Plastico" SANITARY WALL COATING.

Plastico is NOT a hot water, filthy give Kalsomine. It is a finely powdered rock, in white and beautiful tints to be mixed with cold water, Any one can brush it on. Plastico has the peculiar property of cementing to the wall, destroying disease garms and vermin and never rubbing or scaling. Kalsomine has no cementing property—depends entirely on glue to make it stick. The glue soon rots, nourishing vermin and germs of deadly diseases and the stuff rubs and scales off, spoiling walls, clothing and furniture. Wall finishes that must be mixed with hot water are Kalsomines, no matter what fanciful names they bear. Refuse these unhealthful mixtures and by Plastice in 8 lb. packages only, erectly labelled. Sample card of Plastico thins free.
