SHORT PASSING EVENTS

WEDNESDAY.

Four bales of cotton were sold on the local market. The average price paid for the staple was 15 1/2 cents.

The Norfolk-Southern Railway Company have just concluded adding two more miles of track on the local shifting yards.

There are now 84 cases on the criminal docket to be tried next week, and it is more than probable that ten or fifteen others will be added before the session closes. Judge G. S. Ferguson will preside.

Late yesterday afternoon S. H. Barnett, the young white man who embezzled \$240 from the Hall Tailoring Co. had failed to satisfactorily arrange the matter, and he is still behind the bars in the Craven county jail.

A chicken with four well developed legs was exhibited to the Free Press man by Mr. Jim Taylor Saturday afternoon. The little biddie was alive and got about right briskly on two legs, the other two being more ornamental than useful, though fully developed.—Kinston Free Press.

The weather yesterday was extremely hot in this section and also extremely disagreeable. Reports from all over the eastern section of the United States stated that the hot wave was prevalent all along the coast. The weather bureau, however promises us some cooler weather within the next few days.

A circular recently sent out by the State Board of Health requests every stable owner in the State to see to it that his stables are kept in a sanitary condition so that they will not be germinating places of the deadly house fly which spreads so much disease during the summer months. This is an excellent piece of advice and it is hoped that it will be heeded by the stable owners of this city.

THURSDAY.

The first canteloupes of the season have made their appearance on the local market. The delicacies were shipped to one of the local merchants from Anthony, Fla.

Sunday afternoon at 2:30 o'clock the Athenian lodge No. 8, Knights of Pythias will hold their annual memorial exercises in the Athens theatre. Hon. George E. Hood, of Goldsboro, will deliver the memorial address. Every citizen is extended a cordial invitation to attend.

It is to be hoped that every citizen in the county will take part in the good roads meetings that will be held in each township on July 4th. This matter is of vital importance and needs to be thoroughly agitated before the work of building the great Central Highway is begun.

Atlantic hose wagon team is practicing each afternoon now for the Interstate Firemen's Tournament which is to be held at Columbia, S. C., at an early date. Their horse is now in excellent condition and they are confident of winning one of the prizes, perhaps the first.

His host of friends in this city will learn with pleasure that a telegram received here yesterday stated that Judge Geo. W. Ward, of Elizabeth City, who suffered a stroke of apoplexy while he was holding court at Tarboro Tuesday, was greatly improved and would doubtless fully recover within a short while.

Householders cannot take too much pains in the sanitary condition of their premises at all times, but from now on especially. The wet weather which may now be expected, will start decomposition in rubbish and trash that has been heretofore preserved by the drought. Disagreeable odors should be looked after at once.

Meers, O. Marks and J. W. Stewart yesterday received two new Cadillac automobiles which were ordered through the local agents. Both of the cars are beautiful and have been greatly admired by all who have seen them. It is understood that several other new machines will arrive in the city within the next week or two.

Mr. G. S. Waters, of the firm of G. S. Waters & Sons carriage builders, in-

formed the reporter yesterday that he had just received an order for a carload of buggies to be shipped to the lower part of this county. The quality of vehicles manufactured by this reliable firm has gained an enviable distinction among vehicle users in this section, and the plant is taxed to its utmost capacity in filling orders.

If a driver of one of the public hacks charge you more than 10 cents for carrying you anywhere within the city limits it is up to you to refuse to pay him. At a recent meeting of the Board of Aldermen an ordinance was passed prohibiting them to charge more than this amount for carrying passengers anywhere in the city limits. Any violation of this ordinance by them, if reported to the Mayor, will cause them to be severely reprimanded.

The citizens of Kinston have held a meeting and an "agreement" has been drawn up to which 150 solvent persons are asked to attach their signatures guaranteeing to sign notes for the purchase of a site for the proposed school for the Feeble Minded in the event it is located in Kinston. It is also understood in the "agreement" that application is to be made to the next legislature for permission for the city to bond itself for money sufficient to take up the notes, thus relieving the signers of their responsibility. Options have been secured on several tracts of land that are desirable sites for the school.

FRIDAY.

Next Wednesday the Centenary Methodist Sunday School will operate an excursion from this city to Morehead City. Besides carrying the members of the school on this trip it is probable that others will be allowed to purchase tickets and to spend a day at the seashore.

The Norfolk-Southern Railway Company is having an extension addition added to their freight platform in the rear of the Trent river warehouse. When this has been completed they will have much better facilities for unloading freight boats, and it will also afford them more storage room.

There was a decided change in the weather yesterday morning. At eight o'clock the mercury registered 62 degrees against 81 on the previous morning, and no one was seen preambulating around with their coats off. The Weather Bureau promised some cool weather during the next few days and it arrived on schedule time.

