**HOW MUCH DOES EIGHTH TOWNSHIP WANT FARM LIFE SCHOOL?**

The non-application by the Eighth township at the first June session of the county commissioners, asking that an election be called to vote for bonds, as the basis for establishing the county Farm-Life School in this township, can hardly mean that the people of New Bern have given up the project. It will be remembered that the commissioners will meet again on the 19th of this month, when the eighth township can make application, if the people so desire.

It can hardly be conceived that the people of this township do not want this school established with in easy distance of this city. Two public meetings gave voice for having the school, while as a business proposition every citizen has favored it. The action of the last public meeting seems to have underestimated the labor of securing signers to the petition asking for an election in that too few workers were sent out.

The Journal has several times pointed out the advantages of securing this school to be located near New Bern. No one needs or should need further information on the subject. And to secure this Farm Life School resolves itself into the simple proposition of whether the citizens of the Eighth township can and will fulfill the necessary requirements to secure the school. The 19th will decide the matter for this township. The trustees pass upon what is presented and as required by law, and so award the school. The public meetings declared in favor of the school for the Eighth township. Thus far it has been voice. The rules require something tangible in order to get the school. Conversation by itself will not gain any school. Let it not be forgotten that the tax payers in the Eighth township must pay for the school if they don't get it.

**LEADERS VS. PRINCIPLES.**

There must always be some conflict between political leaders and the principles that their parties stand for. Generally speaking, of course party leaders stand for party principles, but standing for and actually living up to the full principles, may show considerable variance.

In congress just now, in the matter of changing the tariff schedules, can be seen this struggle between Democratic leaders as to what construction is to be placed on their party's principles in the tariff adjustment, so that what changes are made may be consistent with previous party declaration. It is no exaggeration to say that there is a democratic leader for every phase of the tariff situation. Tariff in its broad political significance, is termed a republican measure, and yet there have been democratic leaders, big men politically and prominent in public life, who have stood for extreme schedules of so-called protection, upon articles that affected their constituents' interests. The contest between the Bryan and Underwood forces on what should be the new wool schedule, but marks the old time record of individual construction of democratic principles. What is a tariff for revenue only? The answer can almost be numbered as personal, district and sections interests shall say what the figures must be, and these will largely range as the trade and bus-

ness interests of the person, district and section are disturbed. And because of this self interest, while party principles may declare for free wool, as an instance, there is going to be sufficient leadership, this leadership looking to constituents interests, to prevent any free wool or the placing on the free list of other articles which now pay duty.

**LIGHTNING KILLS FEW.**  
In 1906 lightning killed only 169 people in this whole country. One's chances of death by lightning are less than two in a million. The chance of death from liver, kidney or stomach trouble is vastly greater, but not if Electric Bitters be used, as Robert Madsen, of West Burlington, Ia., proved. Four doctors gave him up after eight months of suffering from virulent liver trouble and yellow jaundice. He was then completely cured by Electric Bitters. They're the best stomach, liver, and kidney remedy and blood purifier on earth. Only 50c at all druggists.

The report of the Bureau on Corporation on the Steel Trust will be turned over to the House committee conducting the present inquiry.

**WOMEN**

Women of the highest type, women of superior education and refinement, whose discernment and judgment give weight and force to their opinions, highly praise the wonderful corrective and curative properties of Chamberlain's Stomach and Liver Tablets. Throughout the many stages of woman's life, from girlhood, through the ordeals of motherhood to the declining years, there is no safer or more reliable medicine. Chamberlain's Tablets are sold everywhere at 25c a box.

**Jokai's Joke.**  
At a banquet held in his honor in Toronto, Maurus Jokai was called upon to propose the toast of "The Ladies." He made an excellent speech, during which he continually toyed with the brown curls upon his forehead. Finally he said: "I raise my glass in honor of the gracious ladies of Toronto. May they all live until my hair grows gray." His audience drank to the toast, but it was easy to see by the faces of the ladies present that they did not think much of the compliment. Jokai rose again from his seat and took from his head a magnificent brown wig, showing an entirely bald head beneath it. "My hair," he added, "will never grow gray." And the ladies, who had not known of his baldness, were more than pacified.

