150 South 5th Street.

No remedy equals S. S. S. as a cure for Scrofula. It cleanses and builds up the blood, makes it rich and pure, and under the tonic effects of this great Blood Remedy, the general health improves, the digestive organs are

strengthened, and there is a gradual but sure return S strengthened, and there is a gradual but sure return to health. The deposit of tubercular matter in the joints and glands is carried off as soon as the blood is restored to a normal condition, and the sores, erup-tions and other symptomy of Scrottla dimension tions, and other symptoms of Scrofula disappear.

S. S. S. is guaranteed purely vegetable and harmless; an ideal blood purifier and tonic that removes all blood taint and builds up weak constitutions. Our physicians will advise without charge, all who write us about their case. Book mailed free,

THE SWIFT SPECIFIC CO., ATLANTA, GA.

Nativity of the Pothto. There is as much mystery as history connected with the common tuber called the potato. Its nativity, original place in the kingdom of nature and several other things regarding it are still open questions. As to its nativity, the weight of argument seems to favor the tropical or subtropical regions of America. There is a tradition that the vines once grew to monstrous size and that the "balls" were of the "bigness of melons," and at that time the roots were not tubers, the edible parts growing among the branches. It seems that they were first introduced into Europe

in the year 1565 Haskell's "Roots and Wild Plants" says, "Wamkins first fetched a queer, bulbous root out of America which some called a 'bodado,' while others, ering 10,000 acres in Illinois. He who had heard the Peruvians mention knows every foot of it, what it should it, spoke of it as a potato." Periam's produce, and sees that it produces ev-Cyclopedia of Agriculture says that Sir John Wamkins found it growing wild near Santa Fe de Bogota at an altitude of 8,000 to 13,000 feet. He also says that it was "fetched out of America" at about the time settled upon by Haskell-viz, in the year 1565.

#### A Royal Romance.

Carmen Sylva, the royal authoress, met her husband, the king of Roumania, in quite a romantic way. As n girl of seventeen she was running down the staircase of the palace at Berlin when her foot slipped on the marble. and she would have fallen to the floor below, but at the moment Prince Charles of Hohenzollern stepped from an anteroom and caught her in his arms. She did not accept him, although he made her the offer at once. In joke -for it was then most unlikely-she said she preferred to remain oneen of herself, but if she became queen of any country at all she would prefer Roumania. Eight years afterward the beautiful Carmen was married to Prince Charles, who had been proclaimed king of Roumania, and thus she relized her ambition.

When Water Was Avoided. Until comparatively recent times there was a medical prejudice against

in his "Natural and Artificial Directions For Health" declared that water "ought seldom to be drunk." Another doctor admitted that it might be healthful for children, but not for men -"except some odd, abstemious one among a thousand perchance, degenerate and of a doggish nature, for dogs of nature do abhor wine." Indeed, the recommendation of water as a beverage was supposed to be the sign of the quack. Even Wesley in his "Primitive Physic" wrote of it with caution: "Drink only water if it agrees with your stomach; if not, good, clear small eer."

A Queer Dog.

Dagonet in the Referee tells a story of two little girls who were trying to explain what sort of a dog it was they had seen. Said one little girl, "It was one of those funny ones; you know, the ones that are a dog and a half long and half a dog high." Said the other: "You must know the sort. It's a dog that only has four legs, but looks as if it ought to have six." It may interest Dagonet to hear of a fairly apt definition that a Public Opinion man once heard applied to the dachshund-"the dog with the Louis XIV. legs."
