RAILROAD OFFICIALS PROMOTED

storests of the Atlantic & North Carolina and of the Norfolk & Southern to Be Clasely Connected.

News and Observer 12th.

ming within the next few days ag Atlantic and North Carolina Railroad officials who will be advanced and also at least one official of the Norfolk and Southern Railroad, which latter road is now controlled by the same,

Fred L. Merritt, who is already General Land and Industrial Agent of the Atlantic and North Carolina Railroad. will become General Land and Industrial Agent of the Norfolk and Southern and his authority will extend over the lines of both companies, and while his headquarters will be at Norfolk, still much of of his time will be spent at Goldsboro where the general offices of the Atlantic and North Carolina are

located. R. E. L. Bunch, who is in charge of the traffic of the Atlantic and North Carolina will have become traffile manager of the Norfolk and Southern Railroad, his authority being extended to the lines of that company in addition to his present territory. His headquarters will be also at Norfolk, but his time will be divided between Norfolk

H. C. Hudgins, who is now general freight agent of the Norfolk and Southern Railroad with headquarters at Norfolk where he has directed the business of these two departments of that road for many years, will also become general freight agent and passenger agent of the Atlantic and North Carolina Railroad and his time will also be divided between the two lines.

No official announcement has been made as yet, but it is learned from Norfolk and Goldsboro that preparation for these changes are under way and the announcement will be made by circular within a few days.

This, it is authoritatively stated, will not affect the general offices of either company. One will remain at Norfolk and the other at Goldsboro, with M. K. King as general manager of the Norfolk and Southern and R. P. Foster as general manager of the Atlantic and North Carolina.

Marsden Perry is president of both of these companies and F. S. Gannon is vice-president of both and their attention is given to both companies. The other officials of the two companies are not affected by the circular that is to be issued and the general office work of each will be continued in the future as in the past.

Mr. Merrett, Mr. Bunch, and Col. Hudgins are well known in the railroad world and are popular throughout North Carolina. All three promotions will call for many congratulations.

#### STOP THAT NOISE

### es in The Early Morn Co

The Journal is constrained once more to register a protest against the screech ing of saw mill and steamboat whistles before sunrise. There is an ordinance against the practice and for a time the guilty parties were fairly decent about it, but they have got back to their old tricks and together with the accomplishment of their purpose they make the citizens indignant because of the nerve torturing noise.

Thursday morning one whistle blew at exactly 5.40 o'clock in the morning. True, some people were up and stirring but for the most part of the good citizens were in bed endeavoring to get one more nap before mingling with the cold world. They have been known to bolw as early as four o'clock; at any rate hardly a morning passes unless it be Sunday morning but the atmosphere will be agitated by the horrid shricks of the steamboat whistles before dawn. It is an insufferable nuisance and if it can be stopped the proper means should be used to enforce it.

LIEUTENANT BOWMAN

—Attack Was Severe. Chas. W. Bowman, 1st Lieut, and Adjt. 4th M. S. M. Cay. Vols., writes from

Cold Affected Head and Throat

Lanham, Md., as follows: "Though somewhat averse to patent medicines, and still more averse to becoming a professional affidavit man, it seems only a plain duty in the present instance to add my experience to the columns already written concerning the curative powers of Peruna.

"I have been particularly benefited by its use for colds in the head and throat. I have been able to fully cure myself of a most severe attack in forty-eight hours by its use according to directions. I use it as a preventive whenever threatened with an attack.

"Members of my family also use it for like ailments. We are recommending it to our friends." -Chas. W. Bowman.

Ask Your Druggist for Free Peruna Almanac for 1906.

Marriage of Consumptives. The marriage of the tuberculous is perhaps frowned upon by all physiclass, the majority of whom would no doubt advocate the prohibition of such unions. It is considerable of a sur-

prise, then, to learn that Dr. Charles Valentino of Paris has declared that these marriages are destrable. He bases his opinion upon the well known fact that the disease itself is rarely if ever transmitted and that there is an immunity possessed by many of the offspring of the tuberculous. He shows that, though this infection is more frequent about the age of twenty, its appearance in those of tuberculous par entage, if they acquire it at all, is ty. He acknowledges that where one partner alone is infected the other is contaminated in 16 per cent of the

somewhere between thirty-five and fifquite high, particularly where both parents are tuberculous, but he thinks that these disadvantages are far outwelghed by the advantage of breeding up to race of immunes.-American Medicine

A Record In Red Tape. As long ago as Dec. 6, 1877, a young French doctor sent in an application for a small post under government Another man was appointed to the post, and the doctor, having received no answer to his letter, forgot all about the matter. He was therefore more than a little surprised a few days ago to receive an official document which he was required to fill up in order to get a nomination for the position he had applied for nearly eight and twenty years before. But while the officials had been leisurely replying to his letter the doctor had become a man of importance in the world and has long since ceased to think of such trifles az a small government berth. - London Tatler.

A Composition. Here is a boy's composition, said to be genuine. His subject was "The Seasons:" "There is four seasons spring, summer, autumn and winter Some people may like spring best; but, as for me, give me liberty or give me

I travel from the town of To
Upon the road to Pro,
For I have nothing else to do,
No other place to go.