It is worse than useless to take any medicines internally for muscular or chronic rheumatism. All that is needed is a free application of Chamberlain's Liniment. For sale by all dealers.

**A Primitive View of the Bullfrog.**  
The frogs in America, it must be observed, make a most singular noise, some of them being absolutely whistling, while others croak so loudly that it is difficult at times to tell whether the sound proceeds from a cat or a frog. I have more than once been deceived by the noise when walking in a meadow. These last frogs are called bullfrogs. They mostly keep in pairs and are never found but where there is good water. Their bodies are from four to seven inches long, and their legs are in proportion. They are extremely active and take prodigious leaps.—From an Old Book of Travels.

The woman of today who has good health, good temper, good sense, bright eyes and a lovely complexion, the result of correct living and good digestion, wins the admiration of the world. If your digestion is faulty, Chamberlain's Stomach and Liver Tablets will correct it. For sale by all dealers.

**Killing an Unfaithful Lover.**  
When a Japanese girl has been slighted by her lover she revenges herself according to the following quaint custom: In the dawn of the early morning she rises and puts on a white robe and white clogs. Round her neck she hangs a small mirror, which falls to her breast, and on her head she puts a metal crown with three points, each point bearing a lighted candle. In her left hand she carries a small figure of straw or rags—supposed to represent her unfaithful lover—and this she pulls to one of the sacred trees surrounding the family shrine. She then prays for the death of the man, vowing that if this comes to pass she will pull out the nails which are hurting the sacred tree and make offerings to comfort her family god. Every night she comes to the shrine, strikes the same prayer, and idea being that the god, to save his tree from further injury, will kill her lover.

**Whooping cough is not dangers when the cough is kept loose and expectation easy by giving Chamberlain's Cough Remedy. It has been used in many epidemics of this disease with perfect success. For sale by all dealers.**

**The American Indian.**  
The old question of the origin of the red man of America is still an open one, the last word by no means having been said. The most probable theory is that which links the Indian with the Mongoloids of East Africa, whose physical characteristics are strikingly similar to those of the American aborigine. Between the Indian and the Japanese there are many pronounced resemblances, and some excellent authorities are of the opinion that it was from that eastern race that the Indian originally sprung. If, as some think, the Eskimos are the best representatives of the Indian as he was upon his arrival here, the theory of the Japanese origin is immensely strengthened, since the likeness between the Eskimo and the Japanese is striking indeed.—New York American.

**BOARD OF ALDERMEN MEET**

Held Regular Monthly Session Last Night. Number of Petitions Presented to Board.

Last night the Board of Aldermen met in regular monthly session. After the reading of the minutes of the last meeting by the clerk the business of the meeting was begun.  
Mr. Geo. Harrington appeared before the Board and asked that the committee on Fire Department and the Board of Fire Department hold a joint meeting so that they could discuss together business pertaining to welfare of the fire department. Mr. Gaskill, chairman of the fire department committee agreed that the committee and board meet at the headquarters of the New Bern Fire Department Thursday evening at 8 o'clock. He also asked that the Board appoint a driver for the "Button" engine to be on hand at all hours of the day and night so that he could take out the engine whenever it was needed. Board moved that this matter be referred to the Committee on Fire Department.

A petition from the officers and members of the 6th, Ward Hose Company asked the board that they be allowed to elect their own firemen. This petition was allowed.

Mr. Eugene Williams appeared before the Board and asked that the Board order the Atlantic Fire Company's horse taken off the streets until after the Firemen's Tournament at Columbia, S. C., in which they intend to participate. Board ordered that the horse be exempt from all duty on the streets.

Mr. J. A. Patterson put in a bid for \$175 for computing and making the city's tax list. Board ordered that this bid be accepted.

Ordered that bids for feed for the city's horses during the next 6 months be advertised in daily papers.

Alderman Shriver appeared before the Board and asked that the wages of the street hands be increased from 15 to 20 cents per hour. After considerable discussion this motion was voted.

After the reports of the various committees the Board adjourned.

