 The Oil King's Body Guard.
 The newspaper correspondents from Southern Pines tell of John D. Rockefeller, the Standard Oil man, being at this resort, and playing golf and enjoying the climate.
 They also tell that the Oil King is constantly surrounded by secret service men who act as a body guard to protect Mr. Rockefeller from any possible assaults.

 Young Men Make Changes.
 The many friends of Mr. J. A. Worthington, who has been with the Davis Pharmacy here are sorry to have him leave the city. Mr. Worthington is now with the Sanitary Pharmacy Co. of Wilson, N. C., and he carries with him the best wishes of a host of friends.
 Mr. Joe Fultford left last night for Atlanta, Ga., where he has accepted a position with the firm of Messrs E. C. Atkins & Co. The best wishes of his many friends go with him in his new business associations.
 Mr. George Watson of Southport, has accepted a position at Davis' Pharmacy. He comes highly recommended in every way and will be welcomed to the city by all who meet and know him.

Nearly Forfeits His Life.
 A runaway almost ending fatally, started a horrible ulcer on the leg of J. B. Orner, Franklin Grove, Ill. For four years it defied all doctors and all remedies. But Bucklen's Arnica Salve had no trouble to cure him. Equally good for Burns, Bruises, Skin Eruptions and Piles. 25c at C. D. Bradham's Drug store.

OLD CHUM— What made you decide to marry her?
 Newly Married—Because during our long acquaintance she never once sent me a sofa pillow.—Detroit Free Press.

TO CURE A COLD IN ONE DAY
 Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature on each box 25c.

 The Goose and Gridiron.
 There existed in London long before the great fire in St. Paul's churchyard a very popular music house called the Miter. Here concerts were held, and the music at these performances had at least the merit of volume and joyousness. But the great fire laid the building in ruins and banished the music. When the place was rebuilt, the new tenant, wishing to ridicule the character of the former business, chose as his sign a goose stroking the bars of a gridiron with her foot and wrote below, "The Swan and Harp." At the Goose and Gridiron St. Christopher Wren presided over the St. Paul's lodge of Freemasons for over eighteen years, and he presided to the lodge the towel and mallet with which he laid the first stone of the cathedral. The goose is still preserved with her unmissable "harp" in Guildhall.—Julian King Colford in St. Nicholas.

Baby Mine
 Every mother feels a great dread of the pain and danger attendant upon the most critical period of her life. Becoming a mother should be a source of joy to all, but the suffering and danger incident to the ordeal makes its anticipation one of misery. Mother's Friend is the only remedy which relieves women of the great pain and danger of maternity; this hour which is dreaded as woman's severest trial is not only made painless, but all the danger is avoided by its use. Those who use this remedy are no longer dependent or gloomy; nervousness, nausea and other distressing conditions are overcome, the system is made ready for the coming event, and the serious accidents so common to the critical hour are obviated by the use of Mother's Friend. "It is worth its weight in gold," says many who have used it. \$1.00 per bottle at drug stores. Book containing valuable information of interest to all women, will be sent to any address free upon application to **MOTHER'S FRIEND CO., ATLANTA, GA.**