And when I have the town of Fro I seek the town of To And Journey day and night, although I never wear a shoe.

And ever back and forth I stray: The road is all my own, I need no triend upon the way. But always walk alone.

I work for others hard and late,
From toll I never swerve.
Tet hanging seems to be my futs
And all that I deserve.
—Youth's Companion

We have never heard of a single in stance of a cold resulting in Pneumonia or other lung trouble when Foley's Honey and Tar has been taken. It no mly stops the cough, but heals and trengthem the lungs. Ask for Foley's Honey and Tar and refuse any substitute offered. Dr. C. J. Bishop of Agnew, Mich., writes: "I have used my's Honey and Tar in three ver-ere cases of passumonia with good alta in every case." For sale by

POWER OF WATER.

The Great Force a Six Inch Stream

Imagine a perpendicular column of water more than one-third of a mile high, twenty-six inches in diameter at the top and twenty-four inches in diameter at the bottom, writes Hamilton Wright in The World Today. Those remarkable conditions are complled with, as far as power goes, in the Mill creek plant, which operates under a head of 1,960 feet. This little column of water, which, if liberated, would be just about enough to make a small trout stream, gives a capacity of 5,200 horsepower, or enough power to run a good sized ocean going vessel. As the water strikes the buckets of the water wheel it has a pressure of 850 pounds to the square inch. What this pressure implies is evidenced by the fact that the average locomotive carries steam at a pressure of 190 or 200 pounds to the square inch. Were this stream, as it issues from the nozzle, turned upor the hillside, the earth would fade away before it like snow before a jet o steam. Huge bowlders, big as city office I, would tumble into ravines with as little effort as a clover bur is car ried before the hydrant stream on a front lawn. Brick walls would crackle like paper, and the hugest skyscraper crumble before a stream like that o

the Mill creek plant. It takes a powerful waterwheel to withstand the tremendous pressure. A Butte creek, California, a single jet of water six inches in diameter issues from the nozzle at the great velocity of 20,000 feet a minute. It implinged on the buckets of what is said to be the most powerful single water wheel ever built, causing the latter to trave at the rate of ninety-four miles ar hour, making 400 revolutions a minute The six inch stream has a capacity of 12,000 horsepower. The water for operating the plant is conveyed from Butte creek through a ditch and dis charged into a regulating reservoir which is 1,500 feet above the power house. Two steel pressure pipe lines thirty inches in diameter conduct the water to the power house.

Labels on Opera Boxes. One of the duties of the ushers in the Metropolitan Opera House which the ushers of other places of amusemen are not called upon to perform is to see that the boxes in the grand tier have the proper names of their lessees affixed to them on the various nights of the week. After every performance the ushers go around from door to door, taking out the names of the lessees for that night and slipping into the brass frame the name of the man or woman who has the box for the next performance. Thus on Sunday and Saturday nights most of these brass frames are without names, for only s few persons who are in the "subscrip tion" class ever hold their boxes on

those "off nights." When a man or woman owns a box on the parterre floor outright, as in th case of the directors of the company, their names are engraved on polished brass plates that are never removed. This enables persons who place importance on such things to announce that they had "J. Plerpont Morgan's box last night."-New York Press.

Perhaps the most astonishing fact connected with this astonishing situation is that no one knows who it is who orders the atrices and revolts and directs the revolution throughout Russin as a conductor directs some great orchestra-first calling for strength or fury in one direction, then hushing it down for a time; then again calling for a fresh outburst of energy in some new place, but always controlling and playing at will with each wild passion as it is aroused. Not a name has emerged through the tumult. We only know that somewhere in the center of the storm must be a directing brain or brains.-London Spectator.

#### HIDDEN DANGERS.

Nature Gives Timely Warnings That No New Bern Citizen Can Afford to Ignore.

DANGER SIGNAL NO 1 comes from the kidney secretion. They will warn you when the kidneys are sick. Well kidneys excrete a clear, amber fluid. Sick kidneys send out a thin, pale and foamy, or a thick, red, ill-smelling urine, full of sediment and irregular of

DANGES SIGNAL NO. 2 comes from the back. Back pains, dull and he avy or sharp and accute, tell you of sick kidneys and warn you of the coming of dropsy, diabetes and Bright's disease. Doan's Kidney Pills cure sick kidney and cure them permanently. Here's

New Bern's proof: L. A. Smith, Superintendent of Crystal Ice Co., 19 Griffith street, residir g at 13 Griffith street, says: "I used Doan's Kidney Pills for my kidneys and back. The secretions from the kidneys were all out of sorts, and too frequent in section. Doan's Kidney Pills stopped all this. My little boy was troubled with a kidney weakness and the secre-tions were highly colored and full of tions were highly colored and full of sediment. I gave him some of the pills and they cleared the ascretions up to their/natural color. I cannot but consider Dosin's Kidney Pills an excellent kidney cure and do not hesitate to say so. I obtained them at Bradham's Pharmacy."

For sale by all dealers. Price 50 cts. a box. — Foster-Milburn Co., Buffalo, N. Y. sole agents for the U. S.
