HUMANE LAWS MUST BE OBEYED

Drivers of Hacks and Drays Will Suffer in the Courts if They are Cruel to Their Animals.
There seems to be considerable agitation about cruelty to animals. It is high time some steps were being taken to put a stop to the practice of brutal masters inhumanely driving and beating their horses. There have been seen on the streets doing a work that would be hard for many a stronger animal, horses and mules which it would be a mercy to shoot. It mattered not whether the horses were lame or sore, if they could drag a load after them without falling down they were in condition to work. This has been too much the case but we are glad to see a sentiment being aroused which inhuman drivers are punished.

The case of Charles Harris who was in the police court Monday morning on this charge was an instance of hard driving. He was observed to be whipping his horse and causing it to become ugly and balky. While on East Front street he was remonstrated with by two ladies and he spoke in insulting and abusive language to them.
That is only one case. They are occurring every day and two or three stiff fines may be necessary to remedy this evil. The transfer horses show a little better care than they did receive but there are dray horses still on the street that should be pensioned. These animated bone heaps are no credit to the humanity of the city.
In line with this appeal it might be in order to suggest that when horses are hitched on the street for any considerable time it will be to the drivers' interests as well as the animal's comfort to hitch in the shade whenever possible. The horse is not without some liability to injury by the rays of the hot August sun. Remember that a "merciful man is merciful to his beast," and whatever of kindness is shown to the dumb animal is returned in faithful service.

"Sap Head."

A Warning to Mothers.

Too much care cannot be used with small children during the hot weather of the summer months to guard against bowel troubles. As a rule it is only necessary to give the child a dose of castor oil to correct any disorder of the bowels. Do not use any substitute, but give the old-fashioned castor oil, and see that it is fresh, as rancid oil nauseates and has a tendency to gripe. If this does not check the bowels give Chamberlain's Colic, Cholera and Diarrhoea Remedy and then a dose of castor oil, and the disease may be checked in its incipency and all danger avoided. The castor oil and this remedy should be procured at once and kept ready for instant use as soon as the first indication of any bowel trouble appears. This is the most successful treatment known and may be relied upon with implicit confidence even in case of cholera infantum. For sale by F. S. Duffy and Davis Pharmacy.

We sell and recommend this preparation." For sale by F. S. Duffy and Davis Pharmacy.

Made in the Golden Sunlight

It is conceded by the highest authorities that the soda cracker contains the life-giving elements of wheat in the best proportions.

This being so, then **Uneeda Biscuit** must at once take first place as the food of the world—a soda cracker, but such a soda cracker! Made by exact science in sunny bakeries so light, bright and clean, that they are a revelation. The flour is tested; the purity of the water is absolutely assured; the very air is filtered,—why even the temperature and moisture of the atmosphere is accurately regulated. The sponge is kneaded by polished paddles, not by hand. Indeed, **Uneeda Biscuit** are only touched once, and then by a pretty girl, from the time the flour leaves the bag until the beautiful package is placed on your table.

You ask why all this work, all this care in the making of a soda cracker? Because the soda cracker is the best of all food and **Uneeda Biscuit** is the most wonderful of all soda crackers. And with all of it the price is only 5¢ a package.