Contrary to expectations the torpedo boat DaPont has not yet been returned to this port. A few weeks ago a communication from the Charleston navy yard stated that the boat, which has been undergoing repairs, would be returned here about the first of this month. So far, however it has not put in its appearance, the delay doubtless being caused in securing a new crew.

More attention is being paid to stock raising and dairying in this section

GOLDSBORO HEARD FROM

A Lady Who Lives in Goldsboro Joins in the Chorus of Praise for Cardui, the Woman's Tonic.

Goldsboro, N. C.—"A physician treated me for many distressing symptoms," writes Mrs. Etta A. Smith, "but gave me no relief.

"I suffered with neuralgia around the heart and was troubled at times with my head. I had pain in my left side, bowels, left thigh, shoulders and arms.

"After taking Cardui, I am now well and can recommend it to other suffering women."

Just such doubtful symptoms, as those from which Mrs. Smith suffered, are the ones for which it will pay you to take Cardui, the woman's tonic.

It is at such times, when there is nothing to show, for certain, the real cause of the trouble, that you need a tonic, to give the body strength to throw off the illness that evidently threatens.

Take Cardui, when you are ill, with the ailments of your sex. Take Cardui as a tonic, to prevent illness, when you feel it coming.

Your druggist keeps it.

R. B. White, Jr. Ladies' Advisory Dept., Chattanooga, Tenn., for detailed information, and 24-page book, "Home Treatment for Women," sent in plain wrapper on request.

JAPAN LOVES HER CHILDREN

Passes Laws as Strict as Those of Uncle Sam to Protect Them.

Washington, June 8.—The Japanese have followed the lead of the United States in legislation to secure the abolition of child labor, the safety of the employes and sanitary conditions in factories, according to information received at the Department of State.

Under the new laws, persons under 12 years of age may not be employed in any factory. Persons under 15 years of age and women may not be employed more than 12 hours a day, nor for the oiling or repairing of dangerous machinery. All shall have at least two holidays a month. Persons under 15 shall not be employed in the handling of poisons, injurious chemicals or explosives.

All persons working more than six hours a day shall have a recess during working hours of at least 36 minutes, and if working more than 10 hours the recess shall be at least one hour. Persons working alternately in day and night shifts shall have at least 4 holidays a month, and the working hours shall be alternated at least once every ten days.

Curious Anticipations.

Many peculiar anticipations have been cited against patent applications. At one time a congressman took the patent office a lock invented by one of his rural constituents. The lock was an exact copy of a lock figured in "Price on Locks," showing the lock used on a gate of ancient Thebes, though said to have been used by Christ. The congressman, after examining the illustration which was shown him by one of the officers, exclaimed that he didn't care who that fellow in Thebes was—he certainly stole it from his constituent. On another occasion an application for a patent was filed for a flower basket whose construction corresponded in detail with the Scriptural description of the ark in which Moses was placed in the bulrushes, which we are told in the second chapter of Exodus was an ark of bulrushes daubed with slime and with pitch. This is also probably the first recorded instance of a re-enforced concrete structure.—Scientific American.

than ever before, and what would encourage, especially, the dairy business would be for those engaged to hold an annual cow show. Interest in the proposed Fair seems to have waned if not dropped altogether. A cow show would probably grow to a hog show, a poultry exhibit and maybe after awhile to a full-fledged Fair.

Every base ball enthusiast in the city should secure a copy of next Sunday's Journal. In that issue we are going to present to our readers a base ball story written by Christy Matthewson, the famous ball player. The subject of this article is "Outguessing the Batter" and it is said to be one of the best articles ever written on this subject. Another installment of that thrilling story, "The Third Degree" will also be printed in the same issue.

It will be of interest to his friends in this city to know that Mr. Edward R. Baird, Jr., has resigned as General Solicitor of the Norfolk-Southern Railway Co. and the John L. Roper Lumber Co. of Norfolk. His resignation was followed by the announcement of the appointment of Col. W. B. Rodman, of Charlotte, as assistant general solicitor for the railroad and general solicitor for the Roper Co. Rodman is division counsel for the Southern Railway of this State.

At the sweet pea show given in the offices of the Gas Company a few days ago by the Children of the Confederacy under the supervision of Mrs. Hughes Holland and Mrs. B. E. Moore, twenty five dollars was realized. From the proceeds of the sale, this amount in addition to the several cash prizes awarded the children and which were generously donated to the cause, was turned over to the Circulating Library and will be used in purchasing books for the juvenile department.

A Well Trained Monkey.

Paris is a favorite center for the thief who uses animals as accomplices. About a year ago a foreign looking man, rather dabbly dressed, entered a jeweler's shop in the Rue de la Paix and asked to be shown some rings. A tray was placed before him, but he asked for another. The shop attendant turned to get them. The man did not move; but, as it happened, there was a mirror in the opposite wall behind the counter, but there for the special purpose of detecting thieves. In this the attendant saw a tiny brown head poked out of the customer's pocket; then a long, thin, spidery arm flashed out, seized two rings and vanished. The attendant touched an electric bell, which summoned help, and the man and monkey were both arrested. The man turned out to be a Mexican. He had been traveling with a menagerie, had stolen the monkey and taught the little animal to pick up any article which its owner had previously touched with his finger. His lodgings were full of stolen lace and jewelry.

