One of these little books will be mailed free to any one sending address on postal card or by letter, to Dr. R. V. Pierce, Buffalo, N. Y., and requesting the same. From this little book it will be learned that Dr. Pierce's medicines contain no alcohol, narcotics, mineral agents or other poisonous or injurious agents and that they are made from native, medicinal roots of great value; also that some of the most valuable ingredients contained in Dr. Pierce's Favorlie Prescription for weak, nervous, over-worked, "run-down," nervous and debilitated women, were employed, long years ago, by the Indians for similar aliments affecting, their squaws. In fact, one of the most valuable medicinal plants entering into the composition of Dr. Pierce's Favorite Prescription was known to the Indians as "Squaw-Weed." Our knowledge of the uses of not a few of our most valuable native, medicinal plants was gained from the Indians. As made up by improved and exact processes, the "Favorite Prescription" is a most efficient remedy for regulating all the womanily functions, correcting displacements, as prolapsus, anterversion and retorrersion, overcoming painful periods, toning up the perves and bringing about a perfect state of health. Sold by all dealers in medicines.

Messenger Boys Join the Strikers Special to Journal.

Washington, August 14.-This city does not suffer so much from teleroom of the old Atlantic Hotel, was graphers strike as do other places, and a small working force has been left in the offices of both companies. About 178 out of 202 operators are at work or enough to handle the work in fairly good shape.

The messenger boys have struck in sympathy with their older brothers, and today solemnly walked out. The extent of their strike is to bother and abuse the boys who stick to their jobs The police broke up one gang who had badly injured one boy, and sever al arrests were made, at the request of the parents of the injured boy.

Both sides are optimistic as to the outcome of the strike and it is probable that the difficulties will be adjusted within a week.

The strikers fund amounts to \$6. 000,000. An appeal will be made to President Roosevelt for Intervention.

Dear Sir: Paint goes by gallons There are useful and useless gallons. Useful paint is lead-zine-and-oll with hrver and color; useless paint is whit ing, china clay, ground stone, barytes, benzine, or water.

This stuff is put-in, because it i cheap, to stuff-out paint, to make more gallous to sell; of course, the buyer doesn't suspect, or he wouldn't buy it.

useless stuff as lead-zinc-and-oil; but it looks like that and feels like that in the brush; the painter doesn't suspect it. Besides if the owner is willing, why should the painter object to painting two gallons for one?" He is paid by the day; more gallons, more days, more money.

Average paint at full price is about age paint at \$1.25, \$1.50 of \$1.75 gallon is two-thirds trash. Fool paint is the proper name for all but pure paint; it is made to fool people with. Knave paint is another good name; it is made, of course, by knaves. Sick paint is a name for an honest weak paint. They are all weak and all extravagent: too many gallons to buy and too many gallons to brush-on. Devoe is the standard.

Yours truly. F. W. DEVOE & CO. P. S .- E .- W. Smallwood sells our paint.

AUTO VS. BULL .-

New Use For Devil Wagons. May be

Efficient in Warfare. Chicago, Aug. 10 .- In a thrilling bat tle in an open roadway between a modern tonging car and a huge red bull, in which the animal and machine clashed head-on scores of times, the automobile, engineered by human brains, proved victorious and the bull was left dead on the road.

The encounter took place recently car Watertown, on the rond from dadisen to Oconomowoc. The occusants of the automobile which vanmished the fighting bull were, Mr. and Mrs. H. M. Bylleaby, Forty Fourth street and Drexel bonvoyard, who are Asiting at Draper Hall with Gwyn and Albert Cummins, of Chicago, and he Misses Margaret and Evelyn Post,

of Scranton, Pa. The fight between the buge touring ar and the equally large bull was fearful and magnificent, and those aking part in it are positive the fightag prowess exhibited by the bull was ever seen in the bull rings of Mexico w Spain, or any other country where outl fighting is presented as a sport.

The automobile was running at a igh rate of speed near Watertown, on the way from Madison to Oconomswoc, when the bull appeared in the oad. With lowered head and angry ellow the animal made plain the fact hat the passage was to be contented. toping that the beast would move to he other side of the road as the car approached, the chaffen continued at

he same speed.

Then like a flash the bull charged the machine, meeting it head-on with a jar that shook the autoists. As they recovered the bull charged again. Recognizing that only in victory lay the means of escape the chaffeur threw on full speed and machine and

animal met in crash after crash. The heavy contact with the big car saused blood to stream from the mouth and none of the bull, but game y he kept up his fight, and again and again charged with lowered head on the car. The battle was too much for even his great strength, though, and is, when fatally stabled by the sword of the mattador, he at last became eeble and after a final charge on totering legs fell to the side of he road

The occupants of the automobile were roughly shaken by the continued books as machine and bull met, and all were thankful to escape without terious injury.
