New Bern, N. C., Sept. 11, 1908.

THE PAYMENT OF THE PAVE. MENTS.

The solution of part of the payment for the city's concrete pavements, appears lacking. That is the portion set down as payable by property owners, according to the pavement frontage on their lots. The city's bond issue provided for, possibly, two-thirds of the pavements and curbing. This would leave one-third that property owners would have to pay for, in proportionate part, as the pavements were laid in front of their property The city has sent property owners notice of what their property is charged with. The collection of this money is wholly unsuccessful, and yet the city is liable for the payment of the pavements and curbing work, which are now being paid for as laid and accepted. The time is not distant when the proceeds of the bond sale will become exhausted, and the city must pay for the work. There is noth ing to indicate that property owners are going to make payments, certainly not in sufficient amount to provide navments for the one-third or whatever may be charged, as the property owners part. It is not that property owners desire to repudiate the pavements. But there are local conditions which can only be appreciated by those living in New Bern. First it ers had no idea that the pavements involved individual property liability. Many have pavements before their lots who never voted for the pavements, or wanted them. Coming down to those who accepted the bond issue . in all its bearings, they may be placed in three casses, those who will pay. Those who can, but will not, upon the plea that the pavement does not meet its contract, and those who are willing, but actually cannot raise, by any means, the call of the city for their proportionate share. This last class may be said to be from 75 to90 per cent of all the property owners, who are pre

So far as the Journal can see there is but one solution, and this is one that will relieve the entire situation, prove equitable to every citizen, be a burden upon no one, and save the city from being in financial stress when payments are called for in final settlement for the payments. This is for the city to issue bonds for \$20,000 or \$39,000 which will no doubt be sufselent t opay for the completion of the pavements. These bonds can be like in interest and time for payment as was the \$50,000 tasue for this same work. As already said such a bond isme would save the city's credit and the city from an endless conten-. If there be a forcible attempt a perment upon individually owners, for their share of

sumed to be liable, and the fact that

they cannot meet the obligation, cer-

tainly not in time when the pavements

must beneld for, makes the problem,

how are the pavements to be paid f,r,

one calling for speedy solution

THAT ARE ACTUAL REASONS FOR PATING BILLS!

It calls for no argument, that co can be such that a man or , is unable to meet a bill preell infentioned or hopest, th

it means sustemance, that is food clothing, shelter for the preservation of life and health, has had to go on. Some one has had to pay for the necessities needful. The grocer, the clothing merchant, the landlord was back of each separate commodity. Each had to be paid. Back of the retaller, was the wholesaler. The producer had received his pay.

But bank failures, crop failures, de pressed trade conditions are urged as excuses for non-payment of bills. by many who are only in a degree affected, not directly. The clerk on salary, the laborer on wages, through their pay be reduced cannot well put up the plea for non-payment of bills they may contract for the necessities of life. The business man who makes expenses has no good excuse to ask postponement of the payment of his accounts. Hard times are made worse through the refusal to pay bills, by those who really can, but who seek to live better than conditions warrant and finding themselves hard pressed for money, put of the untrue excuse that bank, crop or some other failure has taken their money. Every dollar that can be paid on bills due, every dollar that can be paid for goods, paid for labor, instead of asking credit in one, and postponement in the other, meaans a help to trade conditions, and will bring good times, if enough people can follow the same course. It is not the honest reasons for slow or non-payment of bills, that cause bad local conditions, but the uniform and untrue excuses made for asking for credit, and then not meeting thee bills when presented.

PRACTICAL AND INTERESTING SIDES OF DRAINAGE CONVEN-

The State Drainage Convention which is holding its sessions in this city this week, is not a gathering for only a selected number of delegates to attend, and profit by attending, but it is a convention that the general public, and this includes ladies, cannot afford to miss, for its every session with the speeches, and development of the speeches, is of practical interest and full of instructive enjoy.

The question of the reclamation of this State's wet lands, concerns both the owners of such acres, and also the people of the entire State, for an these lands shall be made habitable in condition for cultivation, and their vicinity cleared of the disorders that arise to afflict the physical which are certain to come from wet lands. It means that new people will come to the State, and the taxable values will be increased, thereby benefitting the entire commonwealth.

If such conventions as the one now in session in this city, would be attended by outsiders, besides the delegates, there would be disseminated a more general knowledge among the people, and through this knowledge a more intelligent concert of action could take place, in securing the means, whether by the State, or by national assistance, that would lead to the sooner reclamation of the wet lands, and so enrich the people.

