 Wilson, E. L., Cyclopedia Pho-tography.  
 Woodbury, G. E., America in Literature.  
 Campbell, D. H., Lectures on the Evolution of Plants.

### Dr. Hume's Address Before the Y. M. C. A.

Dr. Thomas Hume's very strik-ing address on Thursday night was heard by a good audience. The subject was an unusual but appro-priate one, a review of the history of the Association and the lessons to be derived from the four crises in its life. Its resuscitation from approaching death, two remark-able spiritual awaknings and the inspiring Students' Volunteer Movement in which, several years ago, the Association was the affec-tive leader were briefly and vividly sketched by one who had taken great interest in things.

Teacher—"Now, we have named all the domestic animals except one. It has bristly hair and likes mud and dirt. Do you know what it is, Johnny?"

Johnny (shamefacedly)—"Yes'm, it's me."

"Speaking of bathing in famous springs," said the tramp to a group of tourists, "I bathed in the Spring of '86."—Ex.

Tis better in your haste to state All men are liars, than To pick out one and designate That fellow as the man.—Ex.

Weary Willie—Did you ever see a dog dat would eat dirt?  
 Frayed Foster—No; has some dog been bitin' you?—Ex.

### Inter-State Convention.

The first inter-State Convention of Young Men's Christian Associ-ations of the Carolinas was held at Spartanburg, S. C., February 20-24. Among the prominent speakers present was Rev. Henry Van Dyke, of Princeton. A pleas-ant reception was given to the con-vention Monday evening by the stu-dents and faculty of Converse Col-lege. About two hundred dele-gates, a third of whom were col-lege men, were present. Dr. Ven-able and Mr. Mitchener, of New York, spoke to the college men Sunday morning. Those present from the University were: Dr. Ven-able, Messrs. R. M. Harper and E. McDonald. Three more Uni-versity men were at the convention representing their respective asso-ciations, Prof. Holmes, of Elon College; Dicie Winston, of Frank-lin county, and S. E. McNeely, of Mooresville.

### Base Ball.

The base-ball practices so far have been impeded by the weather. The candidates, however, have been working as much as possible; and they look like a promising lot from which to choose a team. At present the contests for the differ-ent positions are very interesting, for the fact is well established that Carolina's players make the Varsity by ability only.

The first game of the season will be played with Bingham Monday. Bingham has a good nine this year and she will make things interest-ing for the Varsity. It will be pleasant to see the White and Blue on the diamond again, and to hear the yells as the contest proceeds. The opening of the season is greet-ed joyfully.

### A Knock.

There is very little rooting at the base-ball practices, except an oc-casional laugh or jeer. Whenever a player happens not to stop a ball he is laughed at by on-lookers who couldn't stop a hoky-poky go cart in August. Such jeerings by the weak may be natural and unavoid-able. So the writer urges very ten-derly that all who must laugh and jeer when they see a superior's er-ror will kindly, for the sake of the team, keep away from the prac-tices.

The University man watches these practices critically, and when he sees a good play he "opens up" to support the work with his appro-val. New students will please take notice.

### In Boston.

Conductor—How old are you, my little girl?  
 Little Girl—If the company does-n't object, I'd prefer to pay full fare and keep my own statistics.—Ex.
