FIRST POLITICAL RUMBLE OF 1912.

The meeting of the Republican National Committee in Washington City this week is the opening of the political scene that will be filled with active participants next year. Before the preliminary plans had been fully formulated, according to press reports, there were dissensions, more or less ominous. But once those under administrative control arrived and noted conditions, there was a cessation or only a low muttering of discontent, while the old process of might, that is machine might, rushed through to full and presumably "unanimous" adoption, a selected political order of exercises.

The dissatisfaction of Southern representatives, because of a possible cutting down of representation in the next Republican National Convention which is stated to meet at Chicago, June 18, 1912, seems to have been relieved by some kind of "promise" of no cut. This seems to be indicated as a certainty by the declaration of the committeemen from this State who ing to cure with local treatment, pro gave assurance that North Carolina was solid for Taft for renomi-

The selection of Chicago for the Toledo, Ohio, is the only constitutional convention city, brings the Taft cure on the market. It is taken internally in deepe from 10 draws to a termally in deepe from 10 draws to a termal ter movement close to what seems to spoonful. It acts directly on the blood be the President's political danger and mucous surfaces of the system. zone-Wisconsin and LaFollette. The Washington meeting of the National Committee has worked out its plan of action successfully, in crushing down any sign but a unanimous sentiment for W. H. Taft. It remains to be seen if the "lid" will stay on until the President is again nominated.

CONVENTIONS, AND ACCOM MODATIONS.

New Bern is naturally situated on railroad and water route to be an acceptable place as a convention city. The hospitality and entertainment that the citizens of New Bern extend to visitors makes every person and every organization and enjoy themselves here.

While New Bern in the past has entertained quite extensively there is more talk of its entertaining at dealers. present than ever before. Visitors from the North in hundreds. This or that organization is asked to come here at its next annual meeting. Make New Bern a con- pearance of a juror, vention city, is the popular cry. Seriously this convention invitation is the right thing, if this city can entertain in the way of comfortably providing hotel or boardng house accommodations for its visitors. But can this be done! The answer is to look about and see how many "extras" the present hotels and boarding houses can take for three days or one week. ot Delhi. Last summer for weeks there would be two or three days at a time when "all rooms taken" would be the word at the hotels here. And this was a dull period Last week with the Fire Preven tion Association here for two days, and not a large organization, at noon the first day the Gaston was filled, it was headquarters, while after the night train there were men walking about looking for a place to stay for the night. Those why my "convention city" should realize that the regular travel for Sew Bern to the regular season il fill every hotel and boardie one here. A Legend of Agincourt.

For many centuries we English have plumed ourselves upon the victory of Agincourt., Indeed it is from King that occasion, as given by Shakespeare, that the motto of this journal is taken, "Familiar to their months as household words." But the French have an account of the affair not so much to our credit. It was arranged. according to this fable, by the two leaders that only the nobles on each side were to fight. King Henry V. then artfully ennobled his whole army. and hence got the best of the enemy Shakespeare unwittingly gives a little countenance to the legend when he makes the king declare in the above mentioned address, "Be ye ne'er se vile this day shall gentle your condi

Blue Eyed White Cats.

Dr. Sichel. a French scientist, once observed that a snow white cat with blue eyes never paid any attention to sounds, such as the barking of a dog or the blowing of a whistle. He experimented with great care and found that all the white cats with blue eyes were stone deaf, but in cases where the iris of the eye had a little other color in it the creature could hear.