It is not enough that the newspaper shall publish full accounts of these conventions, the sessions should be attended and the procedings listened to, and a great deal both learned and enjoyed, for there is instructive entertainment in every hour spent at the sessions.

Deafness Cannot be Cured.

local applications, as they cannot There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous linng of the Bustachian tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed. Deafness is the result, and unless the inflan can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarah, which is nothing but an inflamed con-

UNCLE REMUS.

A Traveling Man's Experience. "I must tell you my experience on an East Bound O. R. & N.R. R. train from Pendleton to LeGrande, Ore. writes Sam A. Garber., a well known traveling man. "I was in the smoking department with some other traveling men when one of them came back and said, "There is a woman sick unto death in the car.' I at once got up and went out, found her very ill with cramp colic, her hands and arms were drawn up so you could not straighten them, and with a death like look on her face. Two or three ladies were working with her and giving her whiskey. I went to my suit case and got my bottle of Chamberlain's Colic. Cholera and Diarrhoea Remedy (I never travel without it) ran to the water ank put a double dose of the medicine inthe glass poured some water into it and stirred it with a pencil: then I had quite a time to get the ladies to let me give it to her, but I succeeded. I could at once see the effect, and I worked with her, rubbing her hands and in twenty minutes I gave her another lose. By this time we were almost in LeGrande, where I was to leave the train. I gave the bottle to the husband to be used in case another dose should be needed, bbut by the time the train ran into LeGrande she was all right, and I received the thanks of every passenger in the car." President Roosevelt on Canal Work

(Panama Star and Herald.) The President made puble a report made to him on August 6, a special committee appointed to investigate conditions, especially in regard to labor and acommodations, on the Isthmus of Panama. President Roosevelt's letter of appreciation, sent to the commissioners on August 21, is as follows:

"Gentlemen, I have receiveed your admirable report on the conditions in Panama. I am greatly impressed with it and shall submit it to Congress with appropriate recommendations as oon as that body convenes. Mean while I shall send your recommenda tions to Colonel Goethal and ask him to put them into effect, so far as is possible and as he deems practicable and to report to me with his recom mendations.

"I am, naturally, extremely pleased at the very satisfactory showing that your report makes of the conditions under Colcel Goethals and his asso ciates. I doubt if there is any piece of work undertaken on behalf of the American people in recent years where the American people have more reason to be proud than of the work done on the Panama canal. The success has literally been astounding. Five years ago when we undertook the task no sane man would have dared hoped for the results which have already been achieved. The work itself has been greatly advanced and the rapidity of the rate of progress has steadily increased."

South American Republics at Odds Washington, Sept. 8 .- There is a cri ical situation in Central South Amerca on account of the revolution in Uraguay a montth ago, which resulted in the overthrow of the administration of President Ferreira by Vice-President Naviero, who thereby became President. Argentine influence was back of the overthrown president, and Brazilian influence is back of

the new administration. Reports from Minister O'Brien, ac credited to the buffer republics Paraguay and Uraguay, Indicate that the neion between Brazil and Argentina is now greater than it has been for many years past. Argentina's action in voting \$55,000,000 for strengthening her navy is taken as an index of her feeling against Brazil, which is await ng the delivery of three Dreadnoughts now under construction in England In the meantime thee Agentine navy

is stronger than that of Brasil. Argentina did what she could to pr nistration at the time of the revoluion, but Minister O'Brien, as dean or ing for the non-combatants and the imbers of the former administration en quartered in the Argentius legaon. Argentine did not force the isrue at the time, but it is believed that

GOVERNOR'S REQUEST FOR AID

The Freshet Has Left People in Many Parts of the State Destitute and Assistance is Needed.

Special to Journal Raleigh, Sept. 8 .- Governor Glenn Issues a proclamation to the people of North Carolina which he says that owing to the disastrous rains, rivers and other streams have overflowed. and have done untold damage to the people living along them. Entire crops have been washed away, farming lands utterly ruined, many dwellings destroyed and some lives lost. Untold suffering is upon these people, on account of this providential visitatation. It behooves thee people of the entirer State to ascertain where

distress is, and at once relieve it. Many sections are entirely laid waste, especially in Lenoir and Pender along the Cape Fear river. There is no authority vested by law to relieve this suffering or appoint a committee to investigate and report where succor is most needed. He has reported conditions to the national government and begged for a thorough investigation. He requests each locality where the damage has been severe to at once ascertain who truly needs assistance and report to the Commissioners of each county. To help these people in distress will be true humanity.
