The process seemed to be to the uninitiated writer putting the stock in a bath of brine and constantly stirring them and adding to and taking away the brine. Great care is taken in keeping the bath at a certain strength and a testing glass is used to determine its accuracy. The process is tedious and somewhat slow, but withal cleanly.

Suicide in Wilmington.

William H Bobbitt, a citizen of Marion, N. C. committed suicide in the lobby of the Orton House in Wilmington, Tuesday morning. Bobbitt was about 47 years of age, and no cause can be assigned for the act except that heavy drinking the past few days may have caused despondency. His brother, James M Bobbitt, of Marion, who was here with him, says he cannot ascribe any cause for the deed. The two Bobbitts had been there since last Friday. The suicide left the deak in the hotel lobby and sat down on a settee. He placed the muzzle of the pistol to his right temple and fired, the ball passing entirely through his head and killing him instantly.

It is said that Dr Charles W Dabney, of the University of Tennessee and for years North Carolina's State chemist, is more than apt to be made president of

the University of Virginia. The attendance at the State Liquor Dealers and Distillers Convention, in session here, is the largest on record, members say. Both deslers and distillers are deeply stirred by the situation which the Watts Liquor Bill has p'aced them in, and by the knowledge that the great fight against liquor is growing in strength daily. It is said that the sale of liquor is now permitted at not more than 100 places in the State, and this number is more than apt to be largely decreased, and that soon.

The criminal term of Wake Superior Court at which the Ernest Haywood case will be tried begins July 13th, and Judge Peebles will preside. It is thought that it will take at least a week to dispose of

this notable case. State weather observer C F Von Herrmann says there are now in North Carolina 54 voluntary observers and 400 crop correspondents, there are also 11 regular stations. There are now only four river stations, at which there are State vs Wilcox, from Perquimans, no gauges. One of these is on the Cape Fear at Fayetteville, the three others being on the Roanoke at Danville, Clarks ville, and Wilson. Stations are needed on the Tar River at Tarboro and on the Neuse at Goldsboro. Mr Von Herrman only has jurisdiction over those streams which flow into the Atlantic in this

State. Speaking about the disaster in South Carolina, observer Voa Herrman said that so far as he can discover there has never been a cloud burst in North Carolina The floods of 1901 were due to general and excessive rains and were the orst in many years, but there was noth ing like a cloud burst, while in South Carolina there seems to have been a genuine cloud burst as the immense mass of water can be explained in no other

way whatever.
