rate. Preventics have already added about twelve years to the life of a man.

Work is being done in the study for prevention of tuberculosis. This will be prevented to a great degree by sanitary conditions. Dr. Welch states that the greatest need now is for trained health officers.

With a view of the position of a physician Dr. Welch closed. He pointed out that the M.D. now occupies a much broader position in regard to society than formerly.

ALUMNI DAY

(Continued from First Page)

Carolina was third in wealth. Manufactured products were greatest in the South at first. This established the fact that industry, even under hard conditions, is not foreign to the South.

The North Carolina boy was even yet greater in defeat. No small state ever yet made a greater sacrifice than North Carolina made for the Lost Cause. The last charge was by the North Carolina boy; more muskets were surrendered by him than by any other state. The figure of the Southern soldier will hold the word forever.

Such men we call our fathers. Thus we have the heritage of a good name. The South will never be subsidized for the lesson of the past has been learned by heart. We know that patriarchal society is helpless in a mechanical age, and that heroism in war cannot take the place of industrial civilization.

In education, industry, and agriculture the South is making a constructive effort. Education is coming more and more to be a training for life. The training to be aimed at is manhood. One fifth of the expenditures for education has been for the negro.

There are no more frontiers; exploration has been completed. New land and cheap land have vanished. Opportunity lies in the development of dimly realized resources. The resources of North Carolina are great, and her greatest one is her children. The care of the South now, and that of North Carolina, is for service and usefulness. She needs all kinds of work, all kinds of men, to lead and to follow. Upon the soil hallowed by four centuries of inspiring history let us dedicate ourselves to the service of North Carolina.

At the conclusion of the Alumni address the class reunions began. The first class to take the stage was the class of 1879. After thirty years they mustered eight men at their reunion. Their president Mr. Wm. J. Peele of Raleigh presided over the class meeting and first called on the class secretary, Francis D. Winston of Windsor, to call the class roll. Before calling this roll Mr. Winston made the announcement that it had been agreed among the members of the class that the man in the class who could lay claim to the largest household at the end of thirty years after graduation should be awarded a prize. The members of the class had been striving valiantly for this prize and as a result there was a tie. Ten years more were given in which to get off this tie. The secretary then called the class roll which included many men of State reputation. At the conclusion of the roll President Peele asked the secretary to record a fine of five dollars against each member of the class not present. This sum to be used to present the University with a telescope. Mr. Peele then read extracts from the Raleigh News of June 5th, 1879, showing what was thought of the class of '79 when they graduated.

The next class to assemble upon the rostrum was the class of 1884 who reassembled after an absence of twenty-five years. The class president Prof. Jas. L. Love of the Mathematical Department of Harvard presided. He called upon Mr. Samuel L. Gattis class secretary. Seven men of the class of '84 answered the roll call. After calling the roll the secretary read a brief history of his class. Although none of its members had become greatly distinguished yet each one was acting well his part in the community in which he dwelled.

The next class called was the class of '89. However so few members of

this class were present that they did not have any exercises.

The class of 1904 now took the stage. Mr. Albert Cox of Raleigh read the roll of the class giving the statistics of each man. In the absence of any other officer Mr. E. S. W. Dameron of Burlington presided over his class. After addressing a few remarks to his fellow class-mates and the audience Mr. Dameron adjourned the meeting.

The class of '04 which graduated fifty-three men mustered fourteen at their first reunion. This closed the Alumni exercises for the day and the assemblage was dismissed.