**A LEADING CALIFORNIA DRUGGIST.**

Pasadena, Cal., March 9, 1911, Foley and Co., Gentlemen:—We have sold and recommended Foley's Honey and Tar Compound for years. We believe it to be one of the most efficient expectorants on the market. Containing no opiates or narcotics it can be given freely to children. Enough of the remedy can be taken to relieve a cold, as it has no nauseating results, and does not interfere with digestion. Yours very truly, C. H. Ward Drug Co. C. L. Parsons, Sec'y and Treas. Get the original Foley's Honey and Tar Compound in the yellow package.—F. S. Duffy.

**Railway Language.**  
The old elaborate booking process has given way to the impersonal railway ticket taking, but the old name "booking office" remains as a fossil. Railway language in this country is full of such relics. Our railway carriages are "coaches," the engine is in charge of a "driver" and a "guard" is in charge behind. All these expressions are directly inherited from the old coaching days. In America they have "ticket offices," "cars," "engines" and "conductors," good enough words, but without any history.—London Chronicle.

**Had No Business to Know.**  
Elderly Aunt—Gwendolen, you shock me when you talk of a wedding being "pulled off." You ought to be ashamed to use prizefighting slang in speaking of so solemn a thing as a wedding. Young Niece—You misunderstood me, Aunt Hepzibah. I said the wedding had been put off. But how did you happen to know that "pulled off" is prizefighting slang?—Chicago Tribune.

**DON'T EXPERIMENT**

You Will Make no Mistake if You Follow This Advice.

Never neglect your kidneys. If you have pain in the back, urinary disorders, dizziness and nervousness, it's time to act and no time to experiment. These are all symptoms of kidney trouble, and you should seek a remedy which is known to cure the kidneys. Doan's Kidney Pills is the remedy to use. No need to experiment. It has cured many stubborn cases in this vicinity.

Can New Bern residents demand further proof than that contained in the following testimonial?  
James E. Askin, James City, N. C., says: "While in the army I received a severe strain, and after that I was subject to attacks of kidney trouble. My back ached a great deal and as time passed the trouble grew much worse. I tried many remedies, but seemed unable to obtain relief, and finally hearing of Doan's Kidney Pills I obtained a box. They gave me more benefit than I had ever received before. They not only stopped the pain in my back, but strengthened my kidneys and improved my health."

For sale by all dealers. Price 50 cents. Foster—Milburn Co., Buffalo, New York, sole agents for the United States.  
Remember the name—Doan's—and take no other.

Information has been conveyed to President Taft that he will have Col. Roosevelt's undivided support for a re-nomination next year.

"My wife would have been in her grave today," writes O. H. Brown, of Muscadine, Ala., "if it had not been for Dr. King's New Discovery. She was down in her bed, not able to get up without help. She had a severe bronchial trouble and a dreadful cough. I got her a bottle of Dr. King's New Discovery, and she soon began to mend, and was well in a short time." Infallible for coughs and colds, it's the most reliable remedy on earth for desperate lung trouble, hemorrhages, lagrippe, asthma, hay fever, croup and whooping cough, 50c, \$1.00. Trial bottle free. Guaranteed by all druggists.

**Scored on the Minister.**  
Old time Scottish ministers would severely name anybody who fell asleep in kirk. At Cumberland, where the minister and his principal heritor, Lord Elphinstone, were on bad terms, the minister one Sunday called upon the beadle to "wauken my Lord Elphinstone." "I'm no sleeping, minister," said the peer. "Indeed you were, my lord." His lordship still denying it, the minister to test him asked, "What had I been saying last, then?" "Oh, just wauken Lord Elphinstone." "Aye, but what did I say before that?" "Indeed, I'll gi'e ye a guinea if ye'll tell that yerself, minister"—a smashing report to the rambling disjointed preacher.—London Chronicle.

**Habit Made Indian a Poet.**  
Every Indian is a poet, but he is not so much of a poet as he sounds. Some of it is in the nature of a limitation. It is simply not within the powers of the Indian to talk about 6 o'clock or the middle of next week. What his ignorance imposes on him is a reference to "the moon hour," "the time of shortest shadows," "the moon of tender leaves," phrases which would be the making of a poet, but are merely equivalents to the clock and the calendar.—May Austin in Dramatic Mirror.

