WHAT IS ENOUGH, FOR MR. BRYAN.

It would seem as if there might be some point in William Jennings Bry an's political life, when he could say that he had had enough, for the public statement made by Mr Bryan, that he was not a presidential candidate is not a sufficient political withdrawal, when Mr Bryan places his disapproval upon every man who may be named as a possible presidential nomince, and further, publicly announces what should be the action of the National Democratic convention, at its next meeting, especially when such a party policy has proven disastrous in the past, and does not meet the approval of Democrata to-

It is not that Mr Bryan needs to force himself, or feel that unless he takes an arbitrary position, he will be forgotten given the greatest latitude, and his really

often been excused upon some ground As the last National Democratic Presidential candidate, Mr Bryan is entitled the final triumph of the great cause for to the greatest courtesy, and be given re spectful hearing. This has been gener- curity and political ascendancy; but i ously accorded him. At the present time, the Kansas Ctiy platform represents the last and only public declaration of the National Democratic party. Therefore this platform is effective today, although it may not call for public if the governor is chosen from this attention, or be quoted as in force to region. The eastern Democrats have, we believe, the opportunity now to make govern future Democratic actions.

failure as a leader. And in spite of his gion. two failures those who have supported him have given him every recognition enough for Mr Bryan, and it is far from generous, considering the party favors hitherto shown him, or patriotic, if he has the future success of democracy at heart, for Mr. Bryan, to continue to arbitrarily say who is or who is not to be the next Democratic Presidential nominee, or to make public declarations as to what the National Democratic party must say in its platform at the St. Louis Convention in July.

There is a limit to this taking advantage of his position, on the part of Mr. far more importance than any one man or a dozen men, who may impede Democratic progress, and he will be wise to heed, lest he lose all party favor and regard, by a continuation of his personal ultimatum on what the party shall do. for it is not for a single individual to de cide for the party.

NEW BERN'S EDUCATIONAL EXAMPLE.

Naturally, and quite reasonably, the example which New Bern sets must have its positive effect upon the rest of Craven county, whether it be in morals, educationally or commercially.

In this connection, the question of how and what example is New Bern setting, in its educational life, and is it one which can be profitably followed by the rest of the county, is an important

The Journal does not believe, in considering one institution of learning, that the New Bern Graded School is perform low the full educational duties which an institution of its character ought to be capable of doing. The first serious factor is the over crowded rooms, and added to this over crowdedness is the lack of proper equipment in the class

many months ago the subject of additional school quarters were discussed. and the public was practically if not acald be ready last Fall. That has most dismaily failed of realization, and no equal. This has given rise to numthe creeffor of the school instead of a new and proper school building, is Doffy.

THE WEEKLY JOURNAL crowded into poor quarters over a practically condemned theatre building, and to reach these quarters it is necessary to way, a menace to those who must pass

> It is not that there is no money to remedy and correct in order to make the School or educational property of value to those seeking its precincts to be taught, for there are resources which could readily be used to properly equip this School as it's needs justly demand, and such as this community is entitled

What such a school condition upon the lesser and smaller schools of Craven county must be, is evident to every one It makes it impossible for those who could and would go to the county schools, under better New Bern conditions, and assist in their betterment, acriptions and an immediate response to for they cannot with any good grace or notice wal be appreciated by the courage attempt such work, while their home conditions are as they are to-

> Postponement in this matter of having the proper accommodations and equipment for the New Bern Graded school ought not to continue for one day. Action is demanded, an action which means results, for unless there be advancement in the affairs of this School, there is certain to be retrogres sion, and this must not be permitted, for educational advancement is demanded if this city is to go shead, morally o socially, in its industries or its commerce and commercial growth;

A POLITICAL PLEA FROM WEST-ERN CAROLINA.

The esteemed Asheville Citizen in a recent editorial, presents calmly and dispassionately a plea why the next guber natorial nomination in North Carolina should go to the Western section of the State and urges General Davidson as the man for the nomination.

The citizen says:

The political issues for the past ten years have made it very difficult for us to maintain our ascendancy in the west especially on this side of the mountains or ignored by his party, for he has been It would not be proper on this occasion to go into the causes contributing to this condition. It is sufficient to recall unnecessary public utterances have been the fact that the emergency of received without special criticism, and western Democrats should always be in the front of the battle-a position they gladly accepted and bravely maintained While their ranks have been thinned which, with the Democracy of the east-they contended, has insured social sehas imperilled the political situation of their bretbren of the West. They mus now set about the task of recovering their lost ground and that must be undertaken in the front of the stronghold of the common enemy. It is needles to point out the enormous advantage i will be to them and to the entire party a gracious recognition of long, faithful, unselfish devotion to the welfare of the other sections of the state; and to build Bryan has demonstrated that he is a up a permanent control of this fair re-

The Journal cannot see that its es teemed western contemporary is at all and honored him. This ought to be presumptuous in asking political recognition in this matter of the governorship There is no argument needed on the question of the character of the gentleman named, General Davidson, who would worthily represent this State in any position which might be tendered him, and there would seem a political fitness in giving the far western section a political recognition in this gubernatorial matter, and no doubt at this time such a recognition, in giving that sec- Cured After Suffering 10 Years. tion the governorship, would prove wise policy, in its influence upon future Bryan, for Democratic interests are of political exigencies which are now certain to arise.

But is the Democratic party of North Carolina at present seeking wise political policies, or taking any heed of its future? If it is there is no outward sign of it, for it is in power, unhan, pered by any other party, which may even threaten its present office holdings. There is no political cloud in the horizon which may portend that a distur bance may come from outside. At pres ent it is sufficient unto itself, and its leaders see nothing to warrant serious consideration as the Asheville Citizen suggests, or the sacrifice of possible office holdings, on the part of those who believe they can name, and therefore secure the election of the men whom they shall ask to be nominated for State

The Democratic leaders in this State. even with a political power which appears to have neither present nor future imitations, cannot afford to be heedless or indifferent, and certainly the plea from the Citizen is entitled to every just and fair recognition, and a consider ation which may now be more hidden than our esteemed contemporary
