EXPORTS TO AMERICAN POSSES-

SIONS. Secretary Wilson of the Agricultural Department, has some tables, which

show the exports from the United States, to the Philippines, Hawali, Porto Rico, Alaska and Cuba to amount to \$55,000,-000 for the fiscal year just closed. To Porto Rico there went nearly \$12,-

000,000 worth of goods, to the Philippines a little more than \$4,000,000, to Cuba over \$20,000,000, to Alaska \$9,250,-000 and to Hawaii \$10,750,000.

The exports to Cuba fell off from \$25,-000,000 in 1902, though in 1898 they amounted to but \$9,500,000.

The exports to the Philippines are about \$1,000,000 less than in 1902, and are the same as in 1901. The increase from 1900 however, is marked in that in that year they amounted to a little more than \$2,500,000.

The chief point of interest in these figures would appear to be, that the exports do not show any encouraging features, in the way of increase.

In the way of domestic efforts from this country, the per centage in favor of agricultural products leads all the rest.

The exports during the fiscal year ended June 30, 1903, from the United States were divided under several heads, with per centages of each as follows: Agriculture, 62.72 per cent.; manufactures, 29.32; mining, 2.79; forests, 4.15; fisheries, .56; miscellaneous, .46 per

THE ABUSES OF VACATION.

At this period of the year, when so many people are taking an outing or vagetting away is given more consideration, than the question and study of benefits to be gained by a week or longer away from home.

With too many people a vacation means everything except actual rest and recreation, it is a frantic endeavor to cover as many miles as possible, in a lim ited number of days, and at the same time to see as many different sights as | ful results in curing Catarrh. Send for can be looked at, while on the rush.

A summer's vacation, an absence from home, ought to mean, a change of scene, with mental and physical rest, or a period of recreation, with a moderate expenditure of the vital forces, and the securing of mental food through sigh seeing, and physical development through the change of habits from those carried on at home

Taking a vacation for a "rest," requires an intelligent forethought if the "rest" is to be realized, for first of all it is necessary that every thought of home affairs, be it of the office or of the household, be laid aside for the time, as if they did not exist.

The selection of place for "rest", demands intelligent fore-thought, for the physical needs should be the judge, to select some spot where scene and climate will charm away all cares and worries, and give a healthful loafing period, when the desired "rest" can be secured.

Those not needing the physical relaxstion, which is described as a "rest", but needing a change of scene and surroundings, must also leave business and house hold cares behind, and taking place of these home affairs, the sights and incidents, which abound on a trip which includes traveling and stop overs along

Such a vacation does not demand frantic hurry to make it truly beneficial, and here intelligence is required that the route shall be selected with care, so that the mental exhibaration and the physical enjoyment shall be held in equal re-morbus, by taking Chamberlain's Stom p, each atimulating without

INCREASE APPRECIATION OF PUBLIC SCHOOLS.

Two factors, which will prove of inestimable future value to the public schools of Eastern Carolina, are the raising of the standard of teachers examina tions, and the improvement of the school house and its surroundings.

The raising of the standard of teachers

And the better school buildings, with improved surroundings, certainly mean an increased expenditure of either physical effort or money, or both.

MODES OF THE MOMENT.

Drawn work, lace applique and insertion are certain features of white stocks and collars.

The blouse that buttons in the back and has the collar built on it is the best liked model for a trimmed waist. We do not hear much about silk mitts, but the wearing of them is permissible this summer. They come in eight and twelve button lengths

Skirts of fine india linen to be worn under the fine white summer gowns are marvels of elaboration and are richly trimmed with lace, ribbon run beading and tucks.

Oyster white is the latest oddity in names for tints of color. It is that peculiar gray hitherto seen in floor linens, and irregularly woven flaxen products displaying it are now used for shirt waists and costumes.

Linens of all kinds are still the favorites for both morning and simple afternoon summer gowns, but old fashloned French percale, which is one of the most serviceable cotton materials ever made, is being widely employed for tub dresses.

Save the Children.

Ninety-nine of every one hundred diseases that children have are due to dis orders of the stomach, and these disorders are all caused by indigestion. Kodol Dyspepsia Cure is just as good for children as it is for adults Children thrive on it. It keeps their little stom achs sweet and encourages their growth and development. Rewards For Lost Property. "More lost and stolen articles would be recovered if the losers would adopt different methods in advertising for their property," said a headquarters detective the other day. "Of course honest persons do not haggle over th remuneration for returning a locket, dog or anything else. But every one is

not built along those lines. It may sound very nice to say, 'Liberal reward if returned to owner,' but there are different ideas of liberality. The sum usually dwindles in the mind of to Dr King's New Life Pills they put an the owner when he sees his property before him, and no one knows this better than the finder. "It is far more effective to set forth

a definite sum in the advertisement Five or twenty-five dollars means mor than a vague promise to be real ger erous. Of course there are cases who it is not wise to be too explicit, but in nine cases out of ten a stated sum wil bring better results than an indefinit offer. This is nearly always true with watches with the owner's monogram engraved on the case, as the pawn broker refuses to loan so much on ar-ticles so easily identified."—New York
