Hot Bread is All Right If Properly Raised

The prejudice against "hot Bread"—the feeling that it is indigestible—comes from the fact that so much hot Bread is hastily made with inferior substitutes for Yeast that raise the dough without fermenting it.

Good, healthy fermentation is required for good Light Bread—Bread that will retain that delicious wheat flavor, whether hot or cold.

Plenty of fresh Yeast means good, healthy fermentation. It means Light Bread that is digestible and nourishing.

Hot Breads made with self-rising flour, baking powder or soda, if eaten constantly irritate the digestive organs. Insist upon your grocer supplying you with—

MILLER'S

Butter-Nut Bread

Made with Yeast

It is the all-delicious loaf, richest in the nutrition that supplies energy and satisfies appetite.
