anything could. yesterday. While digging the trench six He attacked a negro boy much younger feet below the surface, pickaxe of one of and smaller than himself and pounded the men struck a substance which did him unmercifully on the head with a brick bat. The affray happened on South Front street and was seen by policeman Montague who gathered in the young scrappers.

The smaller boy was taken to a house where his wound was dressed and he that they crumbled at the touch, but a then went to the City Hall and appeared against Moore.

As the assault was with a deadly weapon the penalty could not be administered quart. by the mayor and the boy was bound over to the superior court.

MAITLAND, FLA, October 10th, 1901 The Hancock Liquid Sulphur Co., Baltimore, Md.

Gentlemen:- I have had Eczema over thirty years, have tried many remedies prescribed by various physicians, but to nothing has the disease yielded so readfly as to Liquid Sulphur. I think if used properly it is undoubtedly a speciothers with most satisfactory results. consider it the best remedy for cutsneous affections I have ever known, and regard it as the greatest medical discovery of the age.

Respectfully yours, W. A. HEARD, M. D. For sale at F. S. Duffy's.

As He Called It.

"But why," asked the man ,who al ways wants to know-"why do you call that little jump you make from a tower into the water 'a leap for life? They tell me it is not at all dangerous." "Well," replied the "artist," "don't make me livin' by it?"-Cincinnati

How Coal Was First Named. Curiously, the word coal was in use ncement of the coal trade, with a meaning quite different from that which it now has. The term originally belonged to wood fuel and was applied in particular to wood which had, been charred, or what is now called char-

When the trade in mineral coal b gan, this was usually/distinguished by the singular name of sea coal. It would seem that from having been gathered in early times on the sea-shore, more especially of Northumber-land, along with seawed and other wreckage cast up by the waves, this pscullar substance was supposed to be of marine origin. From this circum-stance and its resemblance to wood coal in color and burning properties it obtained the name of sea coal, by gan, this was usually distingula ain color and purning properties it affined the name of sea coel, by lich it was so long and so widely own. Then in the course of time, the new fuel gained upon and su-meded the old, the simple name of all became universally transferred

A DARING ROBBERY.

Thief Breaks Into W. T. Hill's Store and Steals \$30, in Cash and two Revolvers.

Between the hours of 9 and 9:30 Thurs lay night some one broke into the rear room of W. T. Hill's bicycle shop and stole \$30, from the till and also two

It is certain that the deed was done in the time mentioned because the shop was closed at 9 o'clock and Mr. Hill returning from the lodge at 9:30 found the money drawer on the floor and the show case open. The window was raised where the burglar got in and the door open where he left. The fact that the door was open makes Mr. Hill think that the thief stole a bicycle which was being repaired but that can not be

That the thief must have been familiarly acquainted with the store lies in the fact of the system with which he worked. Upon entering the store he went to a remote place and took an old target rifle from which the stock had been removed and pried the drawer open with one of the iron prongs. Mr. Hill says that it is very peculiar that an utter stranger should work with such rapidity and find the very tool to work with when it was in the most obscure place in the store. He must certainly have taken his bearings well while the store was open.

Mr. Hill engaged the help of the Chief

and two policemen to run the robber down but was unable to get a clue.

Mr. Hill thinks that undoubtedly he would have been shot had he arrived there while the man was at work as he had probably armed himself before looting the till and was ready to defend himself should he be caught.

The robbery was one of the most daring that has occurred here in many months and it is not likely that so clever a rogue will be caught very easy.

Tobacco News.

The Planters had another break yesterday, and some of the finest tobacco on an average that has been offered was knocked down at prices that were very pleasing to the sellers.

Other towns boast of big prices, but it so happens that when a farmer sells his tobacco on this market once, he usually comes back again, and a dissatisfied seller has not been seen here yet.

One farmer yesterday at the Planters warehouse, was paid 25 cents per pound for a lot of 800 pounds. How's that?

Scuppernong grapes are now plent!ful and they sell for five cents the The city is having an extension made

to the sewer on George street, from Pol, lock to South Front St. Hackburn had a beautiful fruit exhib-

it at his store yesterday. It was admired by every one who passed along. The Chicago Stars, the female base ball team played at Kinston yesterday

and were defeated by a score of 8 to 5. A farmer from Jones county, said yesterday, that cotton had begun opening Kitchener's troops sang it in the Suin his neighborhood, and that picking dan. It will be sung so long as men

The Smyrna, Delaware club, with Symons and Daum, as battery, in a game of ball played Wednesday defeated its opponents, 38 to 0, only three hits being made off Symons.

