

THE GREATEST OF ALL JOYS

IS CREATING THE POSSIBILITY OF HAVING THINGS

LEARNING how to save dollars is the foundation of a possibility.

WHEN you save as much as you can;
WHEN you educate yourself for greater things;
WHEN you keep track of the small things and have a bank account to do it with, you will accomplish whatever you set out to do.

USE our bank for that purpose.

HIVE OF BEES SIXTY FEET FROM TERRA FIRMA

"Rocky-bye baby in the tree top As the wind blows the cradle will rock."

R. A. Daniel, who lives near Sam Gatewood's store, found a swarm of bees on a tree in his yard sixty feet from the ground the other day. The swarm was so large that he couldn't let them down. And as they were on a perpendicular limb he went to work and constructed a gum or hive for them, sawed off the limb just above where the bees were swarming, elevated the hive to the stump of the limb which he had sawed off and safely hived that swarm of bees in that gum, and left it there.

If any one knows of a bee gum more than sixty feet from the ground the columns of this paper are open for an account of the same. Simon Styletes, the famous ascetic, once lived sixty feet above the ground on a column. But a real honest-to-goodness swarm of bees living up that high is something unheard of before.

SUNDAY SCHOOL DAY OBSERVANCE

Prospect M. E. Church

Sunday evening, May 30th, was the occasion of the observance of Sunday school day at Prospect church, three miles west of Yanceyville. It was pronounced by those present as decidedly interesting, and hopefully inspiring. If the man who declares that the church has lost its hold upon the masses was there, perhaps his thinking has been recast by this time.

Certainly the occasion was enough to silence croaking in all its pestiferous forms. The bright faces of all those who participated and the immense crowd of on-lookers constitute sufficient reason for keeping our faces to the sun-rise as a prophecy of a gladder day.

The reason such success was possible may be summed up in just two words, "faithfulness" and "co-operation." The faithfulness of those who directed and trained for the exercise was quite apparent, and is entitled to unstinted praise. And this is matched only by the co-operation of the parents and children. Abiding influences are confidently hoped for.

Miss Flora Hood made an interesting and inspiring talk at the meeting of the B. Y. P. U. at Yanceyville last Sunday.

J. A. Boswell, of Danville, a former citizen of Caswell, has opened a restaurant in the R. T. Wilson store on the court square at Yanceyville.

TEN THOUSAND PIGEONS LET LOOSE AT DANVILLE

On last Saturday morning at 5 o'clock ten thousand homing pigeons, with tags on their legs, were let loose in Danville by L. Lichty, of New York, representing the United Homing Pigeon concourse of New York, and the Jersey concourse.

The birds were released to make the race for their homes in New York and the New England states. The distance to New York is 404 miles. The normal flying time for the feathered fliers is eight and one half hours. It is said that if the wind is behind them they can make the trip in seven hours.

It is said that the pigeons do not stop in their flight till they reach home, unless one is forced to drop from exhaustion.
