tors and Longs Sell Heavily. New York, May 4.-Cotton has de-

clined sharply. This was due to several causes. In the first place the market had become heavily overbought. There has been no large outside speculation, ing of the Socialist party and affiliated yet in certain quarters the long interest has become very large. In the second place there were signs of better believed to have been due to the fact, weather at the South. And it is conthat thousands of persons on outskirts sidered after all as pretty early to kill the crop. The price is so high that many believe that every effort will be made to raise a big crop. On Wednesby the Socialists, who assert that day came a sudden outpouring of cotton members of the Industrial Workers of the World committed the set 40 points, or \$2 a bale, Waldorf-Astoria, Wall Street, Philadelphia spot interest, the South and the West sold in enormous blocks. Spot people were

s id to have sold a couple of hundred thousand bales here and in Liverpool. Some insist that the consumption has been overestimated and that a couple of million bales will be carried over into next season. This, it is figured, will largely offset any probable decrease in the coming crop. On the o'her hand, bulls contend that the technical position has been vastly improved by the enormous liquidation and the decided fall in prices. Spot sales at Liverpool on Thursday suddenly increased to 12,000 bales.

That was taken as meaning the spinners are more ready to buy, The spot situation is considered steady. There is only a certain quantity of contracts avaliable here in New York. Bulls may turn on the short at any time and put up the price sharp'y. All the reports go to show that the crop is 2 to 3 points late. Even in Texas that is said to be the case. It is also contended that we ther conditions from now on will have to be unusually good if a crop of the requisite size is to be raised. Meantime, the consumption continues reduction in the acreage.