There will be no New York market Sunday or Tuesday and no Chicago market on Tuesday. Monday being labor day and a legal holiday the bulls and

bears will take a day off. What the public is most interested in. is not the hot air street exhibitions of the "old timers" and the "kid" base ball players, but to see an actual game between the two tesms at Athletic Park.

The fire department people were testing the old Silaby engine at the foot of Craven street yesterday. It is a good plan to keep the fire engines in good repair, for on an emergency they might be badly needed.

What is the matter with the city's electric lights? Complaints are being heard on every hand of the arc lights being out at night, and the incandescent are miserable, as bad in fact as the old lights used to be.

While there are a few cases of male rial fever, or chills and fever, around long before as well as long after the town, yet for the time of year it is unu sually healthy here. More so, really than the sanitary condition of the city would seem to warrant.

The summer pleasure seekers are slowly drifting homewards. Every day now, sees arrivals, and the stay-at-homes are having their inning listening to wonderful narratives, and viewing kodak pictures of beautiful places.

Master Ernest Dunn will be pleased to see his friends at 150 Middle street at 5 o'clock Monday afternoon when he will have his monkey do some of his many tricks. The intelligent little animal has been taught many cute tricks and does them well. Admission five cents.

The A. & N. C. people are having their power boiler put in position in the new power house at their shops here. While awaiting the placing of boiler and engine, old No. 2 locomotive, an-chored near by is very industriously furlishing steam to drive the machinery of

Mr. D. R. Davis received a beautiful onyx soda water fountain yesterday which was made by the Tufts Company, of Boston. It is one of the hands fountains in the city. A WISH.

I see the boy who graduates Stand up before the crowd; His collar's very, very tall; His the is very load. He sees his parents sitting there As proud as they can be, And there's another, too; his breast Is filled with restay.

I see him raise his good right hand And wave it in the air; I hear the big, uncommon words Boil from his lips up there; He draws himself up proudly, and His face with pleasure glows. I wish that I knew half as much 'As this boy thinks he knows.

As this boy thinks he knows.

—Chicago Record-Herald. PEOPLE OF THE DAY

Jules Verne as a Prophet. Considerable interest is felt in the recent utterances of the popular' French author Jules Verne to a London newspaper man. The man who has written a hundred volumes of fiction now prophesies that in fifty or a hundred rears there will be no more novels written, at least in volume form, to No,"

JULES VERNE

he said, "I do not think there will be any novels. They will be supplanted altogether by the daily newspaper, which has already taken such a grip on the lives of the progressive nations. As for the novel psychological, that will soon cease to be and will die of inanition in your own lifetime."

M. Jules Verne is in his seventy-fifth year, but is still full of life and energy. He has for some time, however, been suffering from cataract, which prevents him from doing much work. He hopes to benefit from an operation in the near

The American Bandmaster. "All over the world." said Bandmaster Sousa recently, "nothing goes like popular music. I can 'size up' my audience, as a general thing, before l have finished my second number. I gave them Wagner in Berlin. They liked it. But when, as an encore, I played one of my own marches or an American popular melody the applause was tremendous. They pick up our tunes too. In Sorrento, on the Fourth of July, I heard an Italian band play John Brown's Body,' and they played it in far less ragged fashion than they did one of my own marches.

"Most of our national melodies have been derived from foreign sources, but 'John Brown's Body' and 'Marching Through Georgia' have not. 'Glory, Halleluiah,' originated as a Sunday school hymn in Charleston, S. C. march to war to military music."

