TEN KINDS OF MONEY.

But Not All of Uncle Sam's Assortment is Legal Tender.

Uncle Sam officially has ten kinds of money—gold coins, standard silver dollars, subsidiary silver, gold certificates, silver certificates, treasury (1890) notes, United States (greenbacks) notes, national bank notes, nickel coins and bronze coins—says the Indianapolis News. While some of this paper currency is not legal tender, minor coins are legal tender in small amount. Legal tender is so called because in payment of a debt or obligation of any kind it can be forced on the creditor "in full of all demand."

Gold certificates, silver certificates and national bank notes, nickel coins and bronze coins are not legal tender. So far as silver coins are concerned, only \$10 worth of "halves," "quarters" and "dimes" are legal tender, and, as to nickel and copper coins, only 25 cents can be forced on the creditor. However, with the standard silver dollar there is no limit to the amount to be paid in liquidation of a claim. The creditor can refuse the silver certificate, but when it comes to the "dollar of the dads" the dollar must be received at its face value, even if a thousand weigh 68.02 pounds.

Power of Words.

"For me," writes Larcadio Hearn in the "Japanese Letters of Lafcadio Hearn," "words have color, form, character. They have faces, ports, manners, gesticulations; they have moods, humors, eccentricities; they have traits, tones, personalities."

A good instance of this power appears in a description of Patti's singing: "There was a great deal pressure, a stifling heat, a whirling of silks, a weight of toilet perfumes. Then came an awful hush—all the silks stopped whispering. And there suddenly sweetened out through that dead, hot air a clear, cool, tense thread gust of melody unlike any sound I ever heard before—save—in tropical nights—from the throat of a mocking bird. It was 'Auld Lang Syne' only, but with never a tremolo or artifice, a marvelous, audacious simplicity of utterance."

Testing the "Bud."

An old bachelor had somehow strayed into a young people's party, and, realizing that he could not hope among so many handsome youths to make the heart of a single maiden throb, he said to the nearest girl, whose conversation had shown somewhat more good sense than he had expected:

"Look about the ballroom. Notice that the girls who have removed their gloves have well shaped arms. And—ahem!—some have not removed them."

"But neither generalization fits me," answered the girl, "for, you see, I have one arm bare and one gloved. What would you say about me?"

"Walk out and let me look at them," said the old bachelor unfeelingly.

The girl took a few steps out, paused and returned.

"Take the other glove off," said the old bachelor.—New York Times.

IN THE WAKE OF THE MEASLES. The little of Mrs. O. B. Palmer, Little Rock, Ark., had the measles. The result was a severe cough which grew worse and he could not sleep. She says: "One bottle of Foley's Honey and Tar Compound completely cured him and he has never been bothered since." Croup, whooping cough, measles cough all yield to Foley's Honey and Tar Compound. It Was Easy.

"You didn't catch a single fish during your trip?"

"No, but—"

"Yes, you got lots of bites. And some big ones got away. But Jones went up there after you came home?"

"The big bite!"

"Of course. But he caught the banner fish of the season."

"After that same fish had fattened himself on twenty-eight pounds of my bait! Why not?"—Cleveland Leader.

Is there anything in all this world that is of more importance to you than good digestion? Food must be eaten to sustain life and must be digested and converted into blood. When the digestion fails the whole body suffers. Chamberlain's Tablets are a rational and reliable cure for indigestion. They increase the flow of bile, purify the blood, strengthen the stomach, and tone up the whole digestive apparatus to a natural and healthy action. For sale by all dealers.

Why Business Fell Off.

Two London business men were talking when a seedy individual came up and spoke to one of them. After he had gone the one to whom he had spoken said to his friend: "That's a brother of mine and about the most unfortunate fellow in the world. I have set him up in business three times. The last time I bought a pork shop business for him in a place called Barking. After a few weeks he wrote and said the business had all dropped off. Would I come up? I went, and the first thing that caught my eye was a ticket in the window inviting the public to 'Try Our Barking Sausages.'"

