

NEW BERN GIRL IS INTERESTED

Wants to Know More About Those Young Americans Who Are Seeking Companions.

WRITES FOR INFORMATION

Young Woman From Greenville Also Displays Considerable Curiosity.

There's a New Bern lady who would not object to considering a matrimonial arrangement with one of certain good-salaried young Americans now in the Philippines. Yesterday's Raleigh News and Observer says:

Publication Sunday in The News and Observer of the unwedded lonesome plight of good-salaried young Americans in the Philippines and their longing for American wives has set the State's feminine heart to fluttering in a manner that suggests the addition of a matrimonial bureau to this paper's already multiplied activities. Everybody's talking about it, and two of the sex, who want their names withheld, have written the editor of the paper asking the address of one of the lonesome ones.

Unfortunately, this paper hasn't the addresses. More unfortunately still, the paper finds that it hasn't room in its present building to establish the matrimonial bureau which the speed of these responses on a bare hint has warranted. This suggestion is thrown out to those whose hearts have fluttered. A communication to the governor-general of the Philippine Islands, Manila, ought to reach the proper spot.

That only two of the State's women braved possible publicity to get into touch with the unmatched exiles is not saying that the hearts of only two were touched. And those who care to write to the far-away islands need only a two-cent stamp and patience to wait. Remember that the isles are half around the world, and that an answer will be a long time coming. But a June wedding is not impossible if action is quick.

The following letters were received: New Bern, N. C., Dec. 30.

Mr. Editor: Dear Sir: Kindly send me the name of the gentleman that has advertised in The News and Observer from the Philippine Islands that he wants to correspond with some young lady. Hoping to hear from you soon, Yours truly, Miss

Greenville, N. C., Dec. 30. Mr. Joseph Daniels, Editor News and Observer, Raleigh, N. C.

Dear Sir: In reading yesterday's paper I saw the piece on the Philippine Islands and I also read the young gentlemen's letter. If you have his name and address will you be so kind as to send it to me. And please don't tell my name. Sincerely,

DISOWAY—SIMPKINS.

Last night at nine o'clock at the rectory of Christ Episcopal church Miss Bertha E. Simpkins and Mr. W. J. Disoway, two young people, were happily united in marriage. Rev. B. F. Huske officiating. The groom is a son of Mr. and Mrs. R. J. Disoway and the bride a daughter of Mr. and Mrs. E. W. Simpkins. The news of the wedding will come as a surprise to many as only a limited number knew that it was to take place last night. The couple for the present will live with the groom's parents at 109 George Street.

THE EARTH QUAKED

Felt in Greensboro—Chimneys Fall in South Carolina.

Greensboro, N. C., Jan. 2.—An earthquake shock was distinctly felt here yesterday afternoon about 1:30 o'clock by a number of people. The tremor was sufficient to rattle window sashes, shake beds, rock chairs, etc. There was no damage done. Spartanburg, S. C., Jan. 2.—An earthquake of sufficient violence to cause a number of chimneys to topple over, was felt throughout the Piedmont section of South Carolina at 1:30 o'clock yesterday afternoon. The trembling of the earth continued for five or six seconds and caused people to run out of their houses in alarm. In the open country a low rumbling noise was heard.

Reports of the earthquake have been received here from many places within a radius of 100 miles in all directions. The shock does not seem to have been distinctly felt at points more distant.

In Union county the shock caused large cracks to form in the old county jail, while plastering fell in many residences. Many chimneys fell down at West Springs.

At Chester the shock caused a line-type machine to slide a short distance across the floor of a printing office. A second shock was felt there at 2 o'clock.

Charlotte, N. C., Jan. 2.—A slight tremor of the earth was felt at Charlotte yesterday afternoon at 1:28 o'clock, but no damage was done. Advice from points in the Piedmont and mountain sections of the State show the shock to have been general. At Kinston a chimney was shaken down.

Asheville, Ga., Davidson, Statesville and other points report the shock, but no damage. At Gaffney S. C., buildings were shaken and chimneys were thrown down.

Asheville, N. C., Jan. 2.—A slight but distinct earthquake shock was felt in Asheville about 1:30 o'clock yesterday afternoon, the shock being of sufficient violence to rattle window sashes, but no damage was done. Similar shocks were felt throughout Western North Carolina about the same time.

POPULAR RULE.

Senator Bailey is dreadfully worried about the initiative and referendum. The New York World doesn't see the occasion for so much anxiety. It remarks:

"We respond to the farewells of Joseph W. Bailey, Senator from Texas, with regret tempered with resignation and hope. He sees in the initiative and referendum the end of representative government. We see in it nothing but the extension of popular government."

"It is as old as American liberty. We have had it always. It comes to us now under a high-sounding name. It is going to submit many questions to the people, some of them trifling, no doubt. Yet we have had this power from the first and we are exercising it somewhere in the United States every year."

"Just now in the Nation we are about to recall by constitutional amendment an income-tax decision and we are preparing to recall the method by which United States Senators have been elected."

"If Mr. Bailey is so apprehensive of popular rule, why does he not stay in public life and fight it?"