"Mother" Jones, Agitator "Mother" Jones was found guilty of

violating an injunction by Judge Jack son of the United States court at Par keraburg, W. Va., the other day, with several men who had been urging or ganization as a branch of the United

MRS. MARY ("MOTHER") JONES. Mine Workers upon the coal miners of the region. Sentence in the case of

"Mother" Jones was postponed. "Mother" Jones was born in Cork, Ireland, and is fifty-eight years of age, When eight years of age, she came to America with her parents. She was educated in Toronto and early developed unusual talent as a debater and ublic speaker. She taught for a time and then married George Jones, a nolder. Becoming interested in the labor movement through her husband's onnection with the union of his trade she took up the study of the labor ques tion. After six years of married life she became a childless widow, her husband and four children falling victims to yellow fever all within one week. She soon thereafter took up the work of organizing women's auxiliaries to the labor unions and in recent years intered the broader field of agitation among all classes of work people, but especially among the coal miners. Her nection with the agitations in Pennsylvania coalfields during the past two or three years is well known.

An artist who was formerly well mown in New York, but who is now working in London is E. J. Kins When he left New York, he went to his old home in Ireland.

"What will be your address?" a friend asked him before his departure. "I may want to write to you." "Oh," was the answer, "just make "Oh," was the answer, "just make it "Kingelia, Ireland!" That will be all that's needed."

Then, after a pause, he added: 'No, you better make it 'Young Kinselia.' My father might get it."

THE TRIAL OF LOVE

She had promised herself for life to man whom she had met only a few days before. These days had passed like a dream, in jest and laughter, without another thought than the pleasure of the moment. To be sure, she had suspected how it might end, but not that it should happen so soon. And not tilathe promised word was spoken did she awaken out of her dream.

The drawing room clock ticked harder than usual that afternoon, and Elsfe kept looking up from her work to notice how the hands flew. It would soon strike 6. But just before the stroke she cast her embroidery away from her, sprang up and rushed out without anwering her mother's astonished ques-

Only a few steps beyond the garden she met him. He was punctual to the minute and beamed with joy becaus heicame out to meet him. But when she passed the gate and proposed to him to walk s'little farther he looked at her in surprise. She did not appear very anxious to introduce her lover to heg family.

Elsie hastily led the way across th field and up the hill. She threw herself down pn a mossy stone under the spruces, and he stretched himself on the heather beside her. The stone was large enough to hold two, but she did not make room for him.

"Are you yery sure," she began, you really, really sure that you love breaking a dry twig into tiny bits-"are

At first he looked serious, but then burst out laughing in his bright, jolly "Sure of it? But there is surely no

one who has forced me to say it!" "No. But you don't know me. What is it about me you love?" "Everything." He loved the folds of

her dress, he loved the flower she wore on her breast, and he did not understand that under each question to him lay a question to herself, "What is it I love in him?"

But why should she be the only one to doubt and worry? And so to disturb his composure she began to set forth her faults. She unveiled every mad trait she had. She was quick tempered and a scold; she was envious and coquettish; she was stupid and ignorant. She sat and reckoned herself up in a serious voice; she spoke frankly, and she honestly wished to be believed. But the smile did not leave his lips nor did he take his eyes from her face. At each new confession he simply repeated:

"Yes, I knew that before." Finally the blood rushed to her head. It annoyed her to find she could not convince him. He sat there in the secure belief that she wished only to humble herself because of her great happiness. Could he not comprehend at all that he had done wrong in surprising her as he had and that a person cannot be sure of love so loosely rooted?

She knew of a way to make him understand, but her tongue seemed tied when she tried to speak. She sat silent for a few minutes, struggling between fright and the desire to have it out. Finally the desire triumphed.

"No, you do not know me," said she When I answered you as I did this morning, it was because-well, not wholly because but perhaps partly because—because of hardships at home." There was a crackling of twigs. He had turned on his arm and was gazing was gone from his face. She need worry no longer about his not understanding.

There came over her a feeling of unspeakable regret. With a few words she had destroyed something she could never get back again. And this some thing, now it was lost, seemed dearer to her than all else in the world. She did not know him well. She had not succeeded in getting an answer to the question what it was she liked in him. but the power that first drew, her to him rose now in redoubled might. The divine, incomprehensible mystery, she had tried to explain, but only succeed ed in silencing, awoke to life within her again. And now, it was stoodlate, What could have the power to efface her words?

"Ah, you are afraid of hardships!" His voice sounded heavy, and his eyes looked far away over the broad meadows visible through the opening n the trees.

"Then it would be best for you to reonsider," he continued. "I am a busiess man, and my position is not firmly secured. One day there may be money
