CLAIM TO CURE CONSUMPTION 1 0P1 - 1 About One Third Of The Amoun

A. T. or Canada

Spent For Advertising-Con-... sumptives Very Hopeful:

New York, July 4 .- Within the last Judge Mand, "that the claimants shall "cures" for consumption have tried upon thousands of victim in the United States and the exploiters nostrums have reaped a clear profit of no less than \$15 000 000. This is an estimate made by The nal Association for the Study and Prevention of Tuberculosis in a

issued today. The National Association estimates that not less than \$20 000,000 is invested in the business of manufacturing and exploiting fake cures for tuber and that the annual income from these concerns and individuals h \$15,009,000, About one-third of this amount is spent for advertising, leaving a profit of \$10,000,000 a year, "which is "blood money" taken from

Threat consumptive. Threat Links 100 consumption cure water are distinguished by the As-codition, the first being the "institute" frind, where a pseudo-hospital or dispensary is established and the wily "doctor" or "professor" admin-isters "treatments" at so much per These concerns also carry

on a mail order business with great profit. The second group of cures contains over a hundred different kinds of drugs and "patent" devices, any of which may be purchased at a drug GIVE U. S. TEAN store. Usually the consumptive is charged from \$1.00 to \$5.00 for these and the institute "cures," when he could make them up himself in exactly the same form for from one to five

The third group of "cures" includes e-made rememies, which certain deluded individuals believe will self deluded individuals believe will cure tuberculosis. Among them are such things as onions, lemons, coal sincke, pig's blood, alcohol, dog oil, teas of altrious kinds, and a variety of diets, including goat's meat, clab-

made that European athletes will give the United States team much harder bered milk and a score of other articles. These are not usually advertised for and closer battle for Olympic honors profit, but are usually given publicly than heretofore by J. W. Spalding,

unes do sometimes come h nto touch with life and work for the to not count. The work was hard, out I enjoyed it, for I was making ed prior to 1571, when he was ele-

vated to the position of regent of Scotiand. This was the curse: "Thy lands shall be given to the stranger, and thy titles shall he among the dead. The branch that springs from thes shall see his dwelling burnt "My mother is still in New York in which a king was nursed-his wife and I hear from her often. She is a sacrifice to that same flame, his chilthe only one with whom I have kept in touch. I haven't had the time to dren numerous, but of little honor and three born and grown who shall never see the light. Horses shall be stabled keep in touch with my old friends, my work has interested me so. My only in thy hall, and a weaver shall the ambition now is to continue on the his shuttle in the chamber of sta job and continue to make good and make e name for myself on my merits." and a beacon until an ash sapling shall According to O'Brien, he was born spring from its topmost stone. Then Brooklyn. His mother, Catherine shall thine honors be restored. The kiss of peace shall be given to the countess, though she seek it not, and the days of peace shall return to thy,

> In the course of 300 years every part of the curse was fulfilled. Then in 1820 the ash sapling duly appeared. Two years later George IV, restored the earldom, and later Queen Victoria kissed the countess.-London Cor. New, York Sun.

SUMMER IN THE ARCTIC.

Between the Heat and the Mos Life Was a Burden, Stefansson, the arctic explorer, writ

ing in Harper's Magazine, tells of the discomforts of summer days in the far north:

July was intolerably hot. We had no thermometer, but I feel sure that many a day the temperature must have been over 100 degrees in the sun, and sometimes for weeks on end there was not a cloud in the sky. At midnight the sun was what we would say an hour high, so that it beat down on as without rest the twenty-four hours through. The hottest period of the day was about 8 o'clock in the evening and the coolest perhaps 4 or 5 in the morning. The mosquitoes were so bad that several of our dogs went completely blind for the time through

the swelling of their eyes, and all of them were lame from running sores. caused by the mosquito stings on the line where the hair meets the pad of the foot. It is true that on our entire expedition we had no experience that more nearly deserved the name of suffering than this of the combined heat and mosquitoes of our Coppermine river summer.

Scott and Thackeray.

