A Hudson Advantage That is Distinctive

Its Smoothness and Ease of Operation

Hudson owners tell us they most appreciate the utter forgetfulness of mechanism they are permitted in their cars.

Neither sound, nor the lapse of any function calls it to attention. Even minor adjustments, which are annoying, though not costly, are almost never necessary. And command of the controls seems intuitive—hardly needing conscious direction.

Men say the Hudson Super-Six requires a minimum of care with years of smooth, dependable, punctual conveyance, without default or absence from service.

And we have a gratifying pride in knowing that more than 100,000 owners drive Hudsons, without envy, we believe, of any other car, no matter what its price.