SWANSBORO.
 Feb. 1.
 Mr. Gilbert, the Journal man was in to see us last week. We were glad to see Will.
 Rev. W. E. Cowan, Unitarian Minister of Pender county, has rented the T. M. Woodhill residence here, and will move next week with his family.
 Mr. Harley Baldwin, of Whiteville, Columbus county, has accepted a place with Mr. D. H. Russell on his farm near here.
 Capt. George Smith of the steam yacht Eagle, from New York, came in here last Thursday disabled. The Eagle shipped a heavy sea off Bogus Inlet, and lost her propeller, and was towed in to Swansboro by the steamer tug, Vancoboro, Capt. J. Parkin, all safe, minus propeller damage, and some broken rods. She will have to be towed on to Wilmington, N. C., for repairs. She had a crew of 8 men and passengers bound for Miami Fla.
 Mrs. Bryant Bell, had another severe attack of nervous epileptic fits or spasms last Tuesday night and came near dying.
 Dr. Blount attended, and after a few hours she revived, and is getting along very well at this writing.
 The fish catch this week has been very large in the mulllet fish.
 No trout nor drum fish to speak of, the mullet sell all the way from 10c to \$1.25 pr. hundred lbs.
 Mr. D. H. Russell bought about 5,000 lbs yesterday for compost, paying \$4.00 for the 5,000 lbs, fish dealers not wanting them.
 We hope the next Legislature will stop the catching and destroying these little fish.
 The saw mill has gotten on time again two steam tugs busy all the time hauling logs, when the still low tides will admit.
 Mr. J. F. Prettyman, President of the Swansboro Lumber Company has gone to Philadelphia this week to see his parents.
 It seems to us that the Onslow county pension board does some queer things, or some curious, queer things have been done along that line, and the board don't seem to know about it, at least say they don't. A certain man has been drawing a small pension for a few years. This last year his name was taken from the pension list by our county pension board, so the State Auditor says and he got "hit." We inquired into the matter as best we could, but can't find the reason why he was dropped, the county board say they don't know anything about it, and the State Auditor says they are the ones that did it. We hope there has been some mistake, and if so, may be righted.
 Hog, hominy, sausage and potatoes are the go down here now, Dan Russell, Dan Ward, Sr., Will Davis and Emory Rogers are our fresh hog and sausage dealers, but Dan Russell keeps in the lead in the sausage line, that of making 850 lbs of good sausage without cutting up a single hog from one killing of 50 hogs.
 West Stanley says his black mule ran away the other day and climbed a tall tree, with four men and a cart hanging to him (the mule), and he (Stanley) had to cut the tree down to get his cart, the mule and men fell out. Dr. Nelson Blount says, his black horse ran away last week and tore his load into 1,000 pieces.
OLD SOLDIER.
 Have You Indigestion?
 If you have indigestion, Kodol Dyspepsia Cure will cure you. It has cured thousands. It is curing people every day—every hour. You owe it to your self to give it a trial. You will continue to suffer until you do try it. There is no other combination of ingredients that digest and build at the same time. Kodol does both. Kodol cures, strengthens and rebuilds. Sold by F. S. Duffy.

Habit of Nonconformity.
 In the study of the lives of seventy-three persons more than ninety years old living in the city of Dresden, Saxony, it has been discovered that all sleep in closed rooms at night and abhor bathing and all sleep eight or nine hours daily. They vary in some of their habits, but these three—plenty of sleep, avoidance of drafts at night and of bathing—are common to all. The conclusion of the government investigation points to these as essential elements of the secret of old age.

When you feel blue and that everything goes wrong, take a dose of Chamberlain's Stomach and Liver Tablets. They will cleanse and invigorate your stomach, regulate your bowels, give you a relish for your food and make you feel that in this old world is a good place to live. For sale by all Druggists.

Escaped an Awful Fate.
 Mr. H. Higgins of Melbourne, Fla., writes, "My doctor told me I had Consumption and nothing could be done for me. I was given up to die. The offer of a free trial bottle of Dr. King's New Discovery for Consumption, induced me to try it. Results were startling. I am now on the road to recovery and owe all to Dr. King's New Discovery. I surely saved my life." This great cure is guaranteed for all throat and lung diseases by C. D. Bradham, Druggist, Price 50c and \$1.00. Trial bottles free.

