PLENTY OF CLOTHES BUT

HAVE NO MONEY.

(By The Associated Press.)

TOK10, Apr. 6, - Residents of Vladivostok have plenty to ent and plenty of clothes but no money, according to a correspondent of the Kokusai News Agency who has just returned from that city.

"Good beef can be purchased for 20. cents a pound," he says and continues; "A good suit of clothes cost about one third what they do in America and other things in proportion. The only thing the people lack is money to spend. Coin has virtually disappeared from circula tion and nobody will accept the paper notes. Wages, even of government employes, are paid in food, clathes and tickets for use with the public utilities "The plentitude of these necessities is explained by the fact that huge stores have been imported into Vladivostok for shipment into the interior and are being held there indefinitely. These stores, are being drawn upon, "A few miles out of Vladivostok to

the north conditions are very different. There the population has neither money nor supplies, and hunger and cold have taken liberal tolls of the Russians. The Chita authorities have been sending clamorous demands that Vladivostok share her supplies with the test of Si. beria, a call to which the local authorities have shown no disposition to respond, even if the Japanese traild let them.

"These latter have been taking the stand that until it is certain that Japan will not have to fight Chita they will not permit the exportation of anything that may later be used against the Japanese forces. "The lack of acceptable money in

Vladivostok is resulting in business stagnation. Anyone with good money can buy anything he wants and cheapiy but in its absence nothing can be sold. Business houses are fast closing their doors and factories are shutting down."
