Put Blame Where it Belongs.

There is considerable complaint especially after a heavy rain about the condition of the sidewalks. Often times there are puddles ankle deep and pedestrians have to cross the road to avoid them. It is very annoying.
Many people are disposed to blame the city authorities for this neglect when in reality it should be put upon the property holders. In the majority of places where the buildings are near the sidewalk, conductors are seen discharging the waste water on the sidewalk making depressions and filling the walk with water. In many other ways the property holders should be held responsible for the bad condition of the walks and not the city.
Now that the disagreeable season is at hand when this feature will be more common than ever, it should behoove all property holders whose sidewalks are more or less submerged, to repair this fault and thereby bring the blessings of the pedestrians on their heads.

A Beautiful Sunset.

The sunset last night was the most beautiful that has been witnessed for many years. The first impression was that a big fire was raging but the extent of the glow made that impossible. The redness spread far up in the heavens and it lingered many minutes gradually dying away with the orb as it went out of sight.
The sunsets of late have been exceptional for their beauty and intense glow. They are regarded by some people with a feeling akin to dread, and they are enough to inspire one with awe. They are an almost certain forerunner of cold weather and also a high wind.

A. B. Baxter's Cotton Letter.

New York, Nov. 13.
Although the weather has long since ceased to be of great importance, a good deal of attention is given to temperatures and these today were the subject of no little comment. The lowest temperatures of the season were reported all over the South and more especially in the Southwest. There was a good rise in Liverpool and bears were rather nervous because the market suddenly turned strong today when everybody expected a big break. It seems hard to keep prices down while the general feeling is so bullish, and while it is possible that we shall witness many breaks, it is expected that the market will rapidly recover. Powerful interests are favoring the bull side and it is useless for the weak bear element to attempt to oppose them, prices started at a rise of 1/8 to 3/8 points on moderate trading. Receipts were full but not excessively so, and there was a good deal more disposition to buy than sell, especially as the bears report two weeks hence is expected to be quite bullish. The market went off during the morning on New Orleans weakness. Yesterday buyers took profits. Manchester was steadier for yarn and firm for cloths. Freezing weather was forecasted on the Atlantic States. Port receipts 80,000 against 59,000 last year.

A Youthful Beggar.

A good many citizens have been approached by a small colored boy begging for a penny. He is accompanied by two other older boys who are "pals" and he tells them a pitiful tale about having no "fadder or mudder." "She aise of the boy at once causes a feeling of sympathy in the breast of the one touched, for it is in more senses than one a "touching" appeal.
What to do with the youthful beggar is a question. He is not over six years old and without doubt his story is without the least semblance of truth in it. He is too young to arrest or to punish in any stern way and yet he is being encouraged in a very pernicious practice. His case should be investigated and if his story is true, he should be provided for; if not should be punished.

Issued to Wilmington, New Bern and Onslow Railroad by Counties Along its Line.

Special to Journal.

Why Not Resign?

Another attempt was made last night to get together enough of the Aldermen to form a quorum so that some important city affairs could be acted upon.
But like several previous attempts no quorum was present, and there was no business transacted.
If Aldermen cannot attend meetings, how can the City's affairs receive the attention that is demanded? For what are Aldermen elected?

Women are admitted under the same conditions as men. The cost for board, room and registration fees is but thirty dollars. The instruction will be worth ten times the cost of the course. Farmers Attention!

The American and Imperial Tobacco Companies have instructed their buyers to refuse all tobacco not properly graded. This order is effective every where and will be obeyed to the letter.

The grading by the farmers will insure them better prices and will make the handling at the local market and by the manufacturer much easier.

Tobacco growers should heed this suggestion and act accordingly.
