FOR WHOM ARE

CITY ORDINANCES

There are many people in the world who do not consider that they are amenable to law. These people do not live in the wilds of Africa or in the mointain sections. but they live in civilized communities, enjoy municipal benefits, the safe guards of police protection and sanitary protection. They in sist on personal rights, yet are the first to abuse and infringe upon the rights of others.

While witter is not over, there is the demand that this city shall be kept clean. Sanitation is not a matter of seasons. Several cities in this state have been overrun this winter by small pox, a filth disease, that breeds best in cold weather. With the lengthening of days, the time is not far away for weather that will be spring as to temperature. A number of days during January have been of this character, and it is now that every perfect satisfaction, but it will be alley, shall be made a convenience hearing. of, and receive the floor sweepings, the kitchin scraps and the various refuse matter that continually ac-

other remedy known to medicine that will so successfully carry women through this trying period as Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs. Here is proof:

invites disease.

37

Natick, Mass., - "I cannot express what I went through during the Change of Life before I tried Lydia E. Pinkham's Vegetable Compound. I was in such a nervous condition I could not keep still. My limbs were cold. I had creepy sensations and could not sleep nights. I was finally told by two physicians that I had a tumor.

"I read one day of the wonderful cures made by Lydia E. Pinkham's Vegetable Compound and decided to try it, and it has made me a well woman. My neighbors and friends declare it has worked a miracle for me. Lydia E. Pinkham's Vegetable Compound is worth its weight in gold for women during this period of life. If it will help others you may publish this letter."-Mrs. Nathan B. Greaton, 51 No. Main St., Natick, Mass.

ANOTHER SIMILAR CASE.

Cornwallville, N. Y.-"I have been taking Lydia E. Pinkham's Vegetable Compound for some time for Change of Life, nervousness, and a fibroid growth.

"Two doctors advised me to go to the hospital, but one day while I was away visiting, I met a woman who told me to take Lydia E. Pinkham's Vegetable Compound. I did so and I know it helped me wonderfully. I am very thankful that I was told to try Lydia E. Pinkham's Vegetable Compound."-Mrs. Wm. Boughton, Cornwallville, N. Y., Greene Co.

The makers of Lydia E. Pinkham's Vegetable Compound have thousands of such letters as those abovethey tell the truth, else they could not have been obtained for love or money. This medicine is no stranger - it has stood the test for years.

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does justice to herself who will not try this famous medicine. Made exclusively from roots and herbs, and her best femands of cures to its credit. has thousands of cures to its credit.

Mrs. Pinkham invites all sick women to write her for advice. She has Address Mrs. Pinkham, Lynn, Mass.

MIGHTY ARCTURUS. If This Star Were Our Bun It Would

Instantly Consume the Earth. The parallax of a star is its angular displacement as seen from two op-posite points on the earth's orbit. The base line employed in this gigantic spe-cles of surveying is 186,000,000 miles in length, but the calculation is reduced to the semidiameter of the orbit. The results are at the same time amax-

ing and instructive. Let us take the famous star Arcturus, often called the "star of Job" because in the Old Testament the Almighty is represented as saying to the unfortunate patriarch, who main tains a certain dignity in spite of his helplesaness and his sufferings, "Canst thou call forth Arcturus and his sons?" Many conflicting measures of the parallax of Arcturus have been made, but the latest made at Yale seem more probably correct than their predecessors. They fix the parallax at 0.006 seconds-1. e., sixty-six one-thousandth of a second of arc. From this it is easy to calculate the distance of the star. It comes out at nearly 290,000,-000,000,000 miles (two hundred and ninety trillion miles). This is more

than 3,000,000 times the distance of the earth from the sun. Having this distance, we can calculate the actual amount of light shed by Arcturus, or, in other words, its actual brightness as compared with that of our sun, on the supposition that both were at the same distance from us. We thus find that Arcturus exceeds the sun as a light giver about 2,500 times! It is a sun 2,500 times brighter than ours. Put the earth as near to Arcturus

as it is to the sun and all life would disappear from its surface as if swept off by a blast of inconceivable heat. The summer temperature would rise to tens of thousands of degrees. The oceans would boil away. Vegetation would be burned up in a twinkling. The eyes of living beings would char in their sockets. The plains and mountains would burst into flame. Minerals would run in molten streams. There would be no comfort for a liv-