Sir Walter Scott once confessed to having a bad memory, but in dealing with the wealth of historical incidents in his books he is remarkably accurate On occasion, however, he is at fault. In "Ivanhoe" Wamba says, "I am a brother of St. Francis." The order of St. Francis was founded in 1206, but Wampa lived in the time of Richard L. 1189-99. In the "Heart of Midlothian" Scott errs in some of his references to Bedreddin Hassan of the "Arabian Nights." As Thackeray copied the same mistakes into "Vanity Fair," be is also at fault. One of Scott's most picturesque incidents is that in "Waleads Flora Melvor out to the dance. fell to forty instead of rising, as is Scott erred knowingly ca be said, but a reliable authority has recently told us that "there is nothing so authentic as our knowledge of the fact that Prince Charles never danced at all."-Westminster Gazette.

food. In a word, prevention of pucumonia is now much clearer than it was. Like all the other infectious diseases, in-stend of being a more or less inevita-ble dispensation, it has come to be rec-ognized as due to certain definite fac-tors which can be greatly issued by workide and individual hygienic regulapublic and individual hygienic regula-tions.-Journal of the American Medi cal Association.

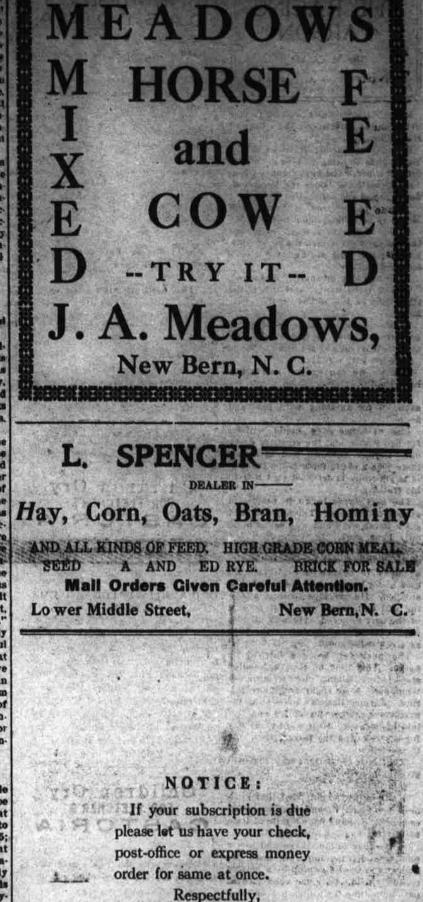

THE GREAT PYRAMIDS.

Methode of Building and Wonderful Accuracy of Measurement. Herodotus thus describes the build-ing of the pyramid of Cheops, and his deductions are probably as correct as those of any archaeologist of today, for the modern investigators have had the descent work on the ancients to depend very much on the ancien for their interpretations of inscriptio

"This pyramid was first built in the form of a flight of steps. After the workmen had completed the pyramid in this form they raised the other stones by means of machines, made of short beams, from the ground to the first tier of steps. After the stone was placed there it was raised to the second tier by another machine, for there were as many machines as there were tiers of steps, or perhaps the same machine, if it was easily moved. The highest part of the pyramid was thus finished first, the parts adjoining it were taken next, and the lowest part, that nearest the earth, was taken last." One thing that has been especially noted in the pyramids is the wonderful accuracy of measurement. In the great pyramid of Gizeh the four sides have mean error of only six-tenths of an inch and twelve seconds in angle from a perfect square. The construction of this pyramid is thought to have em. ployed 100,000 men for thirty years or more, probably half a century .- Atlanta Constitution.

How the Pulse Varies.

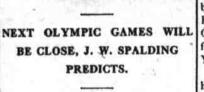

The human pulse has rather a wide range, but the general average may be put about as follows: At birth, 140; at two years, 100; at from sixteen to nineteen years, 80; at manhood, 75; old age, 60. There are, however, great variations consistent with health. Na poleon's pulse is said to have been only forty-four in the minute. A case h also related of a healthy man of eightyseven whose pulse was seldom over thirty during the last two years of his life and sometimes not more than twenty-eight. Another man of eightyseven years of age enjoyed good health and spirits with a pulse of twentynine, and there is also on record th curious instance of a man whose puls in health was never more than forty stent in his incon five, and, to be con verley," when Prince Charles Edward five, and, to be consistent in his incon
