The question, "Resolved, That the ownership and operation of interstate railways by the government would subserve the best interests of the United States", which is also the query for the Georgia debate, was submitted to George Washington, who took the negative. Brain and Eye

HOW EYE-STRAIN RETARDS STUDY.

Many students possessing superior minds oftentimes fancy themselves dull because they fail in their studies.

The reason is simply this: They are afflicted with so much eye strain that it requires nearly all the nervous force they possess to fix the eye upon their books, thereby exhausting the energy of the brain.

Many students unwisely sacrifice their health in attaining an education, because of the large amount of brain-strain sustained in the close use of their eyes, though their vision seems excellent. This form of brain-strain is easily detected by an expert and most always remedied by glasses properly adjusted.

If you break your glasses don't send them away for repair, taking the chances of delay and mistakes. Just bring the pieces to the office and I will do the rest.