Mother's Friend
 Every mother feels a great dread of the pain and danger attendant upon the most critical period of her life. STORY OF AN OYSTER
 TOLD BY HIMSELF ABOUT HIMSELF AND HIS TRIBE.
 The Trials and Tribulations of the Successful Bivalve From the Time of Planting Until His Appearance on the Fishmonger's Counter.
 There were about 900,000 of us when, as tiny flakes of spawn—or "spat," as the oyster spaw is called—we floated out into the water one day on "the flats."
 At first we were white and apparently lifeless. Then we turned gray and finally black. At this stage we became visible alive. For several days we floated, the sport of waves and tides. Some of my brothers were carried out to sea and so vanished; others were swallowed by fish. At last we all began instinctively to sink toward the bottom.
 Then began again terrible destruction. Many fell on mud—the most fatal thing a young oyster can do. These perished at once. Others attached themselves to plants and weeds which grew at the bottom of the sea. They lived for a time so long as the plant remained alive. Then, when the plant died, they perished as well.
 Fortunately for myself, I drifted on to a bit of "cutch"—that is to say, one of the old shells which the dredgers and oyster men so carefully scatter all over the sea floor of an oyster bed. I settled with my deep shell upmost and my flat or right shell nearer the ground. At the time I did not know why I did this. I have since realized that it was because in that position I should be more easily able to eject the sand and grit which a rough sea sometimes stirs up in shallow water. I attached myself firmly to my anchorage of "cutch" and felt myself at last fairly started in life.
 Soon I noticed that every single morsel of shell or stone around me was tenanted by tiny oysters, all lying in the same position as myself and all firmly anchored.
 There I lay, unmoving, for nearly a year. Food, in the shape of tiny animalcules, which an oyster loves best, was plentiful. When the water was thick with it, we all opened our shells wide, and making currents in the water by means of the tiny hairs which fringe our gills and which men call our beards, we washed the dainties into our mouths. Our choicest delicacies were the minute green algae, which give to full grown oysters that greenish tinge that is the mark of the aristocratic native.
 When I first anchored myself, I was but the twentieth of an inch in diameter—so small, indeed, that a microscope would have been necessary to examine me. At that stage my shell was perfectly transparent.
 At the end of ten months I had increased in diameter to fully the size of a dime and become what is called "dred." During all this time I had been learning many things. I found out that it was necessary to close my shell tight when dangers of various kinds threatened, when the tide was low or, in winter, when frost was severe. You may perhaps imagine that an oyster is a creature of such low organism that it cannot see or feel much of what is going on round about it. But you are wrong. The mantle fringe of an oyster is very sensitive. If you watched us from a boat in calm water, you would see that the mere shadow of the boat as it passed would cause those of us upon whom it falls to close our shells immediately.
 It was necessary to be most careful. Dangers were many and terrible. Sea urchins prowled among us and devoured many. But of all our foes the worst is the five fingered starfish. One of my sisters, anchored not a yard away, fell a victim to this terror of the oyster beds. It clutched her with its long fingers. She closed her shell. But the creature was not to be shaken off. Hour after hour it clung there until on the second day after its first grip she, poor thing, opened her shell to get a mouthful of food. At once the starfish injected into her a fluid which stupefied her so that she could not close again. Then the monster turned itself inside out, shot itself into the open shell and devoured her.
 Then, one day a year after I had floated as "spat" came a startling change in my existence. Something huge and heavy came out of the shadow of a boat above and approached, rasping and grating along the bottom. It was a great triangular dredge of wrought iron. At the bottom was a flat bar with a blunt edge, known to the dredgers as the "bit."
 As the "bit" approached it scraped the bottom of the sea clean, and next instant I, too, found myself lifted and dropped into the net, together with hundreds like myself and a miscellaneous collection of small shells and other things.
 One of the men sorted over the catch and, having selected all the oysters and spat, "shaded" the rest back into the sea through a porthole.
 I, in company with enormous quantities of other brood, was put into a "wash"—a measure holding five and a quarter gallons—and reared. Here life was less eventful and food most plentiful. To fatten well an oyster must have a certain amount of fresh water.
 In this snug retreat I passed from brood to half ware and from half ware to ware, or full grown oyster. But I still went on growing and developing, until one day the dredge swept me up again, and I was raised once more into the upper air and rapidly brought in.
 I was then dropped into a large bag and suspended in a tank of fresh sea water, which is constantly renewed. There I await my final fate, which will, I fear, be a fishmonger's counter.—New York News.

Water's Service in Fertilizing.
 The mechanical effect of plowing in green crops is not in the plant food they add to the soil so much as in the mechanical effect the vegetable matter has upon the soil, making it more porous and enabling it to retain more moisture and hold it longer. All of our richest virgin soils are made so by the successive growths of grass or other plants that have been incorporated with the soil annually for long periods of time. Our bottom lands are more fertile than any other. They have been fed by annual crops of forest leaves and fallen timber and also by repeated freshets that leave, as often as they occur, a thin stratum of sediment rich in both mineral and vegetable substances that help plants to grow. Vegetable matter, being specifically light, readily rides on floating water, and when this water flows over the level expanse and evaporates or soaks into the soil the mineral plant food held in solution and the vegetable matter combined with the water are left to enrich the land for future generations of farmers. Water is the great vehicle of fertilizing elements.—Farm and Ranch.

Government Collects and Sells Eggs.
 In connection with the system of government creameries the Canadian department of agriculture has adopted the plan of collecting eggs from the farmers of the territories and holding them in storage. It worked well the first season and has improved ever since. The plan adopted is as follows: Each creamery patron has a number in pencil on all the eggs he supplies. No driver will accept the eggs without the number being on. These eggs are sent from the creamery in refrigerator cars with the butter to the storage at Calgary, where the eggs are examined and classified by an expert.
 The department advances 15 cents per dozen on the eggs at the time they are received, and later the farmer gets the remainder according to the classification. This year the average price to the farmer will be about 20 cents per dozen for the season, or fully double what could have been obtained locally.

