A Wonerful Invention

Zoology teaches that the hairs of the head are hollow, and contain an oil that gives them life. In clipping the hair with scissors, this hollow is left open, and the hair loses its life-giving properties.

I have a Machine named the Singeing Machine, which removes the hair and at the same time closes up the hollow, causing the hair to retain its life-giving properties, and therefore stopping the hair from falling out or dying, and giving it a soft growth.

Call and examine this machine and have your hair singed.

Special attention given to dressing Ladies' hair. Cutting done with exquisite and artist's skill by the old University Barber of twenty years' experience.

The singing machine is highly recommended by scientists throughout the country. Very Respectfully,

T. D. DUNSTAN,
Professor of Tonsorial Art.

Smith first on hit to centre. Hildebrand hits to third, makes second on fumble, advancing Smith to third. Kafer out on foul.