TRINITY GETS ANOTHER MILLION

The Dukes Make Another Handsome Gift to College. Two Other Departments.

Durham, N. C., June 8.—It was announced at the closing exercises of Trinity College that the North Carolina and the Western North Carolina Methodist conferences and the Dukes of New York city, have entered upon a plan whereby Trinity College is to be given a million dollar endowment, of which amount \$200,000 will be raised by the church.

The gift of \$100,000 in lands by Jas. B. and Benjamin N. Duke, of \$50,000 for a new building by James P. Duke, and of \$10,000 by B. N. Duke, for campus improvements, was announced today, that totaling \$160,000 at this commencement and running the Duke philanthropies far above a million and a half to date.

The million dollar endowment is to be used, it is supposed, for the purpose of establishing at Trinity College a department of dentistry, medicine and other much needed additions. North Carolina and Western North Carolina conferences have agreed to raise \$100,000 each of this amount, and it is generally supposed that the Dukes will chip in the remaining \$60,000. The gifts of this family to Trinity now amounts to close on to two million dollars, and with the new addition this institution will be several times more heavily endowed than any other Southern college.

A Well Known Man's Opinion.

The Savodine Co., New Bern, N. C.
We have derived so much benefit from the use of SAVODINE, that we wish to add our testimony to the list of those already acquainted with its merits.
My wife has been using SAVODINE for quite a while for cold in the head, also has found it a ready relief for CATARRH but above all that, is the fact of its having proved itself invaluable to us for our baby. A short time ago he was taken very sick, and as he would clap his little hands to his ear, we decided he must be suffering with earache, and realizing that something must be done at once, we put a tiny bit of SAVODINE in his ear covered it with warm cotton and in a few minutes he was sleeping as sweetly as though he had never had a pain. We cheerfully recommend Savodine as we will always feel grateful for what it has done for us.

Whitewash Brush in Spain.

In Spain, where the ruins of Moorish towers are seen upon the crests of many hills as the express train crawls along at the rate of fifteen or twenty miles an hour, the evidences of surviving Moorish influence upon the people and customs of Andalusia make an interesting study. In the city of Ronda it is plain that the ideas of home building which the Arabs brought into the Iberian peninsula remain vital today. The whitewash brush is the great leveler of distinction between the rich and the poor in Spain. The exteriors of homes—great manor houses upon the balconies, but of mountaineers clinging to the sides of the almost perpendicular hills, handsome homes of rich merchants in the cities and humble tenements—are nearly all of plaster. A few of them are calcimined in blue or brown or pink, but the majority are pure white. Ronda is a white city with a few patches of blue and pink and looks as if the whitewash brush had just been applied.—Louisville Courier-Journal.

Get Right Down to Business.

James Russell Lowell when ambassador to England contributed liberally to a London society and one day sent a deerskin young American there to be assisted home. But the American was told that, though his case was eminently deserving, the society was just then short of funds.

When Lowell heard this he sat down and wrote the society a terse and vigorous letter.

"Dear sirs," he began, "for the last seven years I have contributed annually 25 guineas to your organization. I regret to learn you were unable to assist the young man I recommended to you a few days ago. If you will kindly return to me one of my contributions I will send him to America at my own expense, as I am convinced the case is a most deserving one."

The society did not return any of Mr. Lowell's cash, but it found means somehow to dispatch the young man home by the next boat.

Send as a Fire Extinguisher.

Why are pails of sand kept hanging in some buildings? It is the usual thing to see hanging in large buildings—museums, factories, offices—rows of pails containing a liquid which can be used for extinguishing the flames in case of fire. It is quite common nowadays to see also a pail of sand hanging with the others or in a place by itself. This sand is for use in case of fire caused by an accident to the electric wires, bringing about what is known as "a short circuit." If water were used it would spread the electric current and probably increase the damage, but sand, properly used, very quickly extinguishes the flames.—Christian Science Monitor.

The Pick of the Parasol Production.
This is the best way to class our showing of Summer Parasols for ladies and children. They are surely the best of the heap. So pretty that they command instant and rapt attention as soon as they are seen. So new that you will be forced to admit never seeing anything like them before. And so reasonable that you can easily afford to have one to match every dress.
The showing consists of all the latest styles, Japanese, Mandarin, and the 17th century prevailing, in colors that rival the rainbow and are just as beautiful.
Do not miss this parasol parade. You will be sorry if you do. Your friends will all be under one of our parasols this Summer. So if you don't want your friends to get ahead of you—you had better get ahead of them.
Here Are Hints of the Prices Which Range From 50c. to \$5.00.
