

A Fair Request.

(Continued from first page)

ber of the recipients of negatives are not pleased. Some appear inconsolable. A fair example of these last is our friend Jerry Reeves. If I can explain how he feels about his negatives, I think that you may see what I am trying to do.

The other night I dropped in to see Jerry. He was in his rocker and agitating it violently. He held a bit of paper in his hands, which he handled as though it hurt him. From time to time he inspected it closely, and emitted sighs and moans.

"Jerry, I asked, what's the matter? Jerry continued to rock, but handed me the bit of paper, at the same time turning his head. Upon the paper was a negative that looked like Jerry, no doubt about that. Even that bashful, girlish expression of Jerry's generous mouth had been transferred to the paper by the photographer.

"Well, don't you like it, Jerry?" A howl of rage from Jerry, and so trying to please him, I remarked, "It's real good of you, Jerry. Why he even got that bogus look of innocence that you wear when self-conscious.

"I know it, wailed Jerry. He has got me. That's what's the matter. I didn't know that he'd take me so consarned literally. Why dad-burn it, I did want to look pretty in the Yackety Yack."

It was too much. Jerry broke down, and I shed sympathetic tears upon his four-days-less-than-spotless shirt-front. So now, Mr. Holladay, you can locate this trouble. Wont you, please sir, take good-looking photographs of the Senior class? They are doggoned ugly, we'll admit that, but we can't have their feelings hurt.

If yours is a camera that wont tell lies, can't you substitute some photographs from A. and M. or Trinity, where the boys are handsome? Or perhaps you might borrow some from the young members of the faculty, those who don't look like they did when they appeared in the Yackety Yack.

A Senior.

The Biological Journal Club, which was suspended last fall on account of the pressing business of some of the members, had its first meeting this year with Dr. W. C. Coker on Saturday evening. There were quite a number of advanced biological students present and interesting talks and reports were made by Professor H. V. Wilson and Dr. Coker.

Rev. W. C. Royall made a helpful talk before a number of interested students at the regular meeting of the Y. M. C. A. in chapel on Tuesday night. The topic was "The College Man's Sabbath."

The wearers of the N. C. met in the Y. M. C. A. at 6:45 P. M. Wednesday.

Mr. J. D. Boushall will leave for Raleigh to tomorrow visit relatives.

The University
OF
North Carolina.

...1789...

HEAD OF THE STATE SYSTEM OF EDUCATION.

...1908...

The University stands for thoroughness and all that is best in education and the moulding of character. It is equipped with 16 buildings, new water works, central heating, electric lights. Eleven Scientific Laboratories, equipped for good work. The Faculty numbers 74. Students 730. Library of 45,000 volumes. One librarian and four assistants. Fine Literary Societies. There is an active Y. M. C. A. conducted by the students. Scholarships and loans for the needy and deserving.

Your Cotton Crop Can Be Increased

It costs no more to cultivate an acre that produces two bales of cotton than an acre which produces only one-quarter of a bale. Why not see what you can do with

Virginia-Carolina Fertilizers

Other men have been able to double and more than double their yield per acre with a liberal application of Virginia-Carolina Fertilizers.

Messrs. Lucas & Jackson of Kelsey County, Tenn., used Virginia-Carolina Fertilizer on about 55 acres planted with cotton, and say: "We have the finest crop of cotton we ever saw, and all the people around here think the same. We actually counted 447 bolls on one stalk. Another stalk had by actual count 409 bolls, forms, squares and blossoms. On about 8 acres we expect to make about 2 bales to the acre, and an estimate of adjoining farms not so fertilized and under other cultural methods, will yield only 1 bale to five acres."

An interesting picture of the cotton plants referred to will be found in the new 1909 Virginia-Carolina Farmers' Year Book, copy of which may be had from your fertilizer dealer, or will be sent free, if you write our nearest sales office.