The Senator from Texas has made a mountain out of a mole-hill. If disaster overtakes the American people, it will not be on account of their having chosen the wrong method of governing themselves, it will be because of decaying morals.

You can't judge a woman by her looks when she looks as if she didn't know you were looking.

CONSIDER STREET CAR EXTENSIONS

Representative of Loraine Iron Works Of Pittsburgh Is In The City.

CONFERES WITH THE MANAGERS

Two Additional Cars Ordered and More Trackage Found Necessary.

E. V. Stewart, representing the Loraine Iron Works of Pittsburgh, Pa., was in the city yesterday conferring with Mayor C. J. McCarthy and Dr. E. C. Armstrong, local managers of the New Bern Street Railway Company, in regard to some extensions which the company are contemplating making in the new line.

Some days ago the officers of the company decided that the three cars which are now in operation were not sufficient to handle the traffic and another car of the same type was ordered from the Cincinnati Car Company of Cincinnati, O. This is now under course of construction and will be delivered some time next month.

Last Monday Mayor C. J. McCarthy went to Richmond, Va., for a conference with Fritz Sitterding, one of the officers of the company. After talking the matter over these gentlemen decided to add still another car to the number now owned by them, making five in all.

With other cars added to the number now in use it will be necessary to lay another section of track at some point in the business district of the city in order to give the cars an opportunity of passing. After consideration the company decided to put this section of track on Pollock street between Middle and Craven, placing a switch at the corner of Craven and Pollock so that the car coming down from the Union station could turn into Pollock at that point and continue the trip to Ghent or Riverside while the car from Ghent or Riverside could come down Pollock to Middle and continue around the block to Craven as is now being done. Mr. Stewart is looking this route over with this object in view and is making estimates on the work. As soon as the proposed extension has been definitely decided upon the work will at once be started and rushed to completion in order to be in readiness by the time the next car arrives in the city.

SAY PREMIUM IS PLACED ON ARSON

Exhibit in New York To Show Alleged Laxity of Big Fire Insurance Companies.

A REMARKABLE EXHIBITION

Pictitious Furniture of Empty Flat Insured For Ten Thousand Dollars.

New York, Jan. 4.—One of the most remarkable exhibitions ever presented by a city is open to the public here under the auspices of the City Fire Department.

The exhibition consists of simply a few pieces of cheap furniture and some placards, from which it is learned that the furniture cost \$3.96 and was insured for \$12,500.

The purpose of the exhibit is to show the public how carelessly the big fire insurance companies are about writing policies. The department officials are engaged in a hot fight with the underwriters and it is the department's contention that the insurance companies "put a premium on arson" by lax methods in policy writing.

To prove its contention the department got together the 3.96 worth of furniture and insured it for a big fortune. In one instance the department agents even insured for \$10,000 the fictitious furniture in an empty flat.

"No wonder more than 25 per cent. of our fires are incendiary," declared Fire Commissioner Johnson today. "The method of placing fire insurance policies without inspection puts a premium upon arson by offering the financially weak, tottering or bankrupt man an irresistible temptation. Our exhibit is proof of this contention."

PARCEL POST IN THE COST OF LIVING.

As a novelty the new parcel post is affording much enjoyment to the American people in trial shipments of fruit, eggs, beefsteaks and what not. As a settled means of reducing the cost of living through the elimination of the middleman its worth remains to be proved.

Secretary Wilson thinks it will lighten the farmer's cost of marketing without lowering the cost to consumers. But when the farmer as a direct retail seller has taken upon himself the dealer's risks and costs of making up small packages for safe shipment, his gain may disappear.

Packages of a dozen eggs now coming into the city from within the first zone bear postage up to 14 cents, or over 40 per cent. on the present farm price of 3 cents, and there is the cost of the carton and packing to be added. But thirty dozen eggs in one crate from the same farm can come in by express for around \$1.50, or only about four cents a dozen.

No more need be said to show that the parcel post is not to settle the high-cost-of-living problem. But the law of greater economy in transporting by wholesale remains unrepaid.—New York World.

WILL PARADE IN MEDIEVAL DRESS

In Suffrage Pageant In Washington Women Will Wear Ancient Costumes.

PLANS HAVE BEEN PERFECTED

Allegorical Figures Will Portray Condition of Women From Beginning to Now.

Washington, Jan. 4.—Plans for the woman suffrage pageant March 3 have been perfected. The novel spectacle of women wearing medieval and ancient Greek costumes will be witnessed.

The procession will be divided into five sections and with each section will be heralds dressed in medieval costumes, who will from time to time along the route of the parade repeat famous suffrage speeches which have been made in the last few years in this and foreign countries. The parade will be composed of floats, allegorical figures portraying the condition of women from the dawn of creation down to the present time. So far as possible, women musicians will compose the bands and the demonstration will be reinforced by the presence of parading men sympathizers of the cause.

A resolution appealing from the decision of Major Sylvester, chief of the Washington police, to refuse the women a permit to parade on Pennsylvania avenue was adopted and vigorous protests against the edict will be made to commissioners. Failing of redress here the women propose to take the matter to President Taft. For over one hundred years Pennsylvania avenue has been open to men parades, and the refusal of the first request made by women for a similar privilege will be met with a general campaign of resistance.