Making the Cornerman's Work. The cornermen are among the most interesting and useful birds in the world. They are employed in the fishing industry off the coast of Scotland to a large extent. They are easily trained to work for their owners, who place a brass ring round each of their throats so as to prevent the birds swallowing. They naturally feed upon fish and soon learn to deposit what they catch in their owners' boats. They display remarkable cleverness in time, and a good fisher is worth a good deal of money to a fisherman.

Evaporated Liquids. Steam emanating from boiling milk if condensed would become water. This may be seen in the manufacture of condensed milk, which is only ordinary milk boiled down until the water is out of it. If a liquid which contains solid bodies in solution be evaporated the solids are left behind. That this is so may be shown by adding to water that is to be distilled a trace of magenta and a little salt. The distilled water has no taste and is colorless. The magenta is generally deposited upon the sides of the boiling vessel.

LONDON STREET CRIES.

They Must Have Made the City a Bedlam in Olden Days.

London must have been a lively city in the days when the street crier joined in competition with the bell of the postman and the mufin man. The boy who goes round the streets with the early morning cry of "Hot rolls!" still lingers in the outer suburbs, but the old street crier has long been silent in the land.

Some of the ancient cries have been collected by Frederick W. Hackwood in his book, "The Good Old Times." They include "Cherry Ripe, O!" "Baking or Baking Apples!" "Green hangings" (these were early peas); "Lavender, sweet lavender, six bunches a penny," or perhaps "Rabbits, wild rabbits," and when there was a good catch of fish it might be "Mackerel, O!" or "Herrings, alive, all alive!"

"Some of the cries," writes Mr. Hackwood, "would sound strange to the ear now, as 'Bandboxes,' 'Baskets,' 'Buy a broom,' 'Hair brooms,' 'Hot spiced gingerbread,' 'Bricc dust,' 'Sand, O! Bellows to mend,' 'Chairs to mend,' 'Bill of the play.' More familiar perhaps were 'Old clothes,' 'Cats and dogs' meat' and 'Dust O!'"

"Now we are reduced to little more than the shriek and howl which are supposed to represent milk and coals!"—London Chronicle.

POISONING AS A DIVERSION.

Poisoning is never likely again to become a fashionable diversion, as it was from time to time in ancient Rome. In B. C. 331, for instance, there was a mysterious pestilence, which seemed to be particularly fatal to leading men. At last a slave girl gave information to the authorities, and a consequent police raid resulted in the discovery of about twenty matrons, some of them of high patrician families, busily preparing drugs over a fire. He insisted that the drugs were not poisonous, but, being compelled to drink them publicly in the forum as a guarantee of good faith, perished miserably. Further informations followed, and 170 matrons in all were condemned. But this record was soundly beaten in B. C. 184, when a four months' inquiry by the praetor is said to have led to the condemnation of 2,000 persons.—London Chronicle.

LAST OF THE YAQUIS.

Passing of a Once Famous Tribe of Mexican Indians.

All the world has heard of the famous Yaqui Indians of the state of Sonora, Mexico. They are for the most part dwellers in the hills, crudely armed with primitive weapons, but terrific fighters who have more than once decisively beaten the soldiers of Mexico.

Peneable when undisturbed, fully alive to the richness of their mines and the value of their fertile valleys, they sought only to defend that which was theirs from the grasping hands of those who desired their mines and their lands. Like most aborigines, however, they were doomed from the first. What was at the time of Cortes a tribe of 5,000 strong, able to defy the warriors of Montezuma, has dwindled until there are now not more than 500 sons in the valley of the Yaqui river and in the mountain gorges which wall in the source of this stream.

The bulk of the Yaquis have been wiped out in sanguinary wars or taken prisoners and shot, and those for whom no excuse for death could be found have been deported to the fever stricken valleys of Yucatan. The Yaquis as a race are no more, but their passing has been made complete only during the past few years.—Wide World Magazine.
