## A Monster Crab.

"The largest crab in the world," says Chines paper. "has been sent from Japan to the American Museum of Natural History. Its body is about the size of a large dinner plate, and its two great arms would go around a man. The longest measurement of the whole is twelve feet. The jointed limbs resemble bamboo and carry spines and hooks as well as claws. The crab is said to disguise itself to imitate the sea bottom by sticking pieces of sponge and seaweed on its body with a glutinous saliva."

**Big Auto Race In America?** New York automobilists believe it to be not impossible that next year's race for the international cup won by

S. F. Edge, an Englishman, on the course of the Paris-Vienna contest, may be run in this country. British automobilists, great though their pride is in its possession, are finding the championship trophy somewhat of a white elephant. The laws of the United Kingdom are very stringent against peeding on the highways. British chauffeurs also express little hope that special legislation can be obtained to permit the running of the race in Great Britain, as is their privilege as holders

of the cup. In the face of this hopeless condition of affairs and the disinclination of Englishmen to hand over the conduct of next year's championship race to any of the continental countries, the United States has been suggested repeatedly in the British automobile press and by leading racing men, including S. F. Edge, the cup holder, himself, as an available place for next year's contest. The Englishmen assume that the necessary permission can be obtained from our government and state authori-

# RUTCH-BO The crutch is a poor substitute for legs, and

inconvenient and tiresome mode of locomotion - there is no pathetic sight than a person slowly and painfully moving along the street supported by these artificial limbs.

When Rheumatism settles in the bones and muscles of the legs, it is safe to predict that the victim will eventually become helpless and crutch-bound. The corrosive, irritating matter that is deposited in the joints and muscles causes the most intense pain, the knees and ankles swell, and when the natural oils and fluids that lubricate these parts are completely destroyed the joints become locked and the muscles drawn and stiff, and crutches a necessity

The acid poisons that produce rheumatic pains form in the blood, and are distributed through the system, and lodged in the arms, shoulders, hands, back and feet, or other parts of the body-resulting often in total disability. A permanent cure of Rheumatism can be effected only by a complete cleansing of the blood, and no other remedy so surely accomplishes this as S. S. S. It neutralizes the acid effects, purifies and invigorates the stagnant blood, and the gritty particles are washed out or dislodged

by the new rich blood, and relief comes to the pain-racked sufferer. S. S. S. leaves no morbid, irritating matter in the blood to reunite and produce another attack, but expels every atom of it from the system. S. S. S. is a purely vegetable remedy, and does not impair the digestion or general health like alkali or potash remedies.

Write for our special free book on Rheumatism, and if any medical advice or other information is wanted, our physicians will gladly furnish it without charge. THE SWIFT SPECIFIC CO., ATLANTA, GA.