**BOUNDARY MARKS**

Limits a Fiery Orator Once Gave the United States.

**THE CANADIAN LINE FENCE.**

Monuments That Cleave the Two Countries West from the Lake of the Woods—Irregularities in State and County Boundaries.

The fates of empires and of dynasties have been involved in the struggle for boundaries. The fgment that the Rhine was the natural frontier of France ended in the downfall of the Bonapartes and the exaltation of the Hohenzollerns, thus rearing the neo-German empire upon the ruins of the upstart French empire.  
In our own country the cry of "Fifty-four forty or fight!" held a threat of the mighty conflict that eventually proved irrepressible. And in our own day the dispute over the Venezuelan boundary nearly precipitated a war between the two greatest nations of the earth.

It was a startling figure of speech, that of the western orator who, mounting higher and higher to a climax of luncheon, described the United States as bounded on the east by the Atlantic ocean, on the north by the aurora borealis, on the west by the setting sun and on the south by the gates of hell. Still, it was only a figure of speech. Canada lies between us and the boreal aurora. The Latin American states to the south hardly deserve the infernal comparison. As to the oceans to the east and the west of us, they may be left to themselves. Not mine the task of determining what the wild waves are saying.

The Canadian boundary presents its idiosyncrasies and eccentricities. The eastern part of it follows naturally and spontaneously the regular water line formed by the great lakes and their outlets. Thence from the Lake of the Woods on the north of Minnesota a more direct course, man made and mechanical, is taken through the wilderness and over the mountains of the west to the Pacific coast. Nor has this course been suffered to remain a mere imaginary line. Man, having made it, has marked it well. Between the Lake of the Woods and the Red river cast iron pillars have been placed one mile apart alternately by the English and the American governments. These are hollow castings in pyramidal form eight feet high, with a base eight inches square, an octagonal flange one inch thick and a top four inches square surmounted by a solid cap.

Into these hollow posts are fitted well seasoned cedar joints, with spikes driven through holes made in the casting. The pillars are firmly imbedded in the ground. Inscriptions in raised letters face north and south. The north side reads, "Convention of London;" the other, "October 20, 1818." Beyond the Red river the boundary line is generally, denoted by earth mounds and stone caissons 7 by 8 feet, though these are occasionally diversified by wooden posts of the same height as the iron pillars and painted red above ground. Through forest clearings have been made a road wide. Where bodies of water are crossed monuments of stone rise several feet above high tide. Over the mountains shafts of granite supersede the pillars mounds and cairns.

There are eccentricities in state lines as well as in those which limit the confines of the United States. Thus the line that separates Delaware from Pennsylvania (Newcastle and Chester counties respectively) suddenly curves upward and forms a semi-circle just above the ancient town of Newcastle.

The explanation may be found in history. At the time Delaware was set out there were few points of latitude and longitude definitely established in the colonies, so that bound areas were generally expressed not by latitude and longitude, but by reference to some known location. In the deed by which Delaware was transferred there was ceded all the land for twelve miles round Newcastle, together with certain other areas. In establishing the boundaries of the present state of Delaware this description was taken literally, and part of a circle, with the center at Newcastle, was surveyed upon a twelve mile radius.

No other state has an arc in its boundary line, but many of the counties of Kentucky and Tennessee do. Warren county, Tenn., is almost a complete circle. In many instances counties formerly circular have been expanded into irregular polygons.—William S. Walsh in New York Tribune.

**YOUR NEIGHBOR'S EXPERIENCE.**

How you may profit by it. Take Foley Kidney Pills. Mrs. E. G. Whiting, 360 Willow St., Akron, O., says: "For some time I had a very serious case of kidney trouble and I suffered with backache and dizzy headaches. I had spots floating before my eyes and I felt all tired out and miserable. I saw Foley Kidney Pills advertised and got a bottle and took them according to directions and results showed almost at once. The pain and dizzy headaches left me, my eyesight became clear and today I can say I am a well woman thanks to Foley Kidney Pills."—F. S. Duffy.
