Work on the Roper mill is progressing well. Large trains containing machinery and other material are arriving daily and the work of assembling will commence in a short time. Eight large boilers are at the plant, which indicates the enormity of the enterprise contemplated. Tracks and tramways have been built over the yard and it will be a veritable hive of industry. The dry kiln is well under process of construction but the planing mill has not been started yet.

Mr. Thos. Harvey, this morning, showed an idle crowd the first silver dollar he ever owned and which was preserved for him in a very novel manner. When he was four years old an uncle gave him the coin which he lost and although diligent search was made it could not be found. Last summer the porch of the old home place was being repaired and the dollar was found lying on a sill. On side—"tails" is as bright as when coined, owing to it being down on the sill, while the "heads" side is badly discolored. The coin remained in its hiding place just 42 years. It is dated 1850.—Kinston Free Press.

### COMMON SENSE.

Lead most intelligent people to use only medicine of known composition. Therefore it is that Dr. Pierce's medicine, the maker of which print every ingredient entering into them upon the bottle wrapper and also its composition under seal, are daily crying in favor. The composition of Dr. Pierce's medicine is open to everybody. Mr. Pierce being desirous of having the search light of investigation turned fully upon his formula, being common to all, and being the only one of the kind, he has printed the more will help exact curative merits be recognized. Being wholly made of the active medicinal principles extracted from native forest roots, by exact processes original with Dr. Pierce, and without the use of a drop of alcohol, triple-refined and chemically pure glycerine being used instead in extracting and preserving the curative virtues residing in the roots employed, these medicines are entirely free from the objection of doing harm by creating an appetite for either alcoholic beverages or habit-forming drugs. Examine the formula on their bottle wrappers—the same as sworn to by Dr. Pierce, and you will find that his "Golden Medical Discovery," the great blood-purifier, stomach tonic and bowel regulator—the medicine which, while not recommended to cure consumption in its advanced stages (no medicine will do that) yet does cure all those catarrhal conditions of head and throat, weak stomach, torpid liver and bronchial troubles, weak lungs and hang-coughs, which, if neglected or badly treated lead up to and finally terminate in consumption.

Take the "Golden Medical Discovery" as time and it is not likely to disappoint you if only you give it a thorough and fair trial. Don't expect miracles. It won't do supernatural things. You must exercise your patience and persevere in its use for a reasonable length of time to get the full benefits. The ingredients of which Dr. Pierce's medicines are composed have the unqualified endorsement of scores of medical leaders—better than any amount of lay, or non-professional, testimonials. They are not given away to be experimented with but are sold by all dealers in medicines at reasonable prices.

### The Kinston Excursion.

There were 82 fans went to Kinston yesterday to witness the rubber game. A special train was chartered and left New Bern at 2 o'clock. They went in fine spirits and used up many yards of red and black ribbon to show their color. The trip was bootless however, for the game was called in the second inning one man on second base, one man down and no score made. They were almost deluged in one of the most terrific downpours of rain ever seen. It came up suddenly and but for their being well protected in the grand stand would have been drenched. Some returned on the regular train at 9:15 but others came on the special at 8 o'clock. The New Bern baseball team came on the special. They are ready to play Rocky Mount.

The return of the New Bern team, opens up three games on the home grounds, the first being played yesterday. Four hundred of the faithful turned out and rooted, and kept cheerful, when the game looked dead. It takes the optimist to be cheerful when a ball game is lost by errors. So far as the game was of local interest, it was all in the last inning, though in the sixth Celey's hit, the first for the locals, his clever steal of second and third, a good slide home, when Devlin fumbled McCory's hit, scoring the first run for New Bern, aroused the local enthusiasm. But the ninth, with the score 5 to 1, McCory the first up hit safely. Dekin struck out, but Clement hit safe, as did Guerrant, Thompson and Smith. The result was two runs. But Rocky Mount braced up when Guerrant was caught trying to steal second, and Webster failed to connect, and the game ended with two on bases. For Rocky Mount Devlin in the first hit to Webster who failed to handle. Courtney struck out, but Hill's hit past second scored Devlin, Hill going to second on the return of the ball from the outfield. Stevenson failed on Mill's hit, and Hill who had gone to third on Raymond's out, scored. In the fifth, Guerrant made a good stop and throw of Devlin's hit, but Thompson muffed. Devlin safe at second, on Smith's poor throw. Hill hit safe to center, and on Raymond's hit to third, McCory made bad throw home. Devlin and Hill scoring. In the sixth, Webster failed to handle Anderson's hit. Devlin got four balls, and Anderson ran in on Courtney's safe hit.

Guerrant's playing was the feature of the game. Webster out pitched Price, in number of hits. Smith's back stop work was fine. The visitors were fortunate in not having the bombardment begin until the last inning. If it had started earlier, there is no telling what might have happened. New Bern was easy all the time until the ninth but one more hit would have sent the Railroaders into a siding and smash up.

Kinston 12; New Bern 5.  
Rocky Mount 3; Tarboro 2.  
Washington 8; Wilson 4.

Special to Journal.

Kinston, June 25.—The game here today, with New Bern, must be set down, as officially a contest, but it was wild. It was all over in the first inning, when a series of mistakes gave the local team, seven runs. The visitors were never in it, and the game abounded in errors, and long hits. Gov. Glenn and the educational board who were in the city, looked at the game. What they thought of it was not expressed.

Mr. W. H. Molton is all smiles. It's a boy, we've seen him.

Our people are somewhat backward about adopting improved farming implements. Some of them have never even seen a riding plow. As we were cultivating some corn a few days ago with our new machine, an acquaintance came along, was astonished to see us riding about among the plants in what he took to be a two-horse cart and asked us what we were hauling. Showed the operation, of the cultivation and its work, he seemed to be much affected, observing very solemnly, "General this world is surely coming to an end, right away. People are getting too smart."

It is estimated that 10,000 pigeons live inside of the downtown loop district of Chicago.

A Notable Addition to Staff.

It will doubtless interest hundreds of our farmer readers to know that Prof. W. F. Mansey, so long and successfully identified with the Practical Farmer, has severed his connection with that paper and will hereafter write regularly for the Progressive Farmer, of Raleigh, N. C. Certainly no man in Southern agricultural work has won a greater following than Prof. Mansey, and his life work has been in the South, he will hereafter contribute only to Southern farm papers. His letters will appear in the Progressive Farmer each week.
