OSTEOPATHY

Do you know?

That Osteopathic Physicians undergo a scientific course of training which comprises four years of nine months each.

That this course is the same as is taught in the best medical schools, except that NATURE'S WAY (Osteopathy) is substituted for drugs and the course in applied anatomy is more extensive.

That Osteopaths have the highest regard for both major and minor surgery, but they consider them as The Court of Last Appeal.

That Osteopaths practice obstetrics, use antiseptics, give antidotes in case of poisoning.

That it does not pretend to be a cure-all. That there is no magic or mystery about the treatment or the results. It is simply APPLIED COMMON SENSE.

That it is not massage. (Osteopaths DO NOT RUB) but is a scientific adjustment of deranged body tissues.

That it is never rough, never drastic, never complicated. The treatments are seldom lengthy and almost always successful.

That it is equally safe and beneficial for infants and the aged. Its results are simple and lasting.

That Osteopaths do general practice, treating both acute and chronic diseases with remarkable success.

That careful instruction as to dietetic and hygienic care is always given by Osteopathic Physicians in addition to their regular treatment.

That if you want to know more about Osteopathy you had best ask an Osteopath as there are many people who through ignorance or because they "have an ax to grind," will misrepresent it to you.

That Osteopathy owes its success to those who have tried it fairly and then told their friends.

Its mission is to fight disease and no other systems of healing.

That the man who is down on Osteopathy is the man who is not up on it.