SECOND-HAND AIR

It is getting to be so that everybody wants everything he uses to be his individual own. We don't believe in common drinking cups, common tooth brushes, common combs and brushes, common roller towels, and we insist on having our own napkins, knives, forks and plates, and even then we don't like anybody else to wear our clothes, certainly not our undergarments, and nobody ever thinks of taking a bath in a tub full of second-hand water. But how about the air you breathe? You don't hesitate to bathe the delicate membranes of your lungs with the foulest kind of second-hand air, reeking with all manner of noxious odors, ranging from sour stomach, decayed teeth, sore throat, etc., up to tobacco smoke, onions, liquors, etc. Why should second-hand bath water, with no odor and probably little color or taste, be objectionable to the outside of our bodies when we bathe the interior of our bodies with foul second-hand, adulterated air with such impurity?

It is very largely a matter of education, and some day we will get educated sufficiently so that we will resent breathing somebody else's second-hand breath as much as we now resent washing our face in the same bowl of water that he has just used. Board of Health Press Service.

TELLS OF HUGE PORKER. B. B. Hurst, Craven county's genial Treasurer, has returned from a business trip in Jones county. While at Trenton, the county seat, he paid a short visit to the farms of Daniel and Jack Dixon, two prosperous merchants and farmers who live near that place. These gentlemen were superintending the slaughter of a number of hogs at the time and displayed three of the porkers which had just been dressed. Two of these weighed three hundred and fifty pounds each while the other tipped the scales at seven hundred and twenty-five pounds.

New Bern's record for 1912 was fine, but watch 1913.

CORN CLUB STARTS WELL

Valuable Prizes Offered By Business Men of City.

GOETHALS SUBORDINATES SAID TO HAVE PADDED FIGURES OF WORK DONE.

Actual Opening Far Off.

Colon, Panama, Jan. 2.—A period of many months probably will elapse before the Panama Canal is thrown open to navigation by the world's fleets before vessels of deep draft can go through.

A rumor to this effect, coupled with a grave scandal, has been in circulation here for several weeks, but recently, with the visit of President Taft, it has come to the front with startling distinctness.

Although semi-officially confirmed, the story still lacks official sanction. Briefly, it is said that subordinates of Colonel Goethals have been padding their figures on excavation, that the records show the big ditch much nearer completion than actually is the case, and that the real opening is farther off, although an effort will be made to admit light-draft vessels at the time originally planned.

According to the report, there must be excavated eleven million cubic yards more than was thought. This in the great Culabra cut, the center of the canal, all the real trouble the canal has given the engineers. The belief is general here that the situation in detail was put before President Taft during his visit. Before that time Colonel Goethals is said to have placed his finger upon the seat of trouble and followed it with a heavy hand. The canal route was resturveyed, and there were many shifts in positions of canal employees.

The total amount still to be dug out of the cut is 6,566,068 cubic yards, according to the official figures. This is about seven or eight months' work. It would bring the work in the cut to a close about next June or July, provided there are no more slides, a probability ever present, and in fact, now considered as one of the real retarding agents of the channel's completion.

The canal will be opened on time, but there will be no super-dreadnaughts or thousand-foot ships passing through for many months to come. The repair of tissues were activated 10 times only a cutaneous wound would heal in less than 24 hours and a fracture of the leg would be cured in four days.

After attempting experiments on live animals he found that the laboratory work could be carried on much more effectively, and it could be observed more carefully by using tissue which had been removed from animals and kept alive in suitable media and glass jars.

ANNOUNCES NEW SURGICAL FIND

Dr. Alexis Carrel Reports First Great Scientific Discovery For 1913.

WILL ACCELERATE HEALING

With It, It Is Promised, Fractured Leg Can Be Healed In Four Days.

New York, Jan. 3.—Dr. Alexis Carrel, of the Rockefeller Institute for Medical Research, who received the Nobel prize for medicine in 1912, is the first to announce a great scientific discovery in 1913.

In the current issue of the Journal of Experimental Medicine, the official organ of the Rockefeller Institute, dated January 1, he predicts, as the result of a series of experiments which have been in progress since 1907, the possibility of healing a cutaneous wound in less than a day and the repair of a broken leg in four days.

Although Dr. Carrel does not mention it in his preliminary report, the assertion is also made that the reparative process may become applicable not only in cases where the tissues have been divided, as in knife wounds, but in cases where large areas of tissue have been destroyed in various parts of the body by disease.

Dr. Carrel's latest discovery is the result of speculation as to the manner in which cells multiply and thus effect the growth of tissues. If it were possible, he urged, to become possessed of this knowledge, it ought to be possible also to promote this proliferation of cells and the consequent growth of connective tissue by artificial means.

Aided by the knowledge of the fact that growth of the body is dependent in many respects on the more or less mysterious activities of some of the ductless glands a mixture of thyroid for instance—he applied a mixture of thyroid extract and macerated portions of other organs of the body to cutaneous wounds.