Oats as a Feed.
 Some one objects to my classing of dried brewers' grains as equal to oats as a horse feed. I merely quoted from the New Jersey experiment station and would add that my limited experience would indicate that such is a fact. While some chemists claim that oats contain a stimulating principle that acts on the motor nerves, others have failed to find any such principle or compound and deny its existence. So while the doctors disagree we can do no better than use our experience and best judgment in the matter. Oats are a splendid horse or dairy cow feed, but when not to be had or to be had only at a prohibitive price we should try to find a good substitute if possible.—L. W. Lighty in Stockman and Farmer.

Seed Adulteration.
 The seed investigations of the department of agriculture have shown that large quantities of trefal and other practically worthless seed are being imported for the adulteration of alfalfa and other seeds. About 450,000 pounds of Canadian blue grass seed are imported, the chief use of which is to adulterate the higher priced Kentucky grass seed.
Warm Water For Cows.
 At the Wisconsin experiment station it was found that cows given warm water drank eight to ten pounds more per day than when supplied with cold. In one trial cows given warm water produced 6 per cent more milk than those given cold, while in another trial the difference was only 1 per cent in favor of warm water.
Relief in One Minute.
 One Minute Cough Cure gives relief in one minute, because it kills the microbes which tickle the mucous membrane, causing the cough, and at the same time clears the phlegm, draws out the inflammation and heals and soothes the affected parts. One Minute Cough Cure strengthens the lungs, wards off pneumonia and is a harmless and never failing cure in all curable cases of Croup, Colds and Whooping Cough. One Minute Cough Cure is pleasant to take, harmless and good alike for young and old. Sold by F. S. Duffy.

ONE WAY OUT.
 A Resident of New Bern Shows the Way.
 Only one way to cure a bad back. Liment and plasters may relieve it. They won't cure it. Backache means sick kidneys. Doan's Kidney Pills cure all kidney ills. New Bern people prove this. Read a case of it: J. H. Curtis, plumber of 71 Craven street, residing at the end of Neuse bridge, says: "I suffered with a weak back which started from a wrench I gave by back when seventeen years old, and it has troubled me ever since, sometimes so badly I could not work. I seemed to lose all use of my back at times and was hardly able to stand, and could not straighten to save my life, especially when I took cold. I never thought about it coming from my kidneys. I used plaster after plaster and liniments without number but without permanent relief. I saw notices about Doan's Kidney Pills and was induced to go to Bradham's Pharmacy for a box. They are a backache pill beyond doubt. I used them and have not had my former pains and my back has become well and strong. You can use my name as one who endorses the claims made for Doan's Kidney Pills and I am glad to have you do so." For sale by all dealers. Price 50 cents a box. Foster-Milburn Co., Buffalo, N. Y., sole agents for the U. S. Remember the name—Doan's—and take no other.

HINTS FOR FARMERS
 Keeping Manure.
 Where experiments have been made to compare exposed and unexposed manure (as was done at some of the experiment farms) it was demonstrated that there was a greater loss of nitrogen and organic matter from exposed manure than from that protected. The former lost one-third of its nitrogen and the latter about one-fifth. Ten per cent more organic matter was destroyed in the exposed than in the protected manure. There is practically no loss of potash and phosphoric acid from protected manure. Exposed manure that is rotted may lose about one-sixth of its phosphoric acid and somewhat more than one-third of its potash. The chief changes, due to fermentation, take place within the first months of rotting, and experiments show that there is no apparent benefit in rotting the manure longer than for a period of three months. When gypsum was used three tons of horse and cow manure, mixed in equal proportions, were allowed to ferment without the addition of any preservative, by way of comparison, with an equal weight of the same kind of manure intimately mixed with ground gypsum (land plaster) at the rate of fifty pounds of gypsum with every ton of manure. These lots were fermented at the same time in separate bins inside of a building. The manure being fresh and compacted as closely as possible, being undisturbed for four months, when they were weighed and analyzed. The results at the Canadian experiment farms show that gypsum retarded to a certain extent the destruction of animal matter. The amounts of nitrogen in both lots were the same, no useful results from the application of gypsum being observed. The proper place to use gypsum is in the stable, as it is in the stable that a great loss of ammonia occurs.

