

Stiff Joints Sprains, Bruises

are relieved at once by an application of Sloan's Liniment. Don't rub, just lay on lightly.

"Sloan's Liniment has done more good than anything I have ever tried for stiff joints. I got my hand hurt so badly that I had to stop work right in the middle of the day. I thought at first that I would have to have my hand taken off, but I got a bottle of Sloan's Liniment and cured my hand."—WILSON W. WATKINS, Morris, Ala.

Good for Broken Snows

G. G. Jones, Baldwin, N. J., writes: "I used Sloan's Liniment for broken snows above the knee caused by a fall and to my great satisfaction was able to resume work in less than three weeks after the accident."

SLOAN'S LINIMENT

Fine for Sprains

Mr. Charles A. Young, of Somerset, N. J., writes: "A friend sprained his ankle so badly that it was black. He laughed when I told him that I would have him out in a week. I applied Sloan's Liniment and in four days was working and said Sloan's was a right good Liniment."

RIVERS AND GREAT CITIES.

Wherein the Thames and London Are Different From Others.

London without the Thames is unthinkable. Not only is it the source of the great wealth and trade of the world's metropolis, but it brings food and drink to its many millions. Yet this is not the case with other great cities of the world whose rivers have had little to do in the building of their fame and position. In "The River of London" Mr. Hilaire Belloc points the contrast:

"Little sea borne traffic reaches Paris by the Seine; the Tiber could never be a street for Rome; Vienna neglects the Danube; Antwerp protects no great crossing nor has ever been the nucleus of a state; and Bremen, the nearest parallel, was not the strategical pivot of Normandy nor ever formed, as London forms, a chief fraction in the economic power of its province. The two rivers which are sacred to Lyons never fed that town; the Rhone watered but did not lead to Arles.

The towns of Lombardy depend upon the fertility of the Po valley, but the stream is nothing to their commerce or to their political eminence, and Milan and Venice and Turin are independent of it. Saragossa was the mistress of Aragon, but the Ebro did not make Saragossa, and, as for Madrid, the trickle which runs below Madrid is best described in the story of the Spanish patriot who was dying of thirst after battle, but upon being offered a cup of water said, 'Give it to the poor Madrileños—the river upon which Madrid stands.'"

CHILD WEDDINGS IN INDIA.

Candy Kept the Baby Partners Quiet During the Ceremony.

Four hundred marriages were performed simultaneously at the last wedding celebration at Surat among members of the Leva Kumbh caste.

None of the brides was more than twelve years of age, the majority being from one to seven years old, while the bridegrooms varied from three to nine. Most of the contracting parties sat or lay on the laps of their parents during the ceremony and were given sweets to keep them quiet.

The caste only celebrates every ten or twelve years.

These baby brides, of course, do not join their husbands when they are married. They wait until they reach the age of ten or eleven, when there is a second marriage. Should a baby bride's husband die before she reaches the age for the second marriage she becomes a widow and has to remain so all her life. In such cases the widow at once loses caste. Her ornaments are taken off her, and she becomes a sort of outcast, hardly treated, looked down upon and generally made a household drudge.

The husband, on the other hand, should his baby bride die before the second marriage, may marry again. In fact, he is expected to do so within a few months of the death of the bride.—Bombay Cor. Philadelphia Ledger.

A Sincere Provider.

Bobbie M. was visiting with a neighbor while his mother was in the city on a shopping trip. Bobbie and two other children played at housekeeping in the backyard, and in the course of the housekeeping Maria believed she needed supplies.

"Bobbie, you go for some ice cream and lemons at the grocery," commanded Maria, and Bobbie obediently trotted into the alley at the rear, as Maria believed, "jes' playin' he was goin' to the grocery."

Ten minutes later, Mrs. S., with whom Bobbie was visiting, went to the telephone, and the voice of her grocer inquired:

"I guess Bobbie has lost the money for the ice cream and lemons he came after. I can't find any change in his pockets. Or did you want the things charged?"—Indianapolis News.

"Stagger" Oil.

From the beginning of September until November a small fish called stickleback is caught in considerable quantities off the island of Dunmunde, at the mouth of the Devina river, in the gulf of Riga, and also near the island of Semgallen, in the Devina river, near Dunaberg, Russia. The fishermen make an oil from this fish which is very useful in the leather and harness industry as a preservative. The name of this fish is "Stichling" in German; the common name is "kasegaze," and in some communities it is called "stagger."

Wisdom and Love.

How shall we help the life of the future? Simply by putting wisdom and love into our own life and into human affairs. All genuine virtue is vital and vitalizing. It carries in it the power of God to conquer evil and establish righteousness. It is a living seed, holding in itself interminable harvests of its own kind. Planted in human society, it will bear fruits of welfare through the centuries.—Charles G. Ames.

Stood by His Theory.

Thales, the ancient philosopher, declared that there was no difference between life and death. "Why, then," cried one of those to whom the remark was made, "don't you put an end to your life?" "Because," was the reply, "there is no difference."

His Mind Occupied.

"St," the exclamation when he kissed her, "You forget yourself."

"Credibly," he replied calmly. "But I can think of myself any old time. And now you are occupying my undivided attention."—Boston Transcript.

Mrs. Charles Duffy was the charming hostess at a delightful auction bridge party Friday evening at her colonial home on Pollock street, complimentary to some of the guests of the Federation. The guest of honor was Mrs. Goe. Floyd Ross of Greensboro, house guest of Mrs. Duffy's during the Federation.

There were seven tables of auction bridge and the score cards were of Dutch design. Profitable Side Dressing

The use of side dressing is increasing on COTTON and CORN. It pays to do it, if one uses the right goods.

Two applications of 200 lbs. each per acre are recommended by a well-known Southern investigator and experimenter. He suggests a 5-5-5 formula, or a mixture of equal parts of Acid Phosphate, Kainit and Nitrate of Soda.

Side dress cotton when the plants are 10 inches high and again when the bloom begins to open. Where cotton is inclined to rust, use

KAINIT

making two applications of 200 pounds each per acre.

This is also effective against root lice and cut worms on corn, if applied early enough. It will pay you to try it, for Potash Pays.

Order Kainit now before the supply is exhausted. We sell Kainit and Potash Salts, any quantity from one 200-lb. bag up.