Harlowe and N. Harlowe.
 January 30th.
 The fullest Sunday school last Sunday for several months at Harlowe. Mrs. Maggie Taylor has returned to her home at New Bern.
 Mr. Thompson the new manager of the E. C. L. Co. mill is here this week.
 Miss Roscoe Mason is on the sick list this week, is therefore not teaching.
 Mr. D. H. Hanks spent last Sunday in New Bern.
 Miss Charlotte Taylor is visiting relatives here.
 The telephone poles are being gotten for a line soon to be erected through our community.
 There has been placed in our cemetery a very pretty monument to the grave of Mr. Emory B. Ward, also a nice double slab in the grave of Roman and Ernest Conner the two boys of Mr. Sam Conner who were drowned during last year.
 Miss Alice Adams of Vancoboro, is visiting her uncle, Mr. Joshua Adams at this place.
 Mr. Jas. F. Smith of Bechtelom—was in our here yesterday doing some chipping.
 Messrs. J. W. Taylor, C. D. Taylor and G. Taylor went to Therman Wednesday, where they were called by the illness of their sister Mrs. J. B. Conner.
 Mr. and Mrs. J. R. Bell spent Wednesday of this week with Rev. F. S. Beaton of Bechtelom.
 Mr. J. S. Morton is spending a few days with relatives at Riverdale.
 Mr. J. H. Davis spent Tuesday in New port where he made an exchange on one of his driving horses for a mule to work on his farm.
 Mr. Jasper Bell who visited relatives in upper Craven county last week is again back.
 Messrs. Samuel Conner and G. B. Small were in Newport on business last Monday.
 Our main truckers Messrs. J. Adams and J. S. Morton are planting peas this week.
 Mr. J. H. Davis left for New Bern today where he goes to sell cotton and on other business.
 Horse traders, commercial men and lightning rod men have been plentiful this week.
Cure's Rheumatism and Catarrh—
 Medicine Sent Free.
 Send no money—simply write and try Botanic Blood Balm at our expense. Botanic Blood Balm (B. B. B.) kills or destroys the poison in the blood which causes the awful aches in back and shoulder blades, shifting pains, difficulty in moving fingers, toes or legs, bone pains, swollen muscles and joints of the rheumatism, or the foul breath, hawking, spitting, droppings in throat, bad hearing, specks flying before the eyes, all played out feeling of catarrh. Botanic Blood Balm has cured hundreds of cases of 20 or 40 years standing after doctors, hot springs or patent medicines had all failed. Most of these cured patients had taken Blood Balm as a last resort. It is especially advised for chronic, deep seated cases. Impossible for any one to suffer the agonies or symptoms of rheumatism or catarrh while or after taking Blood Balm. It makes the blood pure and rich, thereby giving a healthy blood supply. Cures are permanent and not a patching up. Sold at drug stores, \$1 per large bottle. Sample of Blood Balm sent free and prepaid, also special medical advice by describing your trouble and writing Blood Balm Co., Atlanta, Ga. A personal trial of Blood Balm is better than a thousand printed testimonials. So write at once.

Children's Weight.
 Some curious experiments have been made at one of the royal philanthropic institutions in Copenhagen. For some years back the seventy boys and girls in the place have been carefully weighed every day in groups of fifteen and under. Thereby it is proved that the children gain weight mostly in autumn and in the early part of December. From that time till the end of April there is scarcely any increase in weight. More remarkable still, there is a diminution till the end of summer.

Now, you pay your dealer at least \$1.25 a bottle for whiskey that cannot possibly be any better than HAYNER. It is good, or \$1.25 a gallon. If you buy HAYNER WHISKEY you save at least \$1.00 on every gallon. We sell two gallons for about the same as you pay for one gallon of probably poorer whiskey. Just think that over and remember that HAYNER WHISKEY goes direct from our distillery to you, carries a UNITED STATES DISTILLERS' GUARANTEE of PURITY and AGE and saves you the dealer's enormous profits. That's why it's so good and so cheap. That's why we have over a quarter of a million satisfied customers. That's why YOU should try it. Your money back if you're not satisfied.

Cotton is Almost King Again.
 At the price in prospect you can afford to fertilize it well, if you want the BEST—
Use Meadows Great Cotton Guano.
 Insist on having that kind, and you will not be disappointed in your crop.
 For Tobacco—
Use Meadows Gold Leaf Tobacco Guano
 It makes good, slick, tough tobacco. November 1903 one plant sold 1,432 pounds of tobacco for \$511.00. He used Gold Leaf.
Special High Grade Fertilizers for all crops
